

1.1

Transl.: Homage to the glorious Ādinātha who taught the science of Haṭhayoga which is like a splendid stairway for one who wants to climb to the lofty royal terrace.

Testimonia:

Cf. *Yogasārasaṅgraha*, p. 54.

sadādināthāya namo 'stu tubhyaṃ
yenopadiṣṭā haṭhayogavidyā |
virājate pronnatarājayogam
āroḍhum icchor adhirohiṇīva ||

Gheraṇḍasaṃhitā 1.1

ādīśvarāya praṇamāmi tasmai
yenopadiṣṭā haṭhayogavidyā |
virājate pronnatarājayogam
āroḍhum icchor adhirohiṇīva ||

Comm.: The α witnesses read *virājate pronnatarājayogam* while several others have either *vibhrājate* or *°rājasaudham* or both. As explained in Hanneder 2020, *virājate* is stylistically preferable and the comparison between the science of *haṭhayoga* and a stairway works only with *°rājasaudham*.

[Place holder] This reading appears to have resulted from an attempt to replace the word *vidyā* with *yoga* in the opening verses of the text.

?? add comment about yoga replacing mārga and saudha here and in the next two verses.

Metre: Upajāti

1.2

Transl.: After bowing to the glorious guru, the Lord, the yogi Svātmārāma teaches the system of Haṭhayoga solely for [attaining] Rājayoga.

Comm.:

1.3

Transl.: For those who cannot find the royal highway because they are lost in the darkness of many doctrines, the compassionate Svātmārāma holds the Lamp on Haṭha.

Testimonia:*Haṭharatnāvalī* 1.4

bhrāntyā bahumatadvānte rājayogam ajānatām |
 kevalam rājayogāya haṭhavidyopadiśyate ||
 rājayogam] rājamārgam P,T,t1

Comm.: Most witnesses have *rājayogam ajānatām* (‘for those ignorant of Rājayoga’) in 1.3b. While this reading is well attested by the manuscript transmission of the *Haṭhapradīpikā* and some manuscripts of the *Haṭharatnāvalī* (note the readings of P,T,T1 of the critical edition [Gharote 2009: 5 n. 2] in the testimonia), the reading *rājamārgam ajānatām*, “for those unable to find the royal highway”, is more appropriate to the metaphor of being lost in darkness.

In 1.3d *krpākaraḥ* is attested by the most important groups, including α, of the available manuscripts. The readings *prakāśyate* and *kṣamākaraḥ* are attested by some manuscripts in lower branches of the stemma. Since the context is the author helping yogis who have strayed from the royal path, *krpākaraḥ* makes good sense. As Brahmānanda notes, this compound can be understood as one who is compassionate (*krpā* + *kara*) or one who is a mine (i.e., a rich source) of compassion (*krpā* + *ākara*). In the Devanagari transmission, the *kṣa* of *kṣamākaraḥ* probably arose as a mistake for *kr*.

1.4

Transl.: In fact, Matsyendra, Gorakṣa, and other [perfected yogis] discovered the science of Haṭha, and the yogi Svātmārāma knows it through their favour.

Testimonia:*Haṭharatnāvalī* 1.3

haṭhavidyām hi gorakṣamatsyendrādya vijānate |
 ātmārāmo ’pi jānīte śrīnivāsaś tathā svayam ||

Comm.: The word *athavā* (‘or’) is well attested but difficult to construe here. Brahmānanda understands it as conjunction (*athavāśabdaḥ samuccaye*), and this is how we have interpreted it. The variant *mahāyogī* in ε₁ and other manuscripts (G₅J₄J₁₁K₀) is probably an attempt to remove the difficulty of understanding *athavā*. One could emend to *tathā* in light of the attested reading *yathā* (C₇) but this would be a bold intervention given the weight of evidence supporting *’thavā*.

1.5

Transl.: The glorious Ādinātha, Matsyendra, Śābara, Ānandabhairava, Caurāṅgi,

Mīna, Gorakṣa, Virūpākṣa, Bileśaya,

Testimonia:

Haṭharatnāvalī 1.80

śrīadināthamatsyendraśābarānandabhairavāḥ |
śāraṅgīmīnagorakṣavirūpākṣabileśayāḥ ||

Comm.: In Śaiva texts which predate the Haṭha corpus, Mīnanātha and Matsyendra are one and the same, but they are differentiated in later Tibetan and Indian lists of siddhas (Mallinson 2019: 273 n.35).

Two manuscripts of the α and δ groups have the variant reading °*virūpākṣaḥ savālikaḥ* (J₅V₁₉) for °*virūpākṣabileśayāḥ*. In another α manuscript, N₃, *savālikaḥ* was corrected to *savālmikaḥ*, perhaps in an effort to restore a name similar to Vālmiki, the celebrated author of the *Rāmāyaṇa*.

1.6

Transl.: Manthānabhairava, Siddhabuddha, and Kanthaḍi, Goranṭaka, Surānanda, Siddhapāda and Carpaṭi,

Testimonia:

Haṭharatnāvalī 1.81

manthānabhairavo yogī siddhabuddhaś ca kandali |
korandakaḥ surānandaḥ siddhipādaś ca carpaṭi ||
korandakaḥ] gonandaka P,T,J,n1,n4

Caturbhūja Misra's *Mugdhāvabodhinī* (1.7.8) on the *Rasahrdayatantra*

manthānabhairavo yogī siddhabuddhaś ca kanthaḍi |
koraṇṭakaḥ surānandaḥ siddhapādaś ca carpaṭi ||

Comm.: The α manuscripts have *goranṭaka*, and several other manuscript groups have *pauranṭaka*. We are yet to find the name *goranṭaka* in other Sanskrit texts but it may be a Sanskrit rendering of *Goranṭakuḍu*, which is the name of a disciple of Gorakṣanātha in the *Navanāthacaritramu* (Jones 2017: 194 n.3). The spelling *koraṇṭaka* is attested in the *Haṭhābhyāsapaddhati*, and it is reasonably well attested by manuscripts of the *Haṭhapradīpikā*, as well as those of the *Haṭharatnāvalī* (which also has *gonandaka*).

The compound *siddhapāda* could be a respectful affix. However, it seems unlikely here because the name would cross the *pāda* break.

1.7

Transl.: Kāṇerī, Pūjyapāda, Nityanātha, Nirañjana, Kapālī, Bindunātha, and the one named Kākacaṇḍīśvara.

Testimonia:

Haṭharatnāvalī 1.82

karotiḥ pūjyapādaś ca nityanātho nirañjanaḥ |
kapālī bindunāthaś ca kākacaṇḍīśvarāhvayaḥ ||

Caturbhuja Misra's *Mugdhāvbodhinī* on the *Rasaḥṛdayatantra*

kaṇerī pūjyapādaś ca nityanātho nirañjanaḥ |
kapālī bindunāthaś ca kākacaṇḍīśvaro gajaḥ |

Comm.: It is possible that *pūjyapāda* could be a respectful affix to the name Kāṇerī. The variant *dhvaninātha* may have resulted from a transposition of the first two syllables of *nityanātha*.

The α group supports *kākacaṇḍīśvaro gayaḥ* but we have not been able to find evidence for a Siddha called Gaya.

1.8

Transl.: Allamaṇḍa prabhudeva, Ghoḍācolī, Ṭiṇṭiṇī, Bhālukī and Nāgabodha and Khaṇḍakāpālika.

Testimonia:

Haṭharatnāvalī 1.83

allamaḥ prabhudevaś ca naiṭacūṭiś ca ṭiṇṭiṇiḥ |
bhālukir nāgabodhaś ca khaṇḍakāpālikas tathā ||
allamaḥ prabhudevaś] allamaṇḍa prabhudevaś P,T,t1

Caturbhuja Misra's *Mugdhāvbodhinī* on the *Rasaḥṛdayatantra*

āllamaḥ prabhudevaś ca ghoḍācolī ca ṭhiṇṭhiṇi |
bhālukir nāgabodevaś ca khaṇḍī kāpālikas tathā ||

Comm.: The name Allamaṇḍa prabhudeva (sometimes Allama Prabhu Deva or Allama Prabhudeva in secondary literature) is largely transmitted as *allamaḥ prabhudevaḥ*, as though it were two names, although some manuscripts of the *Haṭha-pradīpikā* have *allamaṇḍa prabhudevaś ca* (i.e., $V_3V_8V_{13}V_{16}V_{22}N_{24}N_{26}J_{y0}$) and so do some of the *Haṭharatnāvalī* (i.e., P,T,t1 in Gharote 2009: 35 n. 8).

The names Nāgabodha, Nāgabodhi, Naradeva, Nāgabodeva all seem possible in 1.8c. The reading *nāgabodhaś ca* is attested across several primary groups of manuscripts. Many witnesses have *khaṇḍa* and *kāpālika* as separate names. However, Khaṇḍa-

kāpālīka is well attested. Examples include *Kathāsaritsāgara* 121.5 ff. (check??), *Bṛhatkathāmañjarī* 10.45 (check??) and Vajrapāṇi's *Laghutantraṭīkā*, p.45 (*vīrāḥ khaṇḍakāpālīkādayaś caturviṃśatiḥ*). It may be a derogatory name for a Kāpālīka, coined perhaps by an outsider and connoting something like a defective Kāpālīka in the sense of a 'part-time' Kāpālīka. Alternatively, it could simply refer to one who uses a broken skull as a bowl.

1.9

Transl.: These and other great adepts used the power of hathayoga to smash the rod of death and [so] are roaming the worlds.

Testimonia:

Haṭharatnāvalī 1.66

surāṣṭre dhārmike deśe subhikṣe nirupadrave |
ekāntamaṭhikāmadhye sthātavyaṃ haṭhayoginā ||

Yogacintāmaṇi f. 54r

haṭhapradīpikāyām—
surājye dhārmike deśe subhikṣe nirupadrave |
ekānte maṭhikāmadhye sthātavyaṃ haṭhayoginā ||

Comm.: The term *maṭhikā* occurs in narrative literature and yoga texts in the sense of a small hut. For example, in the *Kathāsaritsāgara* (12.9.14, 29–30), *maṭhikā* refers to the small hut built in a cremation ground by a young Brahmin who makes as his bed the ashes of the dead girl he had hoped to marry. In several other stories (*Kathāsaritsāgara* 6.6.132, 10.5.89, 12.25.35), *maṭhikā* is the term used for the hut of an ascetic. In an elaborate description of the huts (*maṭhikā*) used for Haṭhayoga, the author of the *Haṭhābhyāsapaddhati* states that the dimensions of the hut are four fore-arm lengths (*hasta*) high and wide, and it can be made of various materials, such as red earth, ashes, plaster and so on (Birch and Singleton 2019: 17–18).

In the *Jyotsnā* and printed editions of the *Haṭhapradīpikā*, including one by Digambara and Kokaje (1970: 6), this verse has the additional hemistich, *dhanuḥpramāṇa-paryantaṃ śilāgnijalavarjite*. This hemistich derives from the *Gorakṣaśataka* (32cd), which has *ṣparyante* instead of *ṣparyantaṃ*. It stipulates that the hut should be built in a place measuring up to a bow length and free from rocks, fire and water. None of the early manuscripts has this hemistich, which suggests that it was added at a later time. Nonetheless, it appears in over a dozen manuscripts that were consulted for this edition. These manuscripts are not close to an early hyparchetype of the text.

1.13

Transl.: It has a small door and is without cracks, holes and bumps. It is neither too high nor too low in extent and is thickly smeared with cow dung in the proper way. It is clean, free from all annoyances, pleasing on the outside with a verandah, altar and well, surrounded by a wall: these are the characteristics of the yoga hut as taught by the adept practitioners of Haṭha.

 bāhye maṇḍapakūpavediracitaṃ prākārasaṃveṣṭitaṃ |
 proktaṃ yogamaṭhasya lakṣaṇaṃ idaṃ siddhair haṭhābhyāsibhiḥ ||
 °vimalaṃ] L, mavilaṃ N

Haṭharatnāvalī 1.67

alpadvāram arandhragartapiṭharaṃ nātyuccanīcāyitaṃ
 samyaggomayasāndraliptavimalaṃ niḥśeṣabādhōjjhitaṃ |
 bāhye maṇḍapavedikūparuciraṃ prākārasaṃveṣṭitaṃ
 proktaṃ yogamaṭhasya lakṣaṇaṃ idaṃ siddhair haṭhābhyāsibhiḥ |||
 °piṭharaṃ] piṭakaṃ J,n2, peṭakaṃ N

Comm.: The syntax of this verse is rather problematic. One would expect the features of the hut, which are listed in the first three quarters of the verse, to be in the nominative case. Then, the words *idaṃ lakṣaṇaṃ* in the fourth quarter would refer back to them. However, the compounds in the first three verse-quarters appear to qualify *lakṣaṇa* as though they were adjectives, and this seems to have been the way the verse was composed.

The manuscripts preserve many different readings at the end of the compound beginning with *arandhragarta*°. We have adopted *piṭaka*, which usually means “a basket” but can also mean “a boil or blister,” because it is well attested and might here refer to bumps on the floors or walls that would make them uneven. Another possibility is °*piṭharaṃ*, which can have the sense of potsherds and would here mean that the hut should be free of rubbish on the floor. One would expect a word for a defect in a hut that is similar to, but not the same as, cracks (*randhra*) and holes (*garta*). For this reason, the reading °*vivaraṃ* looks like a patch, as its meaning does not add anything to °*randhragarta*°. The reading °*viṭapaṃ* (‘the young branch of a tree or creeper’) attested in some manuscripts of the *Haṭhapradīpikā* is difficult to construe in this context unless it was intended to refer to creepers or branches that might invade or encroach upon the hut.

Manuscripts of several groups, namely β, ε and η, have °*bādhōjjitaṃ*, whereas δ and the *Yogacintāmaṇi* have the more easily understood reading of °*jantūjjhitaṃ* (‘free from creatures’). The α group is split on this, with G₄ (*bodhōjjitaṃ*) closer to °*bādhōjjitaṃ* and N₃ (*jyaṃtyūpsitaṃ* and J₅ (*jaṃtūṣṇitaṃ*) closer to °*jantūjjhitaṃ*. We have adopted the more unusual reading of °*bādhōjjitaṃ* with the support of a similar description of a hut in *Suśrutasaṃhitā* 6.17.67 (*gr̥he nirābādhe*).

haṇaṃ niyamagrahaḥ |

Yogaparakāśikā 1.48

niyamāgrahaḥ vakṣyamāṇanīyamāparipālanam

Comm.: Since many scribes do not use an *avagraha* we cannot be sure whether to understand *niyamagrahaḥ* in *pāda* b as having a negative prefix. Although *yama* and *niyama* are not included in the *Haṭhapradīpikā* as auxiliaries of Haṭhayoga, verse 2.14 implies that *niyama* is necessary at least in the early stages of establishing a practice. Furthermore, verse 3.82 suggests that a yogi who does not practice *niyama* might obtain success in yoga through the practice of *vajrolī*. Ambiguity over the role of *yama* and *niyama* in Haṭhayoga may explain why two verses on ten *yamas* and ten *niyamas* were inserted in some manuscripts after the next verse (1.16). The additional verses derive from either the *Śāradātilakatantra* (25.7–8) or the *Vasiṣṭhasaṃhitā* (1.38, 1.53). In the *Jyotsnā*, Brahmananda reads *niyamāgraha* and takes it as though *āgraha* was implied, which yields the meaning of ‘over-insistence on rules’, and he relates it to extreme ascetic practice.

1.16

gurvācāryaprasādāc ca ebhir yogas tu sidhyati ||
niścayād] niścālād- P,T

Comm.: α and several other groups of manuscripts have *tattvajñānāc ca darśanāt* or something very similar in the second *pāda* of the verse, but *darśana* by itself is problematic: a vision of what? The early sources of this verse, in particular the *Śivadharmottara*, indicate that the second verse quarter read as *santoṣāt tattvadarśanāt*, which makes much better sense of the word *darśana* (i.e., ‘seeing the truth’). However it seems likely that before the time of Svātmārāma other versions of this verse were circulating in which *santoṣāt* was not found, *niścayāt* had moved from the first to second verse quarter, *tattvadarśanāt* had become *tattvajñānāt* and *sāhasāt* was introduced. It should also be noted that the word *tattva* could have a more specific meaning in the *Haṭhapradīpikā* (4.45–46) as Svātmārāma states that it is a synonym of *samādhi*. In other yoga texts, it can sometimes refer to the practices of yoga (e.g. *tritattva* in *Amṛtasiddhi* 13.12, 14.2–3) or, more generally, to the highest reality or truth (e.g. *Amanaska* 1.2, 1.20–21, 2.17, etc.).

1.17

Transl.: Because it is the first auxiliary of Haṭha, *āsana* is taught first. This type (*tad*) of *āsana* brings about steadiness, good health and physical fitness.

Haṭharatnāvalī 3.5

haṭhasya prathamāṅgatvād āsanam darśyate mayā |
tat kuryād āsanam sthairyam ārogyam cāṅgapāṭavam ||

Comm.: The reading of *aṅgapāṭavam* is attested among many of the early manuscripts, including the main one of the α group. Although this compound rarely appears in other yoga texts, a similar term *śarīrapāṭava* occurs in the *Śivasamhitā* (2.35) as one of the benefits bestowed by digestive fire (*vaiśvānarāgni*), which indicates that the word *pāṭava* was used in relation to the body and the benefits of yoga. The compound *aṅgapāṭava* seems to imply the optimal functioning of the body. The variant reading, *aṅgalāghava* (‘lightness of the limbs’ or ‘dexterity’) is more

common in yoga texts and similar formulations occur even in works known to Svātmārāma, such as the *Dattātreyayogaśāstra* (*śarīralaghutā*) and the *Amanaska* ([...] *laghutvaṃ ca śarīrasyopajāyate*). It is likely that the less common term *aṅgapāṭavam* was changed to the more widely used notion of *aṅgalāghava*, perhaps early on in the transmission, as the latter is attested by manuscripts in several early groups (i.e., β, γ and δ).

atha svastikāsanam—
jānūrvor antaraṃ samyak kṛtvā padātale ubhe ||
ṛjukāyasamāsīnaḥ svastikaṃ tat pracakṣate ||

Comm.: One might wonder how the soles of the feet could be placed between the knees and thighs. Brahmānanda explains that the region of the shank near the knee should be understood by the word ‘knee’ in this verse (*atra jānuśabdena jānusaṃnihito jaṅghāpradeśo grāhyaḥ jānusaṃnihito jaṅghāpradeśaḥ*). This is consistent with the earliest known description of *svastikāsana* in the *Pātañjalayogaśāstravivarāṇa* (2.46), which states that the big toe of one foot is tucked in between the shank and thigh of the other so it is not seen (*dakṣiṇaṃ pādāṅguṣṭhaṃ savyenorujaṅghena pariḡrhyādrīṣyaṃ kṛtvā tathā savyaṃ pādāṅguṣṭhaṃ dakṣiṇenorujaṅghenādrīṣyaṃ pariḡrhyā yathā ca pārṣṇibhyāṃ vṛṣaṇayor apīḍaṇaṃ tathā yenāste tat svastikaṃ āsanam*). For a discussion of *svastikāsana* in the Pātañjalayoga tradition, see Maas 2018: 68–69. The descriptions of *svastikāsana* in early Śaiva Tantras do not mention the inserting of the toes between the knees and thighs (see Goodall 2004: 348–350, fn. 371).

1.20

Transl.: [The yogi] should place his right heel on the left side of the [lower] back, and the left [heel] on the right [side], in the same way. This is *gomukhāsana*, which [looks] like a cow’s face.

atha gomukhāsanam—
savye dakṣiṇagulphaṃ tu prṣṭhapārśve niyojayet ||
dakṣiṇe 'pi tathā savyaṃ gomukhaṃ gomukhāsanam ||

Comm.: This posture first appears in some Vaiṣṇava *Samhitās* that predate the *Haṭhapradīpikā*, including the *Ahīrbudhnyasaṃhitā* and the *Vasiṣṭhasaṃhitā*, which is likely to have been the source of this verse. The position of the ankles is the same in all the source texts. The *Ahīrbudhnyasaṃhitā* adds that the hands are crossed behind the back and hold the big toes. For illustrations of six possible positions of the arms and hands, see Gharote, Jha, Devnath, Sakhalkar 2006: 111–113.

1.21

Transl.: Fixing one foot on one thigh and placing the [other] thigh on the other foot is called *vīrāsana*.

atha vīrāsanam—
 ekaṃ pādam athaikasmin vinyased ūruṇi sthiram ||
 itarasmimś tathā coruṃ vīrāsanam itīritam ||
 sthiram] sthitam T

Comm.: Although most witnesses have *tathā* in 1.21a, the word *atha* has been accepted because it is attested by G₄ (α group) and V₁ (η group), the sources and the testimonia. It appears to be verse filler here rather than indicating a temporal sequence of actions. Svātmārāma borrowed the verse on *vīrāsana* from the *Vasiṣṭhasaṃhitā*, the redactor of which appears to have adapted its first hemistich from a description of this posture in the *Śāradātīlakantra*. This would explain the rather strange syntax of the *Vasiṣṭhasaṃhitā*'s version, in which *adhaḥ kṛtvā* was changed to *athaikasmin*, and *tathetaram* became *ca saṃsthitam*. It seems that *saṃsthitam* must be understood with *ūruṃ* in the third *pāda* in the sense of *saṃsthāpya* (i.e., 'having placed').

Different versions of *vīrāsana* are found in earlier Tantras, such as the *Kiraṇatantra* (58.9), Hemacandra's *Yogaśāstra* and commentaries on the *Pātañjalayogaśāstra*. For a discussion of some of these sources, see Maas 2018: 66–68.

1.22

haṭhapradīpikāyām
 gudaṃ niyāmya gulphābhyāṃ vyutkrameṇa samāhitaḥ |
 kūrmāsanam bhaved etad iti yogavido viduḥ || iti kūrmāsanam ||

Comm.: In the first quarter of the verse, the witnesses are split between *nirudhya* ('having blocked'), *nibadhya* ('having bound'), *niyamya* ('having restrained') and *niṣpīḍya* ('having pressed'). The source, the *Vasiṣṭhasaṃhitā*, and two manuscripts of the β and γ groups support *nirudhya* whereas one α manuscript (J_5) and the testimonia support *niyamya* and another α manuscript (G_4) has *niṣpīḍya*. In terms of blocking or closing the anus by sitting on the ankles, *nirudhya* makes good sense, and *niṣpīḍya* ('having pressed the anus with both ankles') is also possible.

??The word *vyutkrameṇa* appears to describe the position of the ankles. Its basic meaning is 'against the normal direction,' which would suggest that the ankles are turned out or crossed rather than placed together naturally. If the yogi is in a kneeling-type position, turning the feet out would bring the ankles together, blocking the perineal area. See *Yoga Mīmāṃsā*, vol 8, no. 2, pp. 29–30 for a discussion of *vyutkrameṇa* and the position of the ankles in *kūrmāsana*, and vol 8, no. 2, Figures 3–6 for photographs of a practitioner performing this *āsana*.

1.23

Transl.: [The yogi] correctly assumes *padmāsana*, inserts the hands between the knees and thighs, places [the hands] on the ground, and remains in the air. This is *kukkuṭāsana*.

kukkuṭāsanabandhastho dorbhyāṃ sambadhya kandharām |
śete kūrmavad uttānam etad uttānakūrmakam ||
iti uttānakūrmāsanaṃ ||

Comm.: The oldest dated manuscript, η_1 , has *kukkuṭāsanavat kṛtvā*, which is a simpler alternative to the widely attested reading *kukkuṭāsanabandhasthaḥ*, which we have accepted. Since there is no known source for this verse other than the *Haṭhapradīpikā*, we can only assume that the reading of η_1 was an isolated attempt to simplify the syntax.

1.25

Transl.: Clasping the big toes with the hands and performing the action of drawing a bow as far as the ear is called *dhanurāsana*.

dhanurāsanam |
 prasārya pādau bhuvi daṇḍarūpau
 karau ca pr̥ṣṭhe dhṛtapādayugmau |
 kṛtvā dhanustulyavivarttitāṅgaṃ
 nigadyate vai dhanurāsanam tat || 25 ||

Comm.: Since the word *ākaraṣaṇa* in one form or other is so well attested in the third verse quarter, the reading *dhanurākaraṣaṇaṃ kṛtvā*, which is in ϵ_2 , as well as the principal testimonia (i.e., the *Yogacintāmaṇi* and *Haṭharatnāvalī*), fits the overall syntax of the verse. However, it is curious that *kṛṣṭam* (for *kṛtvā*) is well attested in some groups of manuscripts because it seems redundant with *ākaraṣaṇaṃ*. However, the following reading in Godāvaramiśra's *Yogacintāmaṇi* (f. 40r) makes sense of *kṛṣṭam* and might indeed be the original version of the verse: *dhanurākaraṣavat kṛṣṭam dhanurāsanam ucyate*.

A different version of *dhanurāsana* is described in the *Haṭhayogasamhitā*. On the two versions of *dhanurāsana*, see Hargreaves and Birch 2017.

One manuscript of the *Haṭhapradīpikā* (ms. no. 30051, f. 2v), which was consulted but not collated for this edition, has a scribal comment stating that *dhanurāsana* should be done continuously (*anavarata*) on the left and right sides (*tatra ekam dhanurākaraṣaṇāsanam āsanam savyāpasavyapādahastābhyām [abhy]ased anavaratam*). This would make *dhanurāsana* a dynamic practice as shown in [this video](#).

1.26

Transl.: [The yogi] should hold the right foot, which is placed at the base of the left thigh, with the [hand of] the right arm, which is wrapped around the outside of the knee, and remain [like that] with his body twisted. This posture was taught by Matsyendranātha.

Testimonia:

Yogacintāmaṇi f. 84r (attr. *Haṭhapradīpikā*)

atha matsyendrāsanam—
vāmorumūlārpitadakṣapādo jānvor bahirveṣṭitadakṣadoṣṇā |
pragr̥hya tiṣṭhet parivartitāṅgaḥ śrīmatsyanāthoditam āsanam syāt ||
°dakṣapādo] °dakṣapādaṃ P, °dakṣapādau t1

Yuktabhavadēva 6.19 (attr. *Haṭhapradīpikā*)

vāmorumūlārpitadakṣapādaṃ jānvor bahirveṣṭitadakṣadoṣṇā |
pragr̥hya tiṣṭhan parivartitāṅgaḥ śrīmatsyanāthoditam āsanam syāt ||

Comm.: In the second verse quarter, most of the manuscript groups have a compound with °doṣṇā at the end, as seen also in the *Yogacintāmaṇi*, *Haṭharatnāvalī* and *Yuktabhavadēva*. The instrumental ending (‘with the hand’) works well with the gerund (*pragr̥hya*) in the third verse quarter and the object (°dakṣpādaṃ) in the first quarter. This reading indicates that the right foot is held by the hand of the arm that is wrapped around the outside of the left leg, which would be the right hand (°dakṣadoṣṇā) rather than the left (°vāmodoṣṇā), as shown in [Figure 1](#).

One manuscript of α (G₄) and most manuscripts of the *Haṭharatnāvalī* have °dakṣapādo in the first pāda. This reading yields the same meaning as the adopted one if read with °vāmapādaṃ in the second. However, G₄ and manuscripts of the *Haṭharatnāvalī* read °vāmodoṣṇā, which is not good because it leaves the gerund without an object.

The version of this verse in *Jyotsnā* (1.26), which is supported by some manuscripts in two important groups, β and η, has two objects of the gerund, namely the left and right feet, without an instrumental or conjunctive particle. In his commentarial remarks, Brahmānanda proposes that the left foot is grasped by the right hand and the right foot by the left foot, as seen in [Figure 2](#).

Haṭhatattvakaumudī 7.8

matsyendrapīṭhaṃ jaṭharapracāṇḍa-
ruṇmaṇḍalakhaṇḍanakhaṇḍanāstram |
abhyāsataḥ kuṇḍalinīprabodhaṃ
daṇḍasthīratvaṃ ca dadāti puṃsām ||

Yuktabhavadēva 6.20 (attr. *Haṭhapradīpikā*)

matsyendrapīṭhaṃ jaṭharaprabuddhaṃ
pracaṇḍaruṇmaṇḍalakhaṇḍanāstram |
abhyasataṃ kuṇḍalinīprabodhaṃ
daṇḍasthīratvaṃ ca dadāti puṃsām ||

Comm.: The manuscript readings for the compound beginning with *jaṭhara* diverge significantly and include *jaṭharapravṛddha*°, *jaṭharaprabuddha*°, *jaṭharapradīpta*° and *jaṭharapracāṇḍa*°. As descriptive compounds, none of these makes good sense in regard to Matsyendra's seat. Since the stomach or abdomen (*jaṭhara*) is the first member of this compound, it seems more likely that it qualifies the terrible diseases (*pracaṇḍaruḡ*) that are mentioned in the next verse quarter, as suggested by the reading *jaṭharapravṛddha*°, which is attested by γ_2 and the *Yogacintāmaṇi* and suggested by γ_1 and δ_1 (*jaṭharaprabuddh*°).

In 1.27d, the compound *daṇḍasthīratvaṃ* ('steadiness of the spine') is attested by all the important manuscript groups and testimonia, so it was likely original. However, the *Jyotsnā* (1.27d) has *candrasthīratvaṃ* ('steadiness of the moon'), and this reading is well-attested in many manuscripts that are lower on the stemma. Brahmānanda understands steadiness here as 'the absence of flow' (*sthīratvaṃ kṣaraṇābhāvaṃ*), a reference to the moon retaining its nectar.

caturāśītilakṣānām ekaikaṃ samudāhṛtaṃ |
ataḥ śivena pīṭhānām ṣoḍaśonaṃ śataṃ kṛtaṃ ||

Testimonia:

Yogacintāmaṇi f. 84v

haṭhapradīpikāyām—
caturaśīty āsanāni śivena kathitāni vai |
tebhyaś catuṣkam ādāya sārabhūtaṃ bravīmy aham ||

Haṭharatnāvalī 3.23

caturaśīty āsanāni śivena kathitāni tu |
tebhyaś catuṣkam ādāya sārabhūtaṃ bravīmy aham ||

Comm.: The word *tu* is often used to introduce a new posture, but in this case seems to be a verse filler.

In the first and third verse quarters, Svātmārāma may have rewritten *Śivasamhitā* 3.96 to include the information that it was Śiva (*śivena*) who taught the eighty-four *āsanas*, whereas in the source Śiva is himself speaking. Svātmārāma also changes

the meaning of the second half of the verse, as the *Śivasamhitā* states that Śiva picked out the four best postures and taught them, whereas in the *Haṭhapradīpikā* it reads as though Svātmārāma himself is responsible for picking out the four best postures and teaching them. There are other instances in the *Haṭha-pradīpikā* where Svātmārāma borrows a verse with a first person verb (e.g., 3.43, 4.2). However, in this instance, he may have intended to indicate that he chose the four postures coming after this verse (i.e., *siddha*, *padma*, *siṃha* and *bhadra*) because the *Śivasamhitā* follows 3.96 with teachings on the postures called *siddha*, *padma*, *paścimottāna* and *svastika*. Another possibility is that Svātmārāma borrowed 1.33–1.34 from an unknown source that contained a dialogue that was different to that of *Śivasamhitā*, as indicated by *sakhe* in 1.34.

Metre: Anuṣṭubh (a: ra-vipulā)

1.34

Transl.: The adept, lotus, lion and auspicious pose: these four are the best and, among those, always sit in the adept's pose, my dear.

Testimonia:

Yogacintāmaṇi f. 84v (attr. *Haṭhapradīpikā*)

siddhaṃ padmaṃ tathā bhadraṃ siṃhaṃ ceti catuṣṭayam |
śreṣṭhaṃ tatrāpi vai padmaṃ tiṣṭhet siddhāsane sadā ||

Haṭharatnāvalī 3.24

siddhaṃ padmaṃ tathā siṃhaṃ bhadraṃ ceti catuṣṭayam |
śreṣṭhaṃ tatrāpi ca tathā tiṣṭhet siddhāsane sadā ||

tathā] satve P, sakhe T,t1

Comm.: It is likely that the original version of this verse contained the vocative with the imperative form of the verb (*sakhe tiṣṭha*). There are other instances where Svātmārāma included a verse with the vocative (e.g., 4.10, 4.12, 4.20, 4.72, 4.86, 4.88) as though the text were a dialogue. Other versions of this verse are transmitted by some manuscripts of the *Haṭhapradīpikā*, in which the vocative and imperative verb have been removed. In these cases, the *sukhe* and *sukham* is difficult to construe because the context suggests that the intended meaning was that one should always sit in *siddhāsana* (as opposed to the other three *āsanās*), rather than the prescription to always sit in a comfortable *siddhāsana*.

Metre: Anuṣṭubh (c: na-vipulā)

1.35

Transl.: Now, the adept's pose (*siddhāsana*).

[The yogi] should put the heel at the perineum, firmly place the [other] foot on the penis, hold the face and chest together and the body erect, and [remain] stock-still, his senses restrained, gazing between the brows with his eyes unmoving. This, which breaks open the door to liberation, is called the adept's pose.

Comm.: The second verse quarter has many variations in the *Haṭhapradīpikā* manuscripts, as well as in the manuscripts of the sources and testimonia. N₃ of the α group has *athaikam ekahṛdaye dhṛtvā* and most of the collated witnesses have *athaikam eva hṛdaye dhṛtvā*. The repetition of *eka* appears to be a ditto-

graphical error and *hrdaye* does not make sense without an object of *dhrtvā* (i.e., having held what on the chest?). In the adopted reading *athaikam āsyahrdaye dhrtvā*, which is attested by η_1 , the oldest dated manuscript, the compound *āsyahrdaye* can be understood with the gerund *dhrtvā* and *ekam* in the sense of ‘having held the face and chest together.’ This alludes to the practice of the Jālandhara lock, in which the chin is placed on the chest. This meaning is more clearly seen in the *Jyotsnā*’s version of the second verse quarter, *hrdaye krtvā hanuṃ susthiram* (‘having put the jaw firmly on the chest’). The compound *āsyahrdaye* is supported by other manuscripts, such as $N_{10}P_1P_6J_{16}$ and the variants *asyahrdaye* and *asyahrdayaṃ* also occur (e.g., $J_7J_{12}A_1V_4V_{18}V_{16}P_8P_9$). Another possible reading is *ekahrdayo*, which is not supported by manuscripts of the *Haṭhapradīpikā* in the most important stemmatic groups but is in two other manuscripts (J_2M_1), the six-chapter *Vivekamārtaṇḍa* and the *Yogacintāmaṇi*, which attributes this verse to an unknown work called the *Pavanayogasaṅgraha*. In this case, *ekahrdayaḥ* would perhaps qualify the yogi as having a mind focused on one thing. The other well-attested reading, *athaikaṃ eva niyatam*, was an attempt to fix the problem of *hrdaye* by replacing it with *niyatam*, which must be read with *medhre pādām athaikaṃ* (‘having fixed one foot on the penis’). But *niyatam* is redundant here because of *vinyaset* in the first *pāda*.

Comm.:

The syntax of this verse as we have presented it is incomplete: at its end *pavanaṁ śanaiḥ*, ‘the breath gradually’, is left hanging. In the source text, the *Dattātreyayogaśāstra*, the following verse completes the syntax with *pūrayed*, ‘one should

inhale”. Either Svātmārāma chose to leave the verse hanging (the following verse in the *Dattātreyayogaśāstra* adds nothing about the form of the posture, which is the topic here) or the verse that completes the syntax fell out, perhaps because of a scribal error that happened early in the transmission. In the *Dattātreyayogaśāstra* verses 36 and 37 both end with *pavanam śanaiḥ*, the repetition of which may have caused an eyeskip.

The manuscript readings with *vakṣa sthāpayet* (J₇V₃J₈J₁₀J₁₇N₁₇) or something similar (V₁W₄) do not offer a solution to the incomplete syntax so do not indicate that Svātmārāma rewrote *Dattātreyayogaśāstra* 36 so that he could omit *Dattātreyayogaśāstra* 37. In the absence of evidence that Svātmārāma included *Dattātreyayogaśāstra* 37 or wrote a coherent version of *Haṭhapradīpikā* 1.46, we have made sense of *pavanam śanaiḥ* by adding “[draw in]” in our translation.

Brahmānanda’s comment on the statement, ‘having raised the root of the uvula with the tongue’ (*rājadantamūlaṃ ca jihvayā uttabhya*) in 1.46 is worth noting. In the context of Haṭhayoga, one would assume this statement to be referring to a type of *khecarīmudrā*, in which the tongue lifts the root of the uvula, here called the ‘royal tooth’ (*rājadanta*, on the meaning of which see Mallinson 2007: 209 n. 258). However, Brahmānanda understands it differently (synonyms omitted for clarity):

Supporting both roots of the front teeth on the left and right with the tongue [...] — this fixation of the tongue has to be understood from the mouth of the teacher.

rājadantānām daṃṣṭrāṇām savyadākṣiṇabhāge sthitānām mūle ubhe mūlasthāne jihvayā uttabhya ūrdhvaṃ stambhayitvā | gurumukhād avagantavyo ’yaṃ jihvābandhaḥ |

Brahmānanda appears to have had in mind a probably older rule for meditation postures, according to which the tongue rests near the front teeth. One example of this is in *Svacchandatantra* (4.365f.), which teaches a meditation pose called *divyaṃ karaṇam*, in which the tongue is to rest at the tip of the teeth (*dantāgre jihvām ādāya*). Other Tantric texts have this or similar rules, in which the tongue is supposed to rest either on the teeth or the palate, early examples being the *Mrgendrāgama*, *yogapāda* 19 (*dantāgre jihvām ādāya*) and *Mataṅgapārameśvaratantra*, *yogapāda* 2.27 (*tālumadhyagatenaiva jihvāgreṇa*). Placing the tongue where it does not disturb the meditation seems quite appropriate for a ‘normal’ meditative practice.¹

¹The rule of placing the tongue at the palate is also found in *Īśānaśivagurudevapaddhati* 18.120:

When the context is haṭhayogic physiology, placing the tongue at the uvula, which is the source of ‘nectar’, is more appropriate. Confusingly, yogic terminology includes many names for the uvula, and among these especially the term *rājadanta* may give rise to confusion, since, as we have seen, the tongue might also in some yoga systems be placed at the front teeth.

Furthermore, the haṭhayogic *khecarīmudrā* has been described in manifold ways. Usually the tongue is said to be inserted into the cavity above the palate but in some cases it is placed at the uvula. Thus the tenth-century *Mokṣopāya* (V.55.14c) says that the tongue rests at the ‘source of the palate’ (*tālumūlatalāagnajihvā*) and the commentary, the *Samśāratarāṇi*, on the parallel passage in *Laghuyogavāsīṣṭha* V.6.155, which reads *tālumūlāntarāagnajihvā*°, explains that this means that the tongue is to be placed in the middle of the two regions of the palate, and that this is the *nabhomudrā*, alias ‘*khecarī*’ (*tālumūlāntarāagnajihvamūlaḥ tālumūlayoḥ kākudamūladeśayoḥ āntare lagnam ālagnam jihvāmūlam yasyety anena nabhomudrā darśitā | yā hi khecarīty ucyate*).

A little later in the *Mokṣopāya* (V.78.24ab) it is made clear that one should reach the uvula, ‘at the root of the palate’ (*tālumūlagatām yatnāj jihvayākramya ghaṇṭikām*). In view of this background we must conclude that the author of the *Īyotsnā* was probably not aware of the yogic meaning of *rājadanta* and has tried his best to make sense of the passage, echoing the idea of the two roots of the palate (although his text is not talking about the palate), but then referring to the instruction of the teacher for practical details, probably noticing that his literal interpretation is somewhat opaque. In addition to his commentary on 1.46 (translated above), Brahmananda’s comments on *rājadantasthajihvāyām* at 3.22 indicate that he thought the *rājadanta* refers to the front teeth (*kutaḥ? yato dantānām rājāno rājadantā rājadanteṣu tiṣṭhatīti rājadantasthāḥ, rājadantasthā cāsau jihvā ca tasyām rājadantasthajihvāyām bandhaḥ, taduparibhāgasya sambandhaḥ śastah*).

1.47

Transl.: This is called the lotus pose [and] it cures all diseases. It is difficult for just anyone to accomplish; it is accomplished by a wise person [here] on earth.

idaṃ padmāsanaṃ proktaṃ sarvavyādhivināśanam |
durlabhaṃ yena kenāpi dhīmatā labhyate bhuvi ||

Comm.: In this context, the word *durlabham* is somewhat ambiguous as to whether the posture is hard to perform or hard to acquire (the more usual meaning). In commenting on *durlabham* in *Jyotsnā* 2.74, Brahmānanda glosses it as *duṣprāpam*, which means ‘difficult to attain’ and ‘inaccessible.’

The comment added to this verse by Svātmārāma indicates that he prefers the following version of *padmāsana*, which derives from the *Vivekamārtaṇḍa*, rather than the one he has borrowed from the *Dattātreyayogāśāstra*.

1.48

Transl.:

A man should put his hands together in a bowl shape, very firmly assume *padmāsana*, place the chin tight on the chest and meditation in the mind. Raising the *apāna* breath over and over again [and] releasing the inhaled *prāṇa*, he attains unequalled knowledge through the power of the goddess [Kunḍalinī].

Comm.:

The text at end of the second verse quarter is uncertain. Later witnesses, including Brahmānanda, have *dhyāyaṃś ca* but none of the early ones has this reading. We are taking *dhyānaṃ* with *sannidhāya*, but this renders *tat* problematic because it has no clear referent. In the source text, the *Vivekamārtaṇḍa*, *tat* appears to refer to the *mokṣadvāra* broken by Kuṇḍalinī, which is mentioned in the previous verse.

The two participles *proccālayan* and *muñcan* imply that the two things are happening at the same time, which is surprising but perhaps possible.

Metre: Śārdūlavikrīḍita

1.49

Transl.: The yogi in *padmāsana* who fills [himself] up through the openings of the channels and holds the breath is sure to be liberated.

Testimonia:

Yogacintāmaṇi f. 85v (attr. dattātreyā)

padmāsanasthito yogī nāḍīdvāreṣu pūrayan |
mārutaṃ dhārayed yas tu sa mukto nātra saṃśayaḥ ||

Haṭharatnāvalī 3.40

padmāsane sthito yogī nāḍīdvāreṣu pūrayet |
pūritaṃ dhṛiyate yas tu sa mukto nātra saṃśayaḥ ||

Dhyānabindūpaniṣat 70

padmāsanasthito yogī nāḍīdvāreṣu pūrayan |
mārutaṃ kumbhayan yas tu sa mukto nātra saṃśayaḥ ||

Comm.: It is not unusual to read *pūrayan* with the locative as seen in this verse (cf. *pūrayan mukhe* in *Amaraughā* 21d).

γ₁'s reading of *niyatam* (instead of *dhārayed*) in the third verse quarter explains the passive verbs in other witnesses. The passive verbs do not make sense with *yas tu*. The passive verbs meaning to take in the breath (e.g., *pīyate*) may have been adopted to remove the reference to holding the breath because a breath retention is not mentioned in the previous verse describing *padmāsana* (only inhalation and exhalation).

In the third verse quarter, the best α manuscript reads *māruto mriyate yas tu*, which does not make sense, but if one accepts *pūrayet* in the second verse quarter, one could emend α's reading to *māruto mriyate yasya*, which makes good sense (i.e., 'the yogi whose breath dies is undoubtedly liberated'). In the same vein, J5 also has the plausible reading *mārutaṃ mārayet yas tu*.

The *Jyotsnā* (1.49) has *nāḍīdvāreṇa* instead of *nāḍīdvāreṣu*, and Brahmānanda interprets it as the opening of the central channel (*suṣumnāmargeṇa*). This yields the idea of filling up the central channel (as opposed to other channels), which is described in the *Yogabīja* (94–95).

1.50–52

Transl.: Now, the lion's pose (*siṃhāsana*).

[The yogi] should put both ankles at the sides of the perineal seam below the scrotum. He should place the left ankle on right, the right ankle on the left and both

hands on the knees, spread his fingers, open his mouth and gaze in deep concentration at the tip of his nose. This is the lion's pose, which is always honoured by yogis. It causes the three locks to arise together and is the best of [all] postures.

Comm.:

Spreading the fingers and keeping the mouth wide open mimic a lion, and this is depicted in some iconography of yoganarasimha (for example, Yoga Narasimha, Vishnu's Man-Lion Incarnation, Samuel Eilenberg Collection, Bequest of Samuel Eilenberg, 1998, Accession Number: 2000.284.4. <https://www.metmuseum.org/art/collection/search/39251>).

The *Yogacintāmaṇi* attributes its citation of these verses on *siṃhāsana* to Yājñavalkya. Its citation does not include *Haṭhapradīpikā* 1.52cd, which affirms that 1.52cd is not from the *Yogayājñavalkya* (or *Vasiṣṭhasaṃhitā*). As far as we are aware, there is no source for the hemistich mentioning the three locks, so it may have been composed by Svātmārāma or borrowed from a lost work.

Metre: Anuṣṭubh (a: ma-vipulā)

1.53–54

Transl.: Now, the friendly pose (*bhadrāsana*).

[The yogi] should put both ankles at the sides of the perineal seam below the scrotum. By firmly and very steadily holding the sides of the feet with the hands, the friendly pose arises, which cures all diseases and poisons. Yogis of the Siddha tradition call it Gorakṣa's pose (*gorakṣāsana*).

bhadrāsanaṃ bhaved etat sarvavyādhiviśāpahaṃ ||

Comm.: We have understood *pārśvapāda* as a *ekadeśitatpuruṣa* meaning the side of the foot, like *agrapāda*, the toes.

Manuscripts of two early groups, β and γ , as well as the *Īyotsnā* (1.53), include an additional hemistich specifying that the left ankle is placed on the left side and the right ankle on the right (*savyagulphaṃ tathā savye dakṣagulphaṃ tu dakṣiṇe*). This hemistich appears to have been added to make it clear that the ankles are not crossed in *bhadrāsana*, unlike the previous pose, *śimhāsana*.

1.55

Transl.: When the great yogi does not become tired on adopting the *āsana*s in this way, he should practise the breath techniques of seals and so forth, from which purification of the channels arise.

Testimonia:

Yogacintāmaṇi f. 85v (attr. dattātreyā)

evam āsanabandheṣu yogīndro vijitāśramaḥ |

evam āsanabandhastho yogīndro vigatāśramaḥ |
athābhyāsen nāḍīśuddhiṃ mudrādīpavanakriyām ||
nāḍīśuddhiṃ] *em.*, nāḥīśuddhi ms. no. 2244

Comm.: The second hemistich can be interpreted in different ways. One possibility is to understand *nāḍīśuddhiṃ* as a bahuvrīhi qualifying *mudrādīpavanakriyām* in the sense that the yogi should practise a breathing technique, along with *mudrās* and other mechanisms, such as locks (*bandha*), from which purification of the channels arise. Alternatively, one could separate *mudrādī* from *pavanakriyām* and understand three different techniques here, namely, the practice of purifying the channels (perhaps by the alternative nostril method mentioned at the beginning of the second chapter), the *mudrās* and the breathing techniques of *prāṇāyāma*. The absence of a conjunctive particle, such as *ca*, makes the second interpretation less likely. The version of this verse in the *Yogacintāmaṇi* (cited in the testimonia) was changed to make it clear that *nāḍīśuddhi* and *pavanakriyā* with *mudrās*, are two distinct things.

The metre of 1.55c is a *ra-vipulā* with *nāḍi*.

Metre: Anuṣṭubh (c: ra-vipulā)

Comm.: 1.55*1–2 are omitted from the α, γ, δ and ε groups, so it is likely these

verses were not in the earliest versions of the *Haṭhapradīpikā*. In fact, it is likely that both were added (perhaps initially as marginal notes) to elaborate on the word *kriyā* in 1.55d. Both verses are similar to verses from the *Dattātreyayogaśāstra* (cited as the source). However, only the first half of *Dattātreyayogaśāstra* 47 is given in these later versions of the *Haṭhapradīpikā*, resulting in a near-nonsensical hemistich. Also, the syntax of 1.55.2ef is corrupt. One has to emend to *deyā* to make sense of it. These verses (except 1.55.2ef) appear in the *Īyotsnā* (1.65–66), but towards the end of chapter one.

Comm.: Verse 1.55.3 is only found in manuscripts of the *ḍ* group. It is very difficult to find a reason why this verse should be inserted here. It is apparently a *muktaka* that would befit an accomplished spiritual poem more than an instructional manual, like the *Haṭhapradīpikā*, even here, in what appears as a sort of miscellaneous section at the end of a chapter. In this verse, the lyrical subject wonders about why the mind is still able to doubt, despite its insight into the nature of reality. The reader might wonder how this illusionist verse could be understood to fit our Yoga text. We can only speculate that perhaps the scribe of the

hyparchetype of the δ manuscripts was fond of it.

The source is, as far as we can say, the *Śāntiśataka* of the Kashmirian poet Sillana or Silhaṇa. The manuscripts of the *Svātmopalabdhiśataka* give the name as *Sillana*, the mostly Bengali manuscripts of the *Śāntiśataka* read *Śilhaṇa*, as does Aufrecht in his *Catalogus Catalogorum*, 1891 (for further details see Hanneder, forthcoming). Sillana cannot be dated with any certainty but predates the *Haṭhapradīpikā* by a few centuries. The edition of the *Śāntiśataka* – where a hundred original verses had to be identified – places the verse in question into an appendix of doubtful stanzas (see Karl Schönfeld: *Das Śāntiśataka*. Leipzig: Harrassowitz 1910, p. 90 [A9]). However, the editor did not provide a compelling reason to regard it as unoriginal except only the fact that it is not transmitted in all manuscripts. What prevents further investigation of the matter is the lack of Kashmirian manuscripts for the *Śāntiśataka* and its compilatory character: one quarter of the material is identical with Bhartṛhari's *Vairāgyaśataka*. A still superficial glance at Sillana's *Svātmopalabdhiśataka* gives the impression that our verse would fit there, but not so much in the *Śāntiśataka*. Perhaps its first citation is in Advaya-vajra's *Tattva-ratnāvalī* (24). While these are only preliminary observations the verse is likely not original to the *Haṭhapradīpikā*.

1.55*4

Transl.: Realisation from scripture, one's own guru and oneself and the cessation of mind; all these methods have been combined and taught by the wise in this tradition.

Testimonia:

Yogacintāmaṇi f. 111v

haṭhapradīpikāyām–
āsanam kumbhakam citram mudrākhyam karaṇam tathā |
atha nādānusandhānam abhyāsānukrameṇa ca ||

Comm.: This verse was omitted from η_1 , the oldest dated manuscript. The omission is probably deliberate as that manuscript does not have chapter four, which teaches *nādānusandhāna*. The numbering in η_1 suggests that its exemplar had this verse.

The term *kumbhaka* is almost always masculine but appears in this verse as a neuter in the majority of manuscripts of the important groups.

This verse is similar to 1.65, which has *mudrādikaraṇāni ca*, so perhaps it was through confusion with 1.65 that the same reading is found in some witnesses of 1.56. It seems that the four auxiliaries (*aṅga*) of Haṭhayoga are being referred to in the singular (hence *āsanam*), whereas in 1.65 the plural is used (i.e., *pīṭhāni*). Therefore, the reading *citram [...] karaṇam tathā* is likely original for this verse.

brahmacārī mitāhārī tyāgī yogaparāyaṇaḥ |
abdād ūrdhvaṃ bhavet siddho nātra kāryā vicāraṇā ||
tyāgī] yogī P,T,t1

Comm.: The readings *tyāgī* and *yogī* are both well attested in *Haṭhapradīpikā* 1.57b. The confusion between the two appears to have started early in the transmission of the *Vivekamārtaṇḍa*. The occurrence of *tyāgī* in *Vivekamārtaṇḍa* 37 may be a dittographical type of mistake because the word *tyāgī* is in the previous hemistich of that work. But it is more difficult to determine whether Svātmārāma used a manuscript of the *Vivekamārtaṇḍa* with *tyāgī* or *yogī* in verse 37. Since the best α manuscript has *yogī*, as well as η_1 and many others, we have tentatively adopted it bearing in mind that it was changed early in the transmission of the *Haṭhapradīpikā*, most likely by a scribe who knew the reading of *tyāgī* in a manuscript of the *Vivekamārtaṇḍa*.

1.58

Yogacūḍāmaṇyupaniṣat 43

susnigdhamadhurāhāraś caturthāṃśavivarjitaḥ |
bhuñjate śivasamprītyā mitāhārī sa ucyate ||

Comm.: This verse probably derives from the ‘original’ *Gorakṣaśataka* (12c–13b). It is also found, but reworked to be about the *mitāhārī*, in Nowotny’s *Gorakṣaśataka* (55), which is an extended recension of the *Vivekamārtaṇḍa*.

The idea of not eating the fourth portion of one’s food (*caturthāṃśavivarjitaḥ*) can be found in older yoga texts, such as *Dharmaputrikā* 1.51–52:

ṣaḍrasopetasusnigdhasvādusāndrasugandhinā |
udarasyārdhabhāgan tu bhojanena prapūrayet ||
pāṇiyena caturbhāgaṃ taccheṣaṃ śūnyam iṣyate |
vāyos sañcārāṇānārtham āhāranīyamaḥ smṛtaḥ ||

And, as noted by Brahmānanda in *Jyotsnā* 1.58, the idea also occurs in an āyurvedic

work called the *Aṣṭāṅgaḥṛdayasaṃhitā*, *Sūtrasthāna*, 8.46cd–47ab:

annena kukṣer dvāv aṃśau pānenaikaṃ prapūrayet |
āśrayaṃ pavanādīnāṃ caturtham avaśeṣayet ||

1.59

Transl.: Pungent, sour, bitter, salty and hot foods, horseradish, sour gruel, [sesame] oil, sesame and mustard seeds, fish and intoxicating drink, flesh of goats and so forth, curds, diluted buttermilk, poor man's pulse, jujube fruit, the leftover paste of oily seeds, asafoetida, garlic and the like: they say that this is unwholesome.

Comm.: The compound *kaṭvamlā*^o (1.59a) is better than *kaṭvāmlā*^o and it is well attested by manuscripts of the *Haṭhapradīpikā*, as well as in lists of tastes and types of foods in other texts.

On the meaning of *uṣṇa* (1.59a) in relation to food, see Meulenbeld 1974: 254 fn. 13:

Cakra mentions as a variant: *katvamlalavaṇakṣāra* (pungent, acid,

saline and caustic). Cakra remarks that the term ‘hot’ (*uṣṇa*) denotes hot on touch when it occurs the first time, and hot with regard to potency when it occurs for the second time.

The compound °*haritaśāka*° in 1.59a is spelt °*haritaśāka*° in other works. The spelling °*harita* was probably adopted for metrical reasons. In some Nighaṇṭus (‘thesauruses’), °*haritaśāka*° is glossed as horseradish (*śigru*).

Rājanighaṇṭu 7.26

śigrur haritaśākaś ca śākapattraḥ supattrakaḥ |

Sauśrutanighaṇṭu 75ab

śigruko haritaśākaś ca mato vai mūlapatrakaḥ |

Brahmānanda’s understanding of *haritaśāka* as *pattraśāka* is probably wrong if *pattraśāka* was intended as ‘leafy vegetables.’ But he may have used the term *pattraśāka* in the sense of horseradish (*śigru*) as the dictionary notes that *pattraśāka* is probably equivalent to *śākapattra*, which is mentioned in *Rājanighaṇṭu* 7.26 (above).

The term °*sauvīra*° (1.59b) probably means sour gruel. Brahmānanda glosses *sauvīra* as *kāñjika*, which is ‘fermented rice water.’ On *sauvīra*, Meulenbeld (1974: 516–517) says, *sauvīra* is sour gruel made from barley and wheat.’ The process of making it is described in the *Suśrutasaṃhitā* (1.44.35–40ab) as follows:

Roots of trivṛt etc., the first group (vidārigandhādī), mahat pañcamūla, mūrvā and śārṅgaṣṭā, and also of snuhī, haimavatī, triphalā, ativiṣā and vacā – these are taken and divided into two parts out of which one is decocted and the other is powdered; now, crushed barley grains are impregnated with the above decoction several times, dried and then slightly fried. Taking three parts of this and one part of the above powder are put in a jar and mixed with their (of trivṛt, etc.) cold decoction and fermented properly. This is known as *sauvīraka*. (trans. Sharma 2018 (vol.1): 406)

However, according to some Nighaṇṭus, *sauvīra* can also mean stibnite (an ingredient in some añjana’s and medicines). For example, in the *Rājanighaṇṭu* (13.86):

añjanaṃ yāmunaṃ kṛṣṇaṃ nādeyaṃ mecakaṃ tathā
srotaṃ dr̥kpradaṃ nīlaṃ sauvīraṃ ca suvīraṃ ||

Note also that the *Yogaprakāśikā* (1.53) takes *sauvīra* with *taila*, perhaps to solve the problem of *taila* on its own (see below for more on this). The compound *sauvīrataila* is explained as ‘oil produced in the place Suvīra’ (*suvīradeśodbhāvatailam*). According to Ali (1966: 144), Suvīra is known as a country that was also called Suvira (V.79), Sauvira (XVI.21) and Sauvīraka (IV.23). He identifies it with the Rohri/Khairpur region of Sind.

The word *taila* could refer to *tilataila*. This is supported by the following rule (*paribhāṣā*) in the *Śārngadharaśaṃhitā* (48): *anuktāvasthāyām paribhāṣāvidhiḥ [...]* *taila* ‘*nukte tilodbhavam*. We thank Dominik Wujastyk for this reference.

Our translation of *madya* takes into account the following remarks of James McHugh (2021: 8):

The most general Sanskrit term to denote drinks that create a drunken state is *madya* “intoxicating [drink].” Translating this word is hard. “Inebriating drink” is clumsy to my ear. “Intoxicating” contains the unfortunate “toxic” element that is not present in the Sanskrit word, though at least in English this is a common word, applicable to various substances and states and lacking any “toxic” associations in everyday usage.

In the compound *ājādimāṃsa*° (1.59c), the adjective *āja*° is required for the metre, so variants beginning with *aja*° can be dismissed. Another well-attested reading is *ājāvimāṃsa*°. Although this was probably read as ‘goat and sheep flesh,’ *āvi* is not attested as an adjective of sheep, so this reading was probably not original. Moreover, only *ājādimāṃsa*° makes good sense. Diwakar Acharya believes that the prohibition of goat flesh and fish in this verse suggests it derives from the North East of India.

The term *kulattha* is a kind of pulse, translated by Dominik Wujastyk (1998: 77) as ‘poor man’s pulse.’

The word *kola* is a name for *Zizyphus Jujuba* (Nadkarni 1926: pp. 919–920). It is also known as *badara*. This is how Brahmānanda understands it in *Ĵyotsnā* 1.59 (*kolaṃ kolyāḥ phalaṃ badaram*). According to Nadkarni, the fruit of the wild variety is very acid and astringent. It is believed to purify the blood and assist digestion. The bark is astringent and a simple remedy for diarrhoea. The root is useful as a decoction in fever and delirium. There are references to *kola* being pungent, though this does not seem to indicate sufficiently why *kola* is mentioned separately in the *Haṭhapradīpikā* as an unwholesome food. Diwakar Acharya has informed us that *kola* can refer to a type of banana in some parts of India.

According to Sharma (1982: 69), *piṇyāka* is, ‘The remnant paste of oily seeds after pressing out the oil content is called *piṇyāka*.’ Diwakar says it is an oil cake that has a strong flavour, which may account for its inclusion in this list of unwholesome foods.

The term *hiṅgu* is Asafoetida (Nadkarni 1926: 360–361). As to why it might be considered unwholesome, the following comments by Nadkarni give some indication:

If long continued, even in moderate doses, it gives rise to alliaceous eructations, acrid irritation in the throat, flatulence, diarrhoea and burning in the urine.

Yogacintāmaṇi f. 55v (attr. *Haṭhapradīpikā*)

bhojanam ahitaṃ vidyāt punar uṣṇikṛtaṃ tathā |
atilavaṇaṃ sapalaṃ vā prasitaṃ śākotkaṭaṃ varjyam ||

Haṭhasaṅketacandrikā

bhojanam ahitaṃ vidyāt punar uṣṇikṛtaṃ rūkṣaṃ |
atilavaṇādikayuktaṃ kadaśanaśākotkaṭaṃ duṣṭaṃ ||

Comm.: We have not found any conclusive evidence for the meaning of *tilapiṇḍa*. Brahmānanda glosses it as *piṇyāka* (on the meaning of which see the notes for the previous verse).

The meaning of the compound *kadaśanaśākotkaṭaṃ* is not clear. Brahmānanda understands it as a list (*dvandva*) consisting of *kadaśana*, *śāka* and *utkaṭa*, which he defines as bad food, prohibited vegetables and pepper, respectively.

There are various possible meanings of *utkaṭa*. According to some Nighaṇṭus, the word *utkaṭā* can mean pepper (e.g., *Rājanighaṇṭu* 5.16 *pārvatī śailajā tāmra lambabījā tathotkaṭā*) and, according to the dictionary (s.v. Monier Williams), *utkaṭa* can refer to *Saccharum Sara* and *utkaṭā* also to *Laurus Cassia* (cinnamon).

However, *utkaṭa* can be an adjective that means ‘abounding in’ at the end of a compound. Since this verse consists of many adjectives describing food that is

unwholesome, it is likely that *kadaśanaśākotkaṭaṃ* was intended as an adjectival *tatpuruṣa*, in which case it means '[food] full of vegetables' *śākotkaṭa* that are 'bad food' or perhaps, 'bad eating' *kadaśana* in the sense of hard to chew.

varjayed durjanaprītiṃ vahnistrīpathasevanam |
prātaḥsnānopavāsādikāyakleśavidhiṃ tyajet ||

Comm.: Manuscripts from the α, β and ε groups have the reading *durjanaprāntaṃ* (1.61a), which is the lectio difficilior in relation to *durjanaprītiṃ* ('the friendship of wicked people'). We have understood *durjanaprānta* in line with Brahmananda's gloss in *Jyotsnā* 1.64, 'dwelling near bad people' (*durjanasamīpavāsa*).

1.62

Transl.: Pure food with wheat, rice, śāli rice, barley, sixty-day *śāli* rice, milk, ghee, cream, fresh butter, ground sugar and honey, dried ginger, fruit of the snake gourd and so forth, the five vegetables, mung beans and so on, and rain water are wholesome for the best of ascetics.

 mudgādidivyaṃ udakam ca munīndrapathyam ||

Comm.: In 1.62b, *maṇḍa*, which is supported by α, β and γ, is more likely than *khaṇḍa* ('candied sugar') because it fits the context of dairy products mentioned in this compound (i.e., *kṣīra*, *ājya* and *navanīta*). The term *navanīta* is discussed in *Suśrutasaṃhitā*, *sūtrasthāna*, 45.92 as follows:

Fresh butter (*navanīta*) is light soft, sweet, astringent, slightly sour, cold, intellect-promoting, appetiser, cordial, checking, aphrodisiac, non-burning, pacifies pitta and vāta and alleviates wasting, cough, wound, consumption, piles and facial paralysis [...] (trans. Sharma 2018 vol. 1: 434)

The word *sitā* is one of many words for ground sugar. Meulenbeld (1974: 507) comments that *sitā* is 'very white and looks like gravel.'

The term *paṭola* can refer to at least two different gourds. Meulenbeld (1974: 569) compiled a list of six possibilities, including *TRICHOSANTHES DIOICA* ROXB. ('pointed gourd'), *TRICHOSANTHES CUCUMERINA* LINN ('snake gourd').

Nadkarni (1954: 863, 518) has two entries on *paṭola*:

1. Snake gourd is common in Bengal and cultivated in Northern India and Punjab. The unripe fruit of this climbing plant is generally used as a culinary vegetable and is very wholesome, specially suited for the convalescent.
2. Smooth luffa is a hairy climbing herb extensively cultivated in several parts of India. The fruit is edible. Medicinally it is described as 'cool, costive,

demulcent, productive of loss of appetite and excitive of wind, bile and phlegm.

Sharma (1982: 156) adds that *paṭola* is a synonym of *kulaka* and is well known as *TRICHOSANTHUS DIOICA* ROXB. Brahmānanda glosses *paṭola* as *kośātakī*, which is *LUFFA ACUTANGULA* ROXB (Meulenbeld 1974: 586), suggesting that he thought it was some sort of luffa. He also mentions the vernacular term *paravara* for *paṭola*. Groups of five vegetables (*pañcaśāka* or *śākapañcaka*) have been defined in various yoga texts, but such grouping of vegetables does not seem to occur outside of literature on yoga. The earliest reference to a group of five vegetables known to us is the sixteenth-century *Yuktabhavadeva* 4.22, which attributes the verse to the *Śivayoga*. The same verse is also quoted in *Jyotsnā* 1.65 with attribution to a medical source (*vaidyaka*):

sarvaśākaṃ acāksuṣyaṃ cāksuṣyaṃ śākapañcakaṃ |
jīvantī vāstumatsyākṣī meghanādaḥ punarnavāḥ || iti ||

Another verse on a similar fivefold group of vegetables is also cited in the *Haṭhatattvakau-
mudī* (4.26)

pañcaśākaś tu-
kṣīraparṇī ca jīvantī matsyākṣī ca punarnavā
meghanādaś ceti budhaiḥ pañcaśākaḥ prakīrtitaḥ || iti ||

And a group with more significant differences is mentioned in the *Gheraṇḍasaṃhitā* (5.20).

bālaśākaṃ kālāśākaṃ tathā paṭolapatrakam |
pañcaśākaṃ praśaṃsiyād vāstūkaṃ hīlamocikāṃ ||

It is not entirely clear how one should understand *divya* (1.62d). Brahmānanda glosses it with *nirdoṣa* ('defectless') and takes it with *udaka*. Ayurvedic sources indicate more clearly that *divyodaka* was understood as rainwater. In a section on types of water (*jalavarga*) in the *Sūtrasthāna* of the *Carakasaṃhitā* (27.196–224), rainwater is referred to as '*divyaṃ udaka*' (1.27.198) in a discussion of the properties of water that has fallen from the sky. The compound *divyodaka* is used in other Āyurvedic works to refer to the use of rainwater in recipes and treatments (e.g., *Aṣṭāṅgahrdaya* 8.42–43). Also, the *Rājanighaṇṭu* (14.4) glosses *divyodaka* as rainwater:

divyodakaṃ kharāri syād ākāśasalilam tathā |
vyomodakaṃ cāntarikṣajalam ceṣvabhīdhāhvayam ||

Metre: Vasantatilakā

śreṣṭhaṃ sumadhuraṃ snigdhaṃ gavyaṃ dhātuprapoṣaṇam |
mano'bhilaṣitaṃ yogyaṃ yogī bhojanam ācaret ||

Comm.: The variants of 1.63a all seem possible: *mṛṣṭaṃ*, *miṣṭaṃ* and *iṣṭaṃ*. The last is made somewhat redundant by *mano'bhilaṣitaṃ* in 163c. Both *mṛṣṭaṃ* (α and η) and *miṣṭaṃ* (β and γ) are well attested by manuscripts of important groups and there is hardly any difference in their meaning in this context. We have adopted *mṛṣṭaṃ* as it is supported by the α group.

1.64
