¹ β_2 has these verses on synonyms both here and at 4.29/4.30, but β_1 has them at the latter place only.

² In the following, not all of the differences in the verse order of B and χ are noted. B follow the order of Γ (or of Δ ?) in the beginning and the end (after 4.72). The middle part is a kind of mix of Γ and $\epsilon_2\epsilon_3$. The verse order of χ is similar to that of $\epsilon_2\epsilon_3$, but with many small differences.
