[1] β_2 has these verses on synonyms both here and at 4.29/4.30, but β_1 has them at the latter place only.

[2] In the following, not all of the differences in the verse order of β_1 β_2 β_ω and χ are noted. β_1 β_2 β_ω follow the order of Γ (or of Δ?) in the beginning and the end (after 4.72). The middle part is a kind of mix of Γ and $\varepsilon_2\varepsilon_3$. The verse order of χ is similar to that of $\varepsilon_2\varepsilon_3$, but with many small differences.

[10] In $\Gamma\Delta$ the second hemistich only is written here and the whole verse and the next one (4.47*1) are found after 4.49*1. The text of the hemistich is not the same in the two instances. In the apparatus the readings of the first instance only are reported. The last Pāda of the second instance reads *avagamyā hi yogibhiḥ*.

[11] Transposed with the previous verse in $\beta_1\ \beta_2\ \beta_\omega$; η_2 merges the two into one: *nādo'ntaraṃ tu saṃgamya vājinaḥ paridhāyate | antaraṅgaturaṃgasya rogo vā gīyate pi ca ||*
