

## Chapter 2

अथासने दृढे योगी वशी हितमिताशनः ।

गुरुपदिष्टमार्गेण प्राणायामं समभ्यसेत् ॥ १ ॥

Now, when [his] posture is steady, the disciplined yogi whose diet is good and measured should practise breath control in the way taught by [his] teacher. (1)

---

**1a** *athāsane cett.*] *athāsāna*  $\gamma_1$ , *haṭhāsane*  $\eta_1$  **dr̥dhe**  $\alpha_1\alpha_2\gamma_2\varepsilon_1\zeta_3\eta_2\pi_2\chi$ ] *dr̥dha*  $\gamma_1$ , *dr̥dham*  $\delta_1$ , *vaśī*  $\delta_2$ , *dahe*  $\zeta_1$ , *dr̥dho*  $\varepsilon_2\eta_1\pi_1\pi_\omega$  **1b** *vaśī cett.*] *dr̥dham*  $\delta_2$ , *vajrī*  $\zeta_1$  **hitamitāśanaḥ cett.**] *hitasikāśanaḥ*  $\gamma_1$ , *mitahitāśanaḥ*  $\delta_2\varepsilon_2$ , *bhūtamitāśanaḥ*  $\zeta_1$  **1c** *gurūpadiṣṭa cett.*] *gurūpadeśa*  $\delta_1\delta_2\pi_2$  **1d** *prāṇāyāmam*  $\alpha_1\alpha_3\delta_1\delta_2\eta_1$ ] *prāṇāyāmān*  $\alpha_2\gamma_2\varepsilon_1\varepsilon_2\zeta_1\zeta_3\pi_1\pi_2\chi$ , *prāṇāyāmī*  $\gamma_1$ , *yogamārgam*  $\eta_2$ , *prāṇāyāmo*  $\pi_\omega$  **samabhyaset cett.**] *sadābhyaset*  $\delta_1$ , *samācaret*  $\zeta_3$

*prāṇāyāmam* ] *prāṇāyāmān* HRĀ HTK

### ❖ Commentary

Many manuscripts of the  $\varepsilon$ ,  $\gamma$ ,  $\zeta$  and  $\pi$  groups, as well as the *ġyotsnā* (2.1), have the plural *prāṇāyāmān* in 2.1d. The plural is possible here as it could refer to multiple repetitions of the basic alternate nostril breath control technique taught at 2.7–11, or to the different techniques of retention (*kumbhaka*) taught later in the chapter. The variation between singular and plural recurs through this chapter, and we have followed the  $\alpha_1$  readings, which make good sense. In this case, since the verse is introducing the topic of breath control, the more general sense of the singular is appropriate.

चले वाते चलं सर्वं निश्चले दृढबन्धनम् ।

योगी स्थाणुत्वमाप्नोति ततो वायुनिबन्धनात् ॥ २ ॥

When the wind is moving, everything moves [and] when it is still, [everything] is firmly fixed, so the yogi attains motionlessness through restraining the breath. (2)

niṣcale dr̥ḍhabandhanam ] niṣcale niṣcalaṃ tathā HRĀ, niṣcalaṃ niṣcale tathā YCM

❖ Commentary

In the second verse quarter we have adopted the reading *dr̥ḍhabandhanam* found in most of the  $\alpha$ ,  $\gamma$  and  $\pi$  manuscripts over that found in the source text, *niṣcalaṃ tathā*, which is also found in some  $\delta$ ,  $\eta$  and  $\pi$  manuscripts and testimonia. We thus understand it to be the result of a deliberate change by Svātmārāma.

As noted by Brahmānanda, in addition to its primary meaning of immobility, *sthāṇutvam* can also mean the state of being Śiva, for whom Sthāṇu is another name.

यावद्वायुः स्थितो देहे तावज्जीवितमुच्यते ।  
मरणं तस्य निष्क्रान्तिस्ततो वायुं निबन्धयेत् ॥ ३ ॥

As long as breath is found in the body, there is said to be life. Its leaving is death, so one should restrain the breath. (3)

मलाकुलासु नाडीषु मारुतो नैव मध्यगः ।  
कथं स्यादुन्मनीभावः कायसिद्धिः कथं भवेत् ॥ ४ ॥

When the channels are full of impurities, the breath does not go into the middle. How would the state beyond mind occur? How would perfection of the body arise? (4)

❖ Commentary

The meaning of *avirodhataḥ* ('without harm/discomfort') makes better sense in this context than *anirodhataḥ* ('without cessation'). One might try to construe *anirodhataḥ* as 'without stopping the breath,' but verse 2.7 clearly states that the breath should be held as long as possible (*yathāśakti*). According to the apparatus of the critical edition of the *Haṭharatnāvalī*, *avirodhataḥ* is well-attested for the parallel line. In addition, *avirodhataḥ* is found (and also *virodhahīnam*) in a passage of the *Haṭhatattvakaumudī* (36.6–9) that appears to have been loosely based on *Haṭhapradīpikā* 2.7–9.

प्राणं चेदिडया पिबेन्नियमितं भूयोऽन्यया रेचयेत्  
पीत्वा पिङ्गलया समीरणमलं बद्धा त्यजेद्दामया ।  
सूर्याचन्द्रमसोरनेन विधिना बिम्बद्वयं ध्यायतां  
शुद्धा नाडिगणा भवन्ति यमिनां मासत्रयादूर्ध्वतः ॥ १० ॥

If [the yogi] breathes in through Iḍā, he should then exhale the restrained [breath] through the other [channel, i.e. Piṅgalā]. He should inhale through Piṅgalā, hold the breath sufficiently long and release it through the left [channel]. The channels of ascetics meditating on the two orbs of the sun and moon using this method are purified after three months. (10)

madhyaṃdine YCM ] madhyadine HRĀ

#### ❖ Commentary

This verse is summarizing the following passage in the *Dattātreyayogaśāstra* (63cd–65ab):

एवं प्रातः समासीनः कुर्याद्विंशति कुम्भकान् ॥ ६३ ॥  
एवं मध्याह्नसमये कुर्याद्विंशति कुम्भकान् ।  
एवं सायं प्रकुर्वीत पुनर्विंशति कुम्भकान् ॥ ६४ ॥  
एवमेवार्धरात्रेऽपि कुर्याद्विंशति कुम्भकान् ।

Without reference to the *Dattātreyayogaśāstra*, the meaning of the second half of the verse is ambiguous because it could be understood as saying that the yogi should practise up to eighty retentions four times a day. In his *Jyotsnā* (2.11), Brahmananda understands it this way, and takes *śanaiḥ* to mean ‘gradually’ building up to the eighty retentions. In the parallel verses in the *Dattātreyayogaśāstra*, however, it is clear that twenty retentions are to be practised four times a day.

कनीयसि भवेत्स्वेदः कम्पो भवति मध्यमे ।

उत्तिष्ठत्युत्तमे प्राणरोधे पद्मासने मुहुः ॥ १२ ॥

In the lesser cessation of the breath sweating arises, in the middle [cessation], shaking, and in the highest [the yogi] repeatedly rises up in the lotus pose. (12)

#### ❖ Commentary

The manuscript readings diverge greatly in the second line. In the third verse quarter, all of the manuscripts have *prāṇa* in some form (instead of *deha* as found in the source text, the *Vivekamārtaṇḍa*). The  $\alpha$  manuscript, along with some of the  $\varepsilon$ ,  $\zeta$ ,  $\eta$  and  $\pi$  manuscripts, seems to state that it is *padmāsana* that rises up again and again in the highest stage of holding the breath (*uttiṣṭhaty uttame prāṇarodhe padmāsanaḥ muhuḥ*). We have adopted a similar reading but with *padmāsane* ( $\delta_1$  and  $\pi_2$ ) because it makes better sense that the yogi rises up while seated in lotus pose. Another version is seen in  $\eta_2$ , which appears to say that the breaths rise up again and again when one is seated in the lotus pose (*uttiṣṭhanty uttame prāṇā baddhe padmāsane muhuḥ*). However, the verse is about the external signs that might arise in *prāṇāyāma* rather than internal processes. Such confusion has arisen because the verse was taken from the *Vivekamārtaṇḍa* without its context, which is a classification of different levels of *prāṇāyāma*, so Svātmārāma needed to include *prāṇarodhe* meaning *prāṇāyāma* in order for the different adjectives to have something with which to agree, and he did so despite the infelicity of *prāṇarodhe* crossing the *pāda* break.

जलेन श्रमजातेन गात्रमर्दनमाचरेत् ।

दृढता लघुता चापि तेन गात्रस्य जायते ॥ १३ ॥

[The yogi] should rub the limbs with the sweat produced through exertion. As a result the body becomes firm and lithe. (13)

## ❖ Commentary

The idea that alternate nostril breathing is done to purify the channels can be found in early Śaiva tantras; see e.g. the *Nayasūtra* of the *Niśvāsātattvasaṃhitā* (4.110) and the *Svacchanda-tantra* (7.294cd–7.295ab). The latter verse is as follows:

अपसव्येन पूर्येत सव्येनैव विरेचयेत् ।  
नाडीसंशोधनं चैतन्मोक्षमार्गपथस्य च ॥

यथेष्टं धारणं वायोरनलस्य प्रदीपनम् ।

नादाभिव्यक्तिरारोग्यं जायते नाडिशोधनात् ॥ २० ॥

The ability to hold the breath as long as one desires, stimulation of the [digestive] fire, manifestation of the inner sound [and] freedom from disease occur as a result of purifying the channels. (20)

**20** *om.*  $\zeta_1\zeta_2$  **20a** *yatheṣṭam*  $\alpha_2\delta_1\delta_2\zeta_3\eta_1\eta_2\pi_1\pi_2\chi$ ] *yatheṣṭa*  $\alpha_1\gamma_1\gamma_2\varepsilon_2\pi_\omega$ , *tatheṣṭa*  $\alpha_3\varepsilon_1$  **dhā-

jāyate nāḍiśodhanāt HRĀ YBhD ] bhaven nāḍiśodhanāt YCM

❖ **Commentary**

Similar signs arising from the purification of the channels are mentioned in the *Vasiṣṭhasaṃhitā* (2.68–69) and subsequent works related to it:

नाडीशुद्धिमवाप्नोति पृथक्चिह्नोपलक्षिताम् ।

शरीरलघुता दीप्तिर्जठराग्निविवर्धनम् ॥

नादाभिव्यक्तिरित्येतच्चिह्नं तच्छुद्धिसूचकम् ।

यावदेतानि संपश्येत्तावदेवं समाचरेत् ॥

मेदःश्लेष्माधिकः पूर्वं षट्कर्माणि समाचरेत् ।

अन्यस्तु नाचरेत्तानि दोषाणां समभावतः ॥ २१ ॥

A person who has an excess of fat and phlegm should first practise the six therapeutic interventions, but anyone else, because their humours are in balance, should not practise them. (21)

#### ❖ Commentary

The reading *ukhālam* which we have adopted in the fourth *pāda* is a vernacular term for vomiting which is found in the  $\alpha$  recension but has been changed in some witnesses to more Sanskritic forms, such as *udgāram* and *prakṣālyam*.

Many manuscripts, including several of those collated (i.e.  $\eta_2$ ,  $\pi_2$  and  $\pi_\omega$ ), and the *ṣyotsnā* (2.24), add two verse quarters stating that the length of the cloth is fifteen cubits (*hastapañcadaśena tu*) and that the practice should be performed according to the guru's teachings (*gurūpadiṣṭamārgena*). These additions are absent from the  $\alpha$ ,  $\gamma$  and  $\zeta$  groups. Moreover, the compound *hastapañcadaśena* does not fit the syntax of the sentence, while the *pāda* referring to the guru's teaching is a cliché that was probably inserted as a verse filler when with the *pāda* on the length of the cloth was added.

#### ❖ Commentary

The reading *pakhālaṃ* that we have adopted in the fourth *pāda* is found in  $\alpha_2$  and  $\pi_\omega$  and is close to the reading of  $\alpha_1$ . It reflects vernacular usage as found in the old Hindi *Aṣṭāṅgayoga* of Caranādāsa (6.71ab). Some other witnesses have the Sanskritised form *prakṣālaṃ*, which is very rare in Sanskrit sources, while others have the more common *kṣālanāṃ*.

गुल्मप्लीहोदरं चापि वातपित्तकफोद्भवाः ।

❖ Commentary

We have assumed that the compound *gulmaplihodara* is referring generally to swelling (*gulma*), spleen disorders (*plihan*) and stomach diseases (*udara*), but the terms *gulma* and *plihodara* can refer to more specific diseases. In *Suśrutasamhitā*, *uttaratantra* 42.4, *gulma* is defined as a movable or immovable round lump (*granthi*) that might arise between the heart and lower abdomen (*basti*) and can grow or shrink:

हृद्वस्थोरन्तरे ग्रन्थिः संचारी यदि वाऽचलः ।  
चयापचयवान्वृत्तः स गुल्म इति कीर्तितः ॥

The compound *plihodara* is the name of a specific disease, which is defined in the *Suśrutasamhitā* (*nidānasthāna* 7.14–15) as enlargement of the spleen (*plihābhivṛddhi*) so *gulmaplihodara* might be referring more specifically to abdominal lumps and splenomegaly.

#### ❖ Commentary

In this verse and the next the  $\alpha$  witnesses read *nīti/nītiḥ* for the name of this practice. These and related terms are found in various north Indian vernaculars with meanings appropriate for a practice in which a string is pulled back and forth through the nose and mouth. In modern

कपालशोधनी चैव दिव्यदृष्टिप्रदायिनी ।

जत्रूर्ध्वजातरोगौघं जयत्याशु सती नितिः ॥ ३१ ॥

The excellent *niti* [technique] purifies the skull, bestows divine sight and quickly cures a multitude of diseases that arise above the collar-bone. (31)

colloquial Bengali, *niti* can mean the string used to spin a top and is likely to be connected with *netā/netā* which means a small piece of cloth. In modern Hindi and Gujarati *netī* means the cord of a churning stick and is cognate with Sanskrit *netra* (TURNER 1966: 427, entry 7588). In Old Hindi *netā* can have the same meaning or be a kind of silk cloth (Callewaert s.v.). In Oriya *netā* means “a kind of silk cloth worn by girls” (Praharaj s.v.). We thank Lubomír Ondračka for alerting us to several of these references.

The Hindi form of the name for this practice, *netī*, is very well established nowadays, but Svātmārāma’s original readings in this and the following verse were clearly *niti* and *niti* (vowel length was perhaps not important in the vernacular from which the name was taken). This is confirmed not just by  $\alpha$ ’s readings at 2.30d but also by 2.31d where only the short first vowel of *niti* works metrically (some witnesses have rewritten the *pāda* in order to use the spelling *netī*). We might thus surmise that, like *lauḷī*, the practice, or at least its name, was taught to Svātmārāma by Gauḍas, because it is only from Bengal that we have evidence of the use of the form *niti*.

#### ❖ Commentary

We have adopted the reading *caiva* in the first verse quarter, which is attested by manuscripts of the  $\gamma$ ,  $\delta$  and  $\pi$  groups and is easy to construe.  $\alpha_1$  and  $\alpha_2$  have *vatyā* and *kaṁṭhā* respectively, which may derive from *kaṁṭhyā* ( $\alpha_3$ ,  $\varepsilon_1$ ,  $\zeta_1$ ), but none of these readings makes sense here.  $\eta_1$

अथ त्राटकम् ।

---

and  $\eta_2$  have *kāryā*, which is unnecessary because of the main verb in the final verse quarter.

Most witnesses, including the *ḥyotsnā*, read *jatrūrdhva* in the third verse quarter, which is generally understood as ‘above the collar bones’ or, as Brahmānanda says, the area above the shoulder joints (*jatruṇoḥ skandhasandhyor ūrdhvam uparibhāge*). On problems concerning the interpretation of *jatru*, see MEULENBELD 1974: 465. We have adopted *jatrūrdhva* against the reading of  $\alpha_1$  and  $\alpha_2$ , *hanūrdhva*, ‘above the jaw’, and  $\alpha_3$ , *kaṇṭhordhva*, ‘above the throat’.

#### ❖ Commentary

The witnesses have many different readings for the first word of this verse. The  $\alpha$  manuscripts are split between *modaka* ( $\alpha_1$ ), *mocaka* ( $\alpha_2$ ) and *movana* ( $\alpha_3$ ). Of these, *modaka* is the most likely, if it is understood as a medicinal pill. However this meaning is rare, even in medical literature, as *modaka* is generally used to refer to a small sweet. We have adopted *moṭakam*, which is attested by  $\delta_2$ ,  $\epsilon_1$  and  $\eta_1$ , as well as the *Yuktabhavadēva*, and which we understand to mean “destroyer” (*muṭa pramardane*, *Dhātupāṭha* 1.346). BOHTLINGK AND ROTH (s.v.) and MONIER-WILLIAMS (s.v.) give medicinal pill as a possible meaning of *moṭaka* (cf. *modaka*) but it appears that this is mainly an inference drawn only from this verse, where the pill is merely a comparison. Several witnesses have *sphoṭanam* (‘destroying’), which is also possible.

The reading *kapāṭakam* in the second verse quarter is found in most of the witnesses and testimonia and we have adopted it accordingly. The context indicates that it means “shutter” (in the sense of shutting out something), but we have not found any parallel usages of it in this sense.

#### ❖ Commentary

We have adopted  $\alpha_1$ 's readings of *laulī* and *laulika* as the name of this practice in verses 2.34–35 and 2.22 respectively. The vast majority of manuscripts, including  $\alpha_2$ , and the most important testimonia support *naulī* or *naulīḥ* but the names *laulika* and *laulikī* do occur in some more recent works, such as the *Hathayogasamhitā* (p. 4), *Gheraṇḍasamhitā* (1.12), *Yogasārasaṅgraha* (pp. 54–55) and *Yogakarnikā* (p. 56). The root *lul*, “roll”, provides an etymology for *laulī* and the change to *naulī* can be explained by the similarity in Bengali scripts of *la* and *na* (we thank Lubomír Ondračka for this observation).

A video of Mahant Bālyogī Rām Bālak Dās performing *laulī* at Dīrghēśvar Mahādev, U.P. is available in the digital edition.

तुन्दाग्निसंदीपनपाचनादि-  
 संधायिकानन्दकरी सदैव ।  
 अशेषदोषामयशोषणी च  
 हठक्रियामौलिरियं च लौली ॥ ३५ ॥

*Laulī* brings about stimulation of the fire in the stomach, [good] digestion and so forth, always brings bliss, and makes all humoural disorders and diseases disappear. This *laulī* is the best of all Haṭha techniques. (35)

#### ❖ Commentary

Manuscripts  $\alpha_1$  and  $\alpha_2$ ,  $\varepsilon_1$ ,  $\zeta_1$  and  $\pi_2$  have *tundāgni* (or a very similar reading) in the first verse quarter. This reading is also supported by all of the manuscripts collated for the published edition of the *Haṭharatnāvalī*. The compound *tundāgni* is rare in Sanskrit literature but it was likely used here because the term *tunda* appears in the previous verse, which explains how *laulī* is done. The compound *tundāgni* is synonymous with *udarāgni*, *jaṭharāgni*, *śarīrāgni* etc., which are commonly used in yoga texts to refer to the body's digestive fire. The alternative reading *mandāgni* ('sluggish fire') is reasonably common in contexts of stimulating poor digestion, and may have been introduced early in the transmission to replace the more unusual *tundāgni*.

अथ कपालभातिः ।

भस्त्रावल्लोहकारस्य रेचपूरौ सुसंभ्रमौ ।

कपालभातिर्विख्याता कफदोषविशोषिणी ॥ ३६ ॥

Now *kapālabhāti*:

Most witnesses and the testimonia have *maulir iyaṃ* in the fourth verse quarter, which expresses the idea that *laulī* was thought to be the best of the *ṣaṭkarma*, and the assonance of *laulī* and *mauli* may have been intended. The alternative reading of *mūlam iyaṃ* in  $\zeta_1$  and  $\eta_1$  would suggest that *laulī* is necessary for the other practices, which does not seem to be the case because, according to *Haṭhapradīpikā* 2.21, the *ṣaṭkarmas* are more like therapeutic interventions.

प्राणायामं ततः कुर्यादनायासेन सिध्यति ॥ ३७ ॥

The person whose excess weight, phlegm, fat, impurities and the like have been removed by the six techniques should then perform breath-control. It is perfected without effort. (37)

**37a** *ṣaṭkarmabhir gata*  $\alpha_1 \gamma_1 \varepsilon_1 \varepsilon_2 \zeta_1 \eta_2 \pi_2 \pi_\omega$ ] *ṣaṭkoṇabhigataṃ*  $\alpha_2$ , *ṣaṭkarmanirgata*  $\alpha_3$ , *ṣaṭkarmabhir gataṃ*  $\gamma_2$ , *ṣaṭkarmanirgata*  $\delta_1 \zeta_3 \eta_1 \chi$ , *ṣaṭkarmanirata*  $\delta_2$ , *ṣaṭkarmābhigata*  $\pi_1$  **sthaulya**  $\alpha_1 \gamma_1 \delta_1 \delta_2 \varepsilon_2 \zeta_1 \zeta_3 \pi_2 \pi_\omega \chi$ ] *sthaulyaṃ*  $\alpha_2 \varepsilon_1 \eta_1 \eta_2 \pi_1$ , *sālyā*  $\alpha_3$ , *sthaulyaḥ*  $\gamma_2$  **37b** *kapha cett.*] *kaphā*  $\gamma_1$ , *kathaṃ*  $\varepsilon_1$  **medo cett.**] *doṣa*  $\alpha_2 \chi$ , *meda*  $\varepsilon_2$ , *bhedo*  $\eta_1$  **malādikaḥ**  $\alpha_1 \delta_2 \varepsilon_2 \zeta_1 \zeta_3 \pi_2 \pi_\omega \chi$ ] *malādikaṃ*  $\alpha_2 \varepsilon_1 \pi_1$ , *malādhikaḥ*  $\alpha_3 \delta_1$ , *malojhitaḥ*  $\gamma_1$ , *malojitaḥ*  $\gamma_2$ , *malādhike*  $\eta_1$ , *balādhikaḥ*  $\eta_2$  **37d** *sidhyati cett.*] *śudhyati*  $\alpha_1 \delta_1 \pi_\omega$ , *śuśyati*  $\varepsilon_2$ , *śusidhyateḥ*  $\alpha_2$

The word *bhāti* is derived from *bhastrī* (TURNER 1966: 537, entry 9424).

$\eta_2$  and other manuscripts have *kuryāt savyāpasavyataḥ* ('left and right') instead of *recapūrau sasambhramau*. Although one might infer that *savyāpasavyataḥ* is referring to performing the skull bellows breathing alternately through the left and right nostrils, it appears to be a secondary reading because there is no indication of what is moving to the left and right. Such a method of alternate nostril breathing is explained as a variation of *kapālabhāti* in the *Haṭhayogasamhitā* (p. 14):

इडया पूरयेद्वायुं रेचयेत्पिङ्गलाख्यया ।  
पिङ्गलया पूरयित्वा पुनश्चन्द्रेण रेचयेत् ।  
पूरकं रेचकं कृत्वा वेगेन न तु चालयेत् ॥

In the second verse quarter, we have adopted the reading of the  $\alpha$  manuscripts, *susambhramau* ('great speed'). The compound *susambhrama* is not attested elsewhere as an adjective, whereas the alternative reading *sasambhrama* ('fast') is commonly used. We have retained *susambhramau* because it seems grammatically possible and is also well attested by other manuscript groups.

vikṣā ] dṛṣṭir YCM YBhD

❖ Commentary

We have adopted the reading *vikṣā* in the third verse quarter, which is an emendation of α<sub>1</sub> and α<sub>2</sub>'s *vikṣed*. The verb *vikṣed* is likely an error as the other *yāvat* clauses have been written as nominal phrases. The reading *vikṣā* occurs in the same verse of the six-chapter version of the *Vivekamārtaṇḍa*, which sometimes preserves old readings of that text.

#### ❖ Commentary

The term *uḍḍiyāna* is spelt various ways among manuscripts of the *Haṭhāpradīpikā* and other texts. Generally speaking, the  $\alpha$  group have *uḍḍiyāna*,  $\pi$  *uḍḍiyāna*,  $\gamma$  and  $\delta$  *uḍḍiyāna* and the *jyotsnā uḍḍiyāna*. Other spellings, such as *uḍyāna* and *uḍiyāna*, also occur. We have adopted the spelling of  $\alpha$  except in cases where the metre of a verse requires otherwise, as in 2.45d (*uḍḍiyānakah*). As noted by SANDERSON (2007: 265), diverse spellings of the place by the same name occur, including *Uḍḍiyāna*, *Oḍḍiyāna*, *U/Oḍiyāna*, *U/Oḍyāna*, or *U/Oḍḍayana*.

#### ❖ Commentary

As is clear in the source text, the *Gorakṣaśataka*, the three techniques alluded to here are *mūla-bandha*, *jālandharabandha* and *uḍḍiyānabandha* respectively (on which see chapter three).

The stem form *brahma* is found in various compounds in the text. We understand it to refer to Brahman, the absolute, in all instances other than *brahmagranthi*, where we take it to mean the deity Brahmā. See MALLINSON 2007: 205 n. 240.

अपानमूर्ध्वमुत्थाप्य प्राणं कण्ठादधो नयेत् ।

योगी जराविमुक्तः सन् षोडशो वयसा भवेत् ॥ ४७ ॥

The yogi should raise up *apānavāyu* and lead *prāṇa* down from the throat. Freed from ageing, he becomes sixteen years old. (47)

तत्र सूर्यभेदनम् ।

आसने सुखदे योगी बद्धा वज्रासनं ततः ।

दक्षनाड्या समाकृष्य बहिःस्थं पवनं शनैः ॥ ४८ ॥

आ केशाग्रान्निखाग्रान्च निरोधावधि कुम्भयेत् ।

ततः शनैः सव्यनाड्या रेचयेत्पवनं सुधीः ॥ ४९ ॥

Of these [breath retentions], piercing the sun [is now taught]:

The yogi should sit in *vajrāsana* on a comfortable mat, then slowly draw in external air through the right nostril, and hold the breath as far as the tips of the hair and nails until cessation [of the breath]. The wise man should then exhale the breath slowly through the left nostril. (49)

## ❖ Commentary

An antecedent to the idea of *prāṇāyāma* affecting the whole body (i.e. as far as the tips of the hair and nails) occurs in the *Baudhāyanadharmasūtra* (4.1.23):

आवर्तयेत्सदा युक्तः प्राणायामान्पुनः पुनः ।  
 आ केशान्ताङ्गस्वाग्राच्च तपस्तप्यत उत्तमम् ॥

[The yogi] who is constantly engaged [in practice] should repeat breath retentions again and again. Extreme heat burns as far as the tips of the hair and nails.

The meaning of *nirodhāvadhi* is not entirely clear, but all sources and the *Jyotsnā* (2.49) agree on this reading. The original reading may well have been *virodhāvadhi*, “until it is uncomfortable”, which makes better sense but we have decided not to emend accordingly. The problem with *nirodhāvadhi* is that to practise *kumbhaka* “up to cessation (*nirodha*)” seems to suggest that cessation is not that of the physical breath, which by definition ceases in *kumbhaka*, but of the vital wind (*prāṇa*) within the body. By citing a verse from an unnamed text, Brahmānanda seems to understand this verse as saying that the breath should very carefully (*atiprayatnena*) be held as far as the extremities of the body so that it does not damage the body by exiting through the hair follicles:

हठाच्चिरुद्धः प्राणोऽयं रोमकूपेषु निःसरेत् ।  
 देहं विदारयत्येष कुष्ठादि जनयत्यपि ॥

When the breath has been stopped forcefully, it flows out through the hair follicles. This destroys the body and also causes skin diseases and the like.

❖ Commentary

Both *doṣaham* and *doṣahr̥t* are well attested and possible. We have favoured the former because the α reading (*doṣajam*) appears to be a corruption of it, and *ha* is from the same root as the verb in the source text (i.e. *niḥanti*).

❖ Commentary

The use of *lagati* without a locative or direct object (as found in the source text, the *Gorakṣa-śataka*) is supported by the paraphrase of the verse in the *Haṭhatattvakaumudī* (10.7). Most witnesses (including  $\alpha$ ) have the phrase *kaṇṭhāt tu hṛdayāvadhi*, which we have understood to have the sense of a locative as it specifies the place within the body where the contact occurs.

## ❖ Commentary

Nearly all the manuscripts have *nāḍījalodarādhātu*, which is difficult to understand because of *jala* ('water') in this context and *ā+dhātu* within the compound. This reading is also present in the transmission of the source text for the verse, the *Gorakṣaśataka*, and most of the testimonia. Given the strength of the evidence, we have adopted the reading and understood it as a list of things in which diseases (*doṣa*) may occur. This is consistent with Brahmānanda's explanation (*Jyotsnā* 2.53). He explains *ā+dhātu* as *samantāt ... dhātavaḥ* ('the bodily constituents altogether').

Two later sources attempt to solve these problems. Some of the manuscripts of the *Haṭharatnāvalī* read *nāḍījālo* ('in the network of channels'), which makes better sense than *nāḍījalo*, as *jala* usually means water rather than bodily fluid. Brahmānanda understands *jala* as water that has been drunk (*pitam udakam*), which seems far-fetched as the site of a disease. Two old manuscripts have *dare dhātu*, which avoids the need to read *darādhātu*. If one were to conjecture *nāḍījalodare*, the line would mean, 'it cures diseases of the bodily constituents inside the network of channels.'

For the idea of *doṣas* being in *dhātus* see *Tantrāloka* 28.283cd, where Abhinavagupta says that worldly concepts arise as a result (*dhātudoṣāc ca saṃsārasaṃskārās te ...*). In the *Īśvara-pratyabhijñāvimarśinī* Abhinavagupta notes that they are also the source of physical disorders (2.15 *dhātudoṣakṛtaṃ mūrccā*).

The name *ujjāyī* may be a Prakrit form of *uddhmāyī* from the verb *ud-dhmā*, 'to blow out'. We thank Diwakar Acharya for this suggestion.

#### ❖ Commentary

There is division between *śītkām* and *sītkām* in all the manuscript groups of the *Haṭhpradīpikā* (note that the likely reading in the source texts was *hikkām*). The result of becoming a second god of love may be connected with the sound *sīt*, which is said to be made during sex in the *Kāmasūtra* (2.7.4–19).

This verse's source texts are from Kaula tantric milieus and this is reflected in the result of becoming one with the circle of yoginīs mentioned in the next verse.

❖ Commentary

The aiśa compound *bhuvimaṇḍale*, which is attested at *Mañjuśrīmūlakalpa* 45.221, is likely the original reading here. The alternative *bhūmi* is well-attested and so the change may have happened early in the transmission.

एवमेव उक्तं च ।

रसनातालुमूलेन यः प्राणं सततं पिबेत् ।

अब्दार्धेन भवेत्तस्य सर्वरोगपरिक्षयः ॥ ५७ ॥

And the very same has been taught [as follows]:

He who continuously takes in the breath through the tongue and the root of the palate has all his diseases cured in half a year. (57)

#### ❖ Commentary

The compound *rasanātālumūlena* is difficult to understand. In his *Haṭhasaṅketacandrikā* (f. 79r–79v), Sundaradeva says that the external air strikes the root of the tongue and palate and the upper part of the uvula (*atra muhū (mūhū codex) rasanātālumūlāhataṃ ghaṇṭikordhva-bhāgāhataṃ bahiṣṭhavaṃ vidhāya pibed ity arthaḥ*). More helpful are the remarks of the commentator of the *Yogatarāṅgiṇī* (2.39). He says that a hole or cavity (*vivara*) is made by the root of the palate with the help of the tongue. The yogi breathes through it (*evam rasanātālumūlena rasanā jihvā tatsahāyabhūtātālumūlena kṛtaṃ yad vivaraṃ, tena kṛtvā*

अथ शीतली ।

जिह्वया वायुमाकृष्य पूर्ववत्कुम्भनादनु ।

शनैस्तु घ्राणरन्ध्राभ्यां रेचयेदनिलं सुधीः ॥ ५८ ॥

Now *śitalī*:

The wise man should draw in air through the tongue and after retaining the breath as before gradually exhale through the nostrils.  
(58)

**prescript:** *atha śitalī cett.*] *atha śitalā*  $\alpha_2$ , *śitalī*  $\gamma_1 \gamma_2$ , *om.*  $\delta_1$ , *atha śitalipadmam*  $\epsilon_2$ , *tathā śitalī*  $\eta_2$  **58a** *jihvayā cett.*] *jihvāyā*  $\alpha_2$ , *jihvāyām*  $\alpha_3$ , *jihvā*  $\eta_1$  **58b** *pūrvavat cett.*] *pūrve*  $\epsilon$   $\alpha_2$ , *pūrayan*  $\epsilon_2$ , *pūrvaṃ*  $\epsilon$   $\eta_2$  **kumbhanād anu**  $\alpha_1 \epsilon_1 \epsilon_2 \pi_1$ ] *kumbhanād agu*  $\alpha_2$ , *kumbhayet tataḥ*  $\alpha_3$ , *kumbhakādane*  $\gamma_1$ , *kumbhakād anu*  $\gamma_2 \delta_1 \delta_2 \zeta_1 \zeta_3 \pi_2$ , *kumbhasāadhanam*  $\eta_1 \eta_2 \pi_\omega \chi$  **58c** *śanaistu cett.*] *śanaih su*  $\zeta_3$ , *śanakair*  $\chi$  **ghrāṇa cett.**] *prāṇa*  $\eta_2$  **58d** *anilaṃ cett.*] *pavanam*  $\chi$  **sudhiḥ**  $\gamma_2 \delta_1 \delta_2 \epsilon_1 \epsilon_2 \pi_2 \chi$ ] *sudhī*  $\alpha_1 \alpha_2 \gamma_1 \pi_1 \pi_\omega$ , *śanaih*  $\alpha_3 \zeta_1 \eta_1 \eta_2$ , *tataḥ*  $\zeta_3$

*yaḥ yogī prāṇam anilaṃ prāṇavāyuyam pibet pūrayet, tasya yogino 'bdārdhena śaṇmāsena sarvarogāṇām nāśaḥ kṣayo bhavet/).*

The idea of breathing through a hole between the root of the palate and tongue might have been intended by the parallel reading of the *Yogacintāmaṇi*: *rasanātāluyogena* ('by joining the tongue and palate'). We have thus translated *rasanātālumūlena* as 'through the tongue and root of the palate'. It could also imply that the tongue is turned up and back to touch the root of the palate to make a hole that one breathes through (when the breath is taken in through the mouth). The *Kumbhakaṇṭha* (137ab) states this more clearly:

रसनानुस्खीकृत्य सीत्कारं कुर्वता मरुत् ।

[The yogi] turns the tongue upwards and takes in the breath while making a *śīt* sound.

A similar practice is also described in *Śivasamhitā* 3.80:

रसनां तालुमूले यः स्थापयित्वा विपश्चितः ।

पिबेत्प्राणानिलं तस्य रोगाणां संक्षयो भवेत् ॥

When the wise [yogi] places the tongue at the root of the palate and takes in the Prāṇa breath, his diseases are cured.

#### ❖ Commentary

An antecedent to a cooling practice involving the tongue can be found in the *Kaulajñānanirṇaya* (6.23–24), which mentions a point between the two front teeth that is cool to touch with the tongue:

द्वौ राजदन्तमध्यस्थं बिन्दुरूपं व्यवस्थितम् ।

अथ भस्त्रिका ।

ऊर्वोरुपरि चेद्धत्ते उभे पादतले तथा ।

पद्मासनं भवेत्सम्यक् सर्वपापप्रणाशनम् ॥ ६० ॥

Now *bhastrikā*:

If [the yogi] places the soles of both feet on the thighs, the lotus pose, which destroys all bad deeds, duly arises. (60)

#### ❖ Commentary

Apart from  $\alpha_1$ , the reading *śvasanam* is not well attested. We have adopted it because it provides a plausible subject for the verb *lagati* (i.e. ‘breath comes into contact with’). Most manuscripts, as well as the *Īyotsnā*, have *sasvanam* (‘with sound’), which requires that one infer that the breath is the subject.

#### ❖ Commentary

Only three of the collated witnesses ( $\gamma_2$ ,  $\zeta_3$  and  $\delta_2$ ) have *madhyātarjanibhyāṃ* (‘with the middle and index fingers’) and this reading is not well attested by the manuscripts of the source text and testimonia. To hold the nose without the middle and index fingers is consistent with the way alternate nostril breathing is done in modern yoga (e.g. Iyengar 1991: 443–444) as well as in some ritual manuals, as for instance in Sāhib Kaula’s *Śyāmāpaddhati: dakṣānāmākaniṣṭhābhyāṃ vāmaṃ puṭaṃ ca niruddhya* (see Hanneder: forthcoming). However, the reading of many manuscripts suggests that the nose was held by all the fingers of both hands, except the index fingers (*nāsikāmadhye tarjanibhyāṃ vinā*), which seems highly impracticable, or that the nose was held by only the index fingers of both hands (*nāsikāmadhye tarjanibhyāṃ tathā*). It is likely that scribes changed *madhyātarjanibhyāṃ* to *madhye tarjanibhyāṃ* or *madhyaṃ tarjanibhyāṃ* because of the *pāda* break.

#### ❖ Commentary

In the first verse quarter, we have adopted *vakra* ( $\varepsilon_1$ ), which is close to the reading of the  $\alpha$  group (i.e. *cakram*). In compound with *bhāvaghnam* ( $\alpha_1$ ,  $\alpha_3$  etc.) and following the awakening of Kuṇḍalinī, *vakra* makes good sense. According to the manuscripts available to us, the reading of the *Goraḥśaśataka* (*vajram*) is not in the transmission of the *Haṭhapradīpikā*.

गुणत्रयसमुद्भूतग्रन्थित्रयविभेदकम् ।

विशेषणैव कर्तव्यं भस्त्राख्यं कुम्भकं त्विदम् ॥ ६८ ॥

[...and] pierces the three knots that have arisen from the three *guṇas*, it is particularly important to perform this retention called ‘the bellows’ (*bhastrā*). (68)

❖ Commentary

In the first verse quarter, nearly all of the manuscripts, including the  $\alpha$  group, have *gātrasamudbhūta* or *gātrasamudbhūtaṃ* (‘arisen in the limbs/body’). Both are rather meaningless here. In the first case, the three knots are in the central channel rather than the body. In the second case, it is redundant to say that the breath retention has arisen in the body. It is possible that *samyaggātra* is a corruption of *guṇatraya*, which is attested by the manuscripts of the source text, the *Gorakṣaśataka*, two of the available manuscripts of the *Haṭhapradīpikā* (N<sub>21</sub>, Bo<sub>1</sub>) and the *Haṭhasaṅketacandrikā*. In the *Gorakṣaśataka*, it is stated clearly that each of the knots arises from one of the three *guṇas*: *brahmagranthi* from *rajas* (78cd), *viṣṇugranthi* from *sattva* (79cd) and *rudragranthi* from *tamas* (80cd). With the verses on *bhastrā* from the *Gorakṣaśataka* having been extracted without the context of the knots and *guṇas*, the meaning of *guṇatrayasamudbhūtagranthitraya* (‘the three knots that have arisen from the three *guṇas*’) appears to have been forgotten early in the transmission of the *Haṭhapradīpikā* and the compound altered as a result. Alternatively it could be that Svātmārāma deliberately changed the compound in order to remove the reference to the *granthis* being produced from the *guṇas*.

अथ मूर्च्छा ।

पूरकान्ते गाढतरं बद्धा जालन्धरं शनैः ।

रेचयेन्मूर्च्छनाख्येयं मनोमूर्च्छा सुखप्रदा ॥ ७० ॥

Now *mūrchā*:

At the end of inhalation [the yogi] should tightly apply the *jālan-dhara* [lock] and exhale slowly. This loss of consciousness, which is called *mūrchanā*, gives pleasure. (70)

---

**prescript:** *om.*  $\delta_1$  **mūrchā**  $\alpha_1 \gamma_1 \gamma_2 \delta_2 \varepsilon_1 \pi_1 \pi_2 \pi_\omega \chi$ ] *bhramarī*(!)  $\alpha_2$ , *mūrchanākumbhakaṃ*  $\zeta_1 \eta_1 \eta_2$ , *mūrchākumbhakaḥ*  $\zeta_3$  **70** *om.*  $\zeta_1 \zeta_2$  **70a** *gāḍhataraṃ*  $\gamma_1 \gamma_2 \delta_1 \varepsilon_2 \zeta_3 \eta_1 \chi$ ] *bāṃḍhataraṃ*  $\alpha_1$ , *gā-ṭhataraṃ*  $\alpha_2$ , *bāḍhataraṃ*  $\alpha_3 \varepsilon_1$ , *ḍṛḍhataraṃ*  $\delta_2$ , *bahutaraṃ*  $\eta_2 \pi_\omega$ , *ḍṛḍhaṃ badhvā*  $\pi_1$ , *ghaṭataraṃ*  $\pi_2$  **70b** *baddhvā cett.*] *bāṃḍho*  $\delta_1 \delta_2$ , *bāṃḍhaṃ*  $\pi_1$  **jālandharaṃ cett.**] *jālāṃdharaṃ*  $\alpha_1 \alpha_2 \pi_1$ , *jālāṃdhare*  $\gamma_1$ , *jālāṃdharah*  $\delta_1 \delta_2$  **70c** *’khyeyam*  $\alpha_1 \gamma_1 \gamma_2 \delta_2 \zeta_3 \pi_1 \pi_2 \pi_\omega \chi$ ] *kṣeyam*  $\alpha_2$ , *khyo’yam*  $\alpha_3 \delta_1 \varepsilon_1 \eta_1$ , *stho’yam*  $\eta_2$  **70d** *mano cett.*] *mahā*  $\varepsilon_1$  **pradā**  $\alpha_1 \alpha_2 \gamma_2 \delta_1 \delta_2 \zeta_3 \pi_1 \pi_2 \chi$ ] *pradaḥ*  $\alpha_3 \varepsilon_1 \eta_2 \pi_\omega$ , *prajā*  $\gamma_1$ , *pradaṃ*  $\eta_1$

---

In the first two *pādas* we are understanding the usually masculine *pūraka* and *recaka* to be neuter nominatives. When explaining this verse, Brahmananda (*Jyotsnā* 2.68) supplies the gerund *krtvā* with *pūrakaṃ* and *kuryāt* with *recakaṃ*, but it is unlikely that the author of the verse intended this.

The compound *vegodghoṣaṃ* is rather unusual. We have understood it according to the commentator Bālakṛṣṇa’s gloss: ‘an inhalation in which sound is produced by force’ (*vegena sañjāta udghoṣo yasmin pūrake*).

Witnesses of the  $\gamma$  and  $\delta$  branches of the stemma, and Brahmananda, have *ānandalilā* instead of *ānandamūrchā*, perhaps in order to avoid the repetition of *mūrchā*, which is also found in the following verse.

#### ❖ Commentary

Although the important manuscript groups, including  $\alpha$ , have this verse on *plāvanī* (sometimes spelt *plāvinī*), there is substantial evidence to suggest that *plāvanī* was incorporated into the *Haṭhapradīpikā* and its group of eight breath retentions (*kumbhaka*) sometime after the text was initially composed. Firstly, in most manuscript groups, the name *plāvanī* is absent from the list of *kumbhakas* in 2.44. The better-attested reading, supported by  $\alpha$ , includes *kevala* as the eighth *kumbhaka* and omits *plāvanī*. Furthermore, most of the principal testimonia, namely the *Haṭharatnāvalī*, *Yogalakṣaṇāvalī* and *Yuktabhavadeva*, likewise include *kevalakumbhaka* and omit *plāvanī* in the list of eight *kumbhakas*. Secondly, the heading *atha plāvanī* is absent from the  $\alpha$  group and many other manuscripts. Instead, the  $\alpha$  manuscripts have *iti plāvanīkumbhakaṃ* after the verse on *plāvanī*, which is not consistent with the other *kumbhaka* descriptions. Thus, *plāvanī* was probably not part of the text composed by Svātmārāma and was introduced at an early stage in the transmission of the *Haṭhapradīpikā*.

We have understood *udgāramāruta* to refer to the breath of eructation, i.e. the *nāga* breath as described in e.g. *Vivekamārtaṇḍa* 36.

अथ केवलकुम्भकम् ।

प्राणायामस्त्रिधा प्रोक्तो रेचपूरककुम्भकैः ।

सहितः केवलश्चेति कुम्भको द्विविधो मतः ॥ ७२ ॥

Now *kevalakumbhaka*:

Breath control is said to be threefold, with exhalation, inhalation, and retention. Retention is considered to be twofold: *sahita* and *kevala*. (72)

❖ Commentary

The import of the name *sahita*, “accompanied”, is that *kumbhaka* is accompanied by inhalation and exhalation, and of *kevala*, “isolated”, that it is not.

रेच्य चापूर्य यः कार्यः स वै सहितकुम्भकः ।

यावत्केवलसिद्धिः स्यात्तावत्सहितमभ्यसेत् ॥ ७३ ॥

The [breath retention] which is done with exhalation and inhalation is the *sahita* [breath retention]. [The yogi] should practice *sahita* until *kevala* is perfected. (73)

#### ❖ Commentary

In the first *pāda*, we have adopted a reading similar to that of the *Vasiṣṭhasaṃhitā*, which is very close to that of  $\delta_1$  (*ārecyāpūrya yat kuryāt*) and  $\delta_3$  (*ārecyāpūrya yaḥ kuryāt*) and similar to  $\alpha_2$ 's hypometrical reading (*recapūrya y[a]t kāryaḥ*). It appears that the relative pronoun dropped out of the first verse quarter early in the transmission of the *Hāṭhpradīpikā* and scribes have tried in various ways to restore some sense, with several emending to *recakaḥ pūraḥ kāryaḥ*. Cf. MARCINOWSKA-ROSÓL & SELLMER 2021, p. 102f.

रेचकं पूरकं मुक्त्वा सुखं यद्वायुधारणम् ।  
प्राणायामोऽयमित्युक्तः स वै केवलकुम्भकः ॥ ७४ ॥

Holding the breath comfortably without exhalation and inhalation is *kevalakumbhaka*. This is said to be [the true] breath control. (74)

केवले कुम्भके सिद्धे रेचपूरकवर्जिते ।  
न तस्य दुर्लभं किञ्चित्त्रिषु लोकेषु विद्यते ॥ ७५ ॥

When breath retention is mastered on its own, without exhalation and inhalation, nothing in the three worlds is impossible for [the yogi]. (75)

nirāśrayam HTK ] nirāmayam YBhD

rājayogapadam vrajat YBhD ] rājayogam labhet punaḥ HTK

#### ❖ Commentary

The reading *kumbhitaḥ*, which is attested by α<sub>1</sub> and the testimonia, does not make sense here because the subject must be the yogi (*prānaḥ* would be unmetrical). In other texts, the word *kumbhita* is used to qualify the breath and means ‘retained’ (e.g. *Yogabīja* 94, *Kumbhakapaddhati* 127, *Yuktabhavadēva* 8.32 etc.).

[2.79]
