सशैलवनधात्रीणां यथाधारोऽहिनायकः ।

सर्वेषां योगतन्त्राणां तथाधारो हि कुण्डली ॥ १ ॥

Just as the lord of snakes is the foundation of the regions of the earth along with their mountains and forests, so Kuṇḍalinī is the foundation of all systems of yoga. (1)

❖ **Commentary**

The plural *dhātrīṇām* is hard to construe. Only this world has mountains and forests, but we want a plural for the comparison with *tantrāṇām*. Brahmānanda (*Jyotsnā* 3.1) understands *dhātrīṇām* to refer to the different regions of the earth, even though the world (*dhātṛī*) is a single entity (*dhātryā ekatve 'pi deśabhedād bhedaṁ ādāya bahuvacanam*). A similar comment occurs in the *Yogaprakāśikā* 5.1 (*yathā samastadvīpādisahitapṛthvī ādhāraḥ phaṇīndras tathā samastayogādhāraḥ kuṇḍalīty āha saśaileti*). The author of the *Haṭharatnāvalī* circumvented this issue by adopting the reading *dhātryāḥ*.

❖ Commentary

The reading of *α idaṃ mudrādi*, is not attested by the other manuscript groups but it makes sense in so far as ‘locks’ (*bandha*) and ‘actions’ (*karāṇa*) figure among the ten techniques taught in this chapter. It is also consistent with the reference to *mudrādi* in 1.55. However, most manuscripts have readings, such as *idaṃ hi mudrādaśakam*, that refer to the techniques of this chapter as only *mudrās*, and this is consistent with 3.104.

The instruction to hold the breath upwards (*ūrdhvataḥ*) is somewhat vague. In a commentarial passage on this verse in *Yuktabhavadēva* 7.187, Bhavadēvamiśra clarifies this by saying, ‘one should hold it higher than the heart’ (*hrdayād ūrdhvato dhārayet*).

❖ Commentary

This verse is taken from the *Amarauḡha*, which uses the alchemical imagery of the *Amṛtasiddhi* to describe the stilling of Kuṇḍalinī in the central channel. Drawing on HELLWIG 2009: 238–240, MALLINSON AND SZÁNTÓ (2021: 21) note that “In alchemical texts *māraṇa* (“killing”) involves heating a substance and thereby changing its state, usually through calcination or oxidation, so that it becomes inert. In the *Amṛtasiddhi* *māraṇa* and other derivatives of the root *mṛ*, “die”, are used to denote the stilling or stopping of either the breath or Bindu.” Thus when Kuṇḍalinī is said to be in the state of *marāṇa* the meaning is that she is stilled. The *dvipuṭa* or “vessel with two halves” in which this occurs is the same as the *Amṛtasiddhi*’s *saṃpuṭa*, which, drawing on HELLWIG (2009: 342), MALLINSON AND SZÁNTÓ (2021: 22) say “consists of two *puṭas* joined together to form a sealed crucible for heating reagents without evaporation”. In the yoga of the *Amṛtasiddhi*, the bodily *saṃpuṭa* is formed by applying locks at the top and bottom of the central channel, i.e. constricting the perineal region and the throat. In the *Haṭhapradīpikā* it is formed by pressing the perineum with the heel and constricting the throat.

As BIRCH (2019: 971) notes, it is unlikely that later non-Buddhist authors understood *marañāvasthā* and *dvipuṭa* according to the alchemical metaphors of the *Amṛtasiddhi*. Later commentators take *dvipuṭa* as the two nostrils (e.g., *Yuktabhavadeva* 7.187, *dvinaśāpuṭa*); the *iḍā* and *piṅgalā* channels (e.g., *Jyotsnā* 3.27, *puṭayor dvayam iḍāpiṅgalayor yugmam*); or the in and out flows of the breath (e.g., *Yogaprakāśikā* 5.16–17, *vāyor bahirnirgamanam antaḥpraveśa iti yat puṭadvayam tam*). How these commentators understood *asau marañāvasthā* is less clear. Brahmānanda seems to take it as the death of *prāṇa*, or in other words, the absence of the breath, in the two nostrils (*marañāvasthā jāyate kuṇḍalibodhe sati suṣumnāyām praviṣṭe prāṇe dvayor puṭayor prāṇaviyogāt*). Bhavadeva thought that Kuṇḍalinī, along with *prāṇa* and *apāna*, remains in the two nostrils while the breath is being held (*evam vāyudhāraṇāyām kriyamāṇāyām vyākulā bhūtā kuṇḍalinī apānaprāṇābhyām saha nāśāpuṭadvayāśrītā bhavati*). Others, such as Śivānanda and Bālakṛṣṇa, favour the reading *tadā sā marañāvasthām harate dvipuṭāśrītām* (or *dvipuṭāśrayām*), which is present in group γ and δ manuscripts of the *Haṭhapradīpikā*. Bālakṛṣṇa understands this to mean that the great seal destroys death (*marañāvasthām harate mahāmudreti bhāvah*) but it could also mean that the awakened Kuṇḍalinī destroys death, which is usually dependent on the in and out breaths.

The form *rjvībhūtā* is non-Pāṇinian (it should be *rjūbhūtā*) but all witnesses have *rjvī* or variants thereof. α₁ has *rjvī bhūtvā* which is correct morphologically, but it does not make sense with *bhavet* in the next *pāda* and may be an attempt at correction by the scribe.

[The yogi] should then exhale very slowly, not quickly. This is the great seal revealed by the great Siddhas. (13)

❖ Commentary

The terms *candrāṅga* and *sūryāṅga* are unusual and not used in other yoga texts outside the context of *mahāmudrā*. In *Jyotsnā* 3.15, Brahmananda glosses *candrāṅga* as *vāmāṅga* ('the left side of the body') and *sūryāṅga* as *dakṣāṅga* ('the right side of the body') and goes on to explain the sequence of practice as follows:

अत्रायं क्रमः । आकुञ्चितवामपादपाणिं योनिस्थाने संयोज्य प्रसारितदक्षिणपादाङ्गुष्ठमाकुञ्चिततर्जनीभ्यां गृहीत्वाभ्यासो वामाङ्गेऽभ्यासः । अस्मिन्नभ्यासे पूरितो वायुर्वामाङ्गे तिष्ठति । आकुञ्चितदक्षपादपाणिं योनिस्थाने संयोज्य प्रसारितवामपादाङ्गुष्ठमाकुञ्चिततर्जनीभ्यां गृहीत्वाभ्यासो दक्षाङ्गेऽभ्यासः । अस्मिन्नभ्यासे पूरितो वायुर्दक्षाङ्गे तिष्ठति ।

This is the sequence in the [practice]. Joining the heel of the bent left leg with the region of the perineum and holding the big toe of the extended right leg with index fingers curled [around it] is the practice, that is, the practice on the left side of the body (*vāmāṅga*). In this practice, the inhaled breath remains on the left side of the body. ❖ Commentary

Two readings of the second quarter are well-attested: *jarāmṛtyuvinaśinī* (α_1 etc.) and *mahāsiddhikarī nṛṇām* (α_3 etc.). While the first reading is possible, the play on *mahāsiddhi* and *mahāmudrā* seems more likely original, as seen in the source text, the *Vivekamārtaṇḍa* (without significant variants).

In *Jyotsnā* 3.18, Brahmananda understands *mahāsiddhi* as referring to ‘great *siddhis*,’ but in other works it can mean liberation (MALLINSON 2012b).

19 3.19c–3.20d are omitted in π_1 and $\zeta_2 \zeta_3$, probably due to an eye-skip caused by *niyojayet* in 3.19b and 3.20d. In the latter manuscripts, however, the lines are inserted after 3.21*2ab. It seems that they were supplied from a manuscript of the α or δ group, as they are followed by 3.21 in ζ_2 .

❖ Commentary

The seated position for *mahābandha* described in this verse is not in the *Amṛtasiddhi* (chapter 12) or *Amarauḡha* (25cd–27). The *Amṛtasiddhi* instructs the same position for *mahāmudrā* and *mahābandha*, and the *Amarauḡha* does not comment on the posture of *mahābandha*, implying that its posture is the same as *mahāmudrā*.

❖ Commentary

The referent of *madhye* is uncertain. The verse is derived from the *Amaraugha*, and the *Amṛta-siddhi* makes no mention of a place to focus the mind in its treatment of *mahābandha* (it does however instruct the yogi to place the mind at the *catuspatha* in its teachings on *mahāmudrā*). Bhavadevamiśra (*Yuktabhavadēva* 7.196), Brahmananda (*Jyotsnā* 3.20) and Bālakṛṣṇa (*Yogamārgapradīpa* 5.24) take it to mean the central channel. It could also plausibly mean the region between the chest and perineum, or perhaps the place between the eyebrows. At 3.23 this practice is said to make the mind reach Kedāra, which is sometimes located between the eyebrows (see MALLINSON 2007: 214 n. 285; BIRCH 2019: 967 n. 57).

❖ Commentary

This portion of the description of *mahābandha* has undergone various revisions in the manuscript groups. The shortest version appears in α_1 , α_2 and α_3 , as well as the δ group and the *Haṭharatnāvalī*, all of which omit verses 3.21*2 and 3.22*1cd. We have adopted the α version, as it seems that 3.21–22 were reworked in a major redaction of the whole work (for further discussion, see the introduction p. 75).

❖ Commentary

This verse expresses an alternative to the application of the chin lock in *mahābandha* mentioned in 3.20. It is found in all groups except α_1 and α_2 , and the δ group.

We do not find the idea of lifting up the *rājadantabīla* with the tongue in other works, but *Vivekamārtaṇḍa* 126ab instructs the yogi to press it with the tip of the tongue and *Dattātreyayogaśāstra* 36 (found at *Haṭhapradīpikā* 1.46) instructs the yogi in *padmāsana* to lift up the ‘root of the uvula’ (*rājadantamūla*) with the tongue.

This verse occurs in the *Yogacintāmaṇi* in the middle of a quotation attributed to Īśvara. The other verses of the quoted passage are found in the *Śivasamhitā* (4.37–42), but the verse in question is not reported in the critical edition of the *Śivasamhitā* (2009). The verse is absent in another passage on *mahābandha* that the author of the *Yogacintāmaṇi* cites and attributes to the *Haṭhapradīpikā*.

❖ Commentary

The reading *ūrdhvaṃgativibodhakāḥ* (‘initiates an upward flow’) is found in the source (*Amaraugha* 25) and all *Haṭhapradīpikā* witnesses except the *Jyotsnā* (where the line is found earlier). While the *Amaraughaprabodha* has the reading *ūrdhvaṃgativīśodhanāḥ* (‘purification of the upward flow’), the *Amṛtasiddhi* (12.14) states that the chin-lock prevents the upward flow (*ūrdhvaṃgatinirodhakāḥ*) in all the channels. The *Amaraugha* is referring to the idea (likely accepted by Svātmārāma) that the root lock creates an upward flow in all the channels that prevents the elements and essences of the body from escaping (cf. *Amṛtasiddhi* 12.8–10).

Trivenī and Kedāra are pilgrimage sites, the former at Prayāga where the Gaṅgā, Yamunā and subtle Sarasvatī meet, the latter in the Himālaya, near the source of the Gaṅgā. The bodily *trivenī* is located in the navel or heart by earlier Śaiva works (BIRCH 2019: 967). Here it may be the same as the *trikūṭa* and located between the eyebrows (MALLINSON 2007: 209 n. 259). Brahmānanda, who does not identify a location for Trivenī, understands Kedāra to be between the eyebrows. In the *Khecarīvidyā* it is located on the back of the head above the nape of the neck (MALLINSON 2007: 214 n. 285). For other references on the location of Kedāra, see BIRCH 2019: 967 n. 57.

❖ Commentary

We are not certain of the meaning here of *nibhṛtam*, which is found in all of the collated witnesses and important testimonia. We have understood it as an adverb with the meaning ‘firmly’ rather than the more usual but here inappropriate ‘secretly’. In the *ḥyotsnā* (3.26), Brahmananda glosses it as *nīscalām* (‘immovably’).

❖ Commentary

The α, γ and other groups have *sambandhāj*, which is possible but somewhat awkward (i.e. ‘because of the union of the moon, sun and fire, the state of a dead person, which has arisen, leads to immortality’). The adopted reading *sambandho*, which is supported by ζ₂, *Yuktabhavadēva* 7.200 and *Jyotsnā* 3.28, makes better sense but its meaning is not as clear as the formulation in the source text (i.e. *Amarauḥa* 30: ‘*sambandham jānīyād amṛtāya*’).

The compound *mṛtāvasthā* (‘the dead state’) refers both to a dead person (in the sense that the yogi appears as if dead) and the dead state of the breath when the moon, sun and fire have united. For the alchemical metaphor of *mṛtāvasthā* (cf. *maranāvasthā*), see the commentary on 3.12.

In the version found in *Jyotsnā* 3.28 and ζ₃, η₁, η₂ and the *Yuktabhavadēva*, the final verse quarter has been rewritten to say that the yogi then exhales the breath (*tato vāyumu virecayet*). This implies that *mṛtāvasthā* is a breath retention (*kumbhaka*), which is apparent in Brahmananda’s explanation:

मृतस्य प्राणवियुक्तस्यावस्था मृतावस्था समुत्पन्ना भवति, इडापिङ्गलयोः प्राणसञ्चाराभावात् । ततस्तदनन्तरं वायुं विरेचयेन्नासिकापुटाम्भ्यां शनैस्त्यजेत् ।

महावेधोऽयमभ्यासान्महासिद्धिप्रदायकः ।

वलीपलितवेपघ्नः सेव्यते साधकोत्तमैः ॥ २८ ॥

Through practice, this great piercing bestows the great *siddhi* [and] cures wrinkles, grey hair, and trembling. It is used by the best practitioners. (28)

The state of death that has arisen is the state of one who has died, [that is,] of one who is devoid of the breath because of the absence of movement of *prāṇa* in the *idā* and *piṅgalā* channels. Then, immediately after that [state], [the yogi] exhales the breath, [that is,] he gradually releases it through the nostrils.

❖ **Commentary**

In the third verse quarter, the reading *vedhaghnaḥ* ('cures wounds?') found in α and the other groups, with the exception of δ (*vegaghnaḥ*), is odd as it does not seem related to the other two symptoms of old age (i.e. wrinkles and grey hair) that this *mudrā* can cure. Adopting Brahmananda's otherwise unattested reading, we have understood *vedhaghnaḥ* to be a mistake for *vepaghnaḥ*, 'cures trembling', which occurs in some manuscripts in the δ_ω (J₁, J₃, N₁₆, N₁₈) and π (N₁₂ contaminated) and ζ (J₁₄ contaminated) groups, as well as the *Yogacintāmaṇi*, *Yuktabhavadēva*, and *Jyotsnā*. The mistake likely arose from the similarity of *dha* and *pa* in Nagari scripts.

Now, the sky-roving [seal] (*khecarī*):

By cutting, moving, and milking, [the yogi] should gradually lengthen the tongue until it touches the middle of the brows. Then the sky-roving [seal] is perfected. (32)

❖ Commentary

Various versions of this verse have been transmitted in *upagīti* (γ , δ), *gīti* (ε), *āryā* (η_2) and *anuṣṭubh* (π_ω) metres. We have adopted a version close to α_2 , which has a slight metrical fault:

छेदनचालनं दोहैः कला क्रमेण प्रवर्धयेत्तावत् ।

सा यावद्भूमध्यं विसति तदानीं खेचरीसिद्धिः ॥

The emendation of *tadānīm* to *tadā* renders the verse an *āryā*. The word *krameṇa* is well attested by manuscripts of the α , ζ , η and π groups, which all have unmetrical or corrupted versions.

It is possible that this verse was originally composed in the *upagīti* metre, as three other verses in the *Haṭhapradīpikā* (i.e. 1.60, 4.51 and 4.55), likely composed by the author, are in this metre. If this were the case, the verse may have read *kramād vardhayet*, which would scan correctly as *upagīti*. However, this reading is not attested by the manuscripts or testimonia that we have consulted.

The meaning of *kalā* as ‘tongue’ is not attested in any Sanskrit dictionary but *kalā* occurs in the sense of the tongue in a subsequent verse of this chapter (cf. 3.34a) and it is glossed by Brahmānanda with *jihvā* in *Jyotsnā* 3.33 and 3.37.

❖ Commentary

The third quarter of this verse has been subjected to much rewriting. Most of the collated manuscripts, including α_2 (α_1 is illegible here and α_3 is missing this verse quarter), have the reading *haṭhāt śaktyā*. This reading only makes sense if one infers that *śaktyā* is referring to *khecarīmudrā*, so that the second line means 'blocked by *yonimudrā*, semen goes up forcefully by the power [of *khecarīmudrā*].' The reading *hi tacchaktyā* of δ_2 (and the *Yogacintāmaṇi*), appears to be an attempt to render more clearly the meaning 'by the power of *khecarī*.' Such an interpretation suggests that *yonimudrā* blocks *bindu*'s downward course and *khecarī* causes it to go upwards forcefully.

The oldest manuscript of the *Vivekamārtaṇḍa* (ms. no. 4110) has *hataḥ śaktyā*, which is attested by three *Haṭhapradīpikā* manuscripts on lower branches of the stemma (i.e. B_a, C₂ and

P₄). The participle *hataḥ* makes sense of the instrumental *śaktyā*, rendering the meaning ‘struck by Kuṇḍalinī.’

Alternatively, the word *hataḥ* (as well as the other variants *kṛtaḥ*, *kṛte*, and even *haṭhāt*) may derive from *hṛtaḥ*, which is attested by manuscripts of the *Jyotsnā*. The reading *hṛtaḥ śaktyā* renders the verse as saying that semen goes up, carried by Kuṇḍalinī.

In *Jyotsnā* 3.43, Brahmānanda explains *yonimudrā* as essentially the contraction of the penis (*yonimudrayā meḍhrākuñcanarūpayā*). He may have had in mind the practice of contracting and drawing the urethra upwards, which is described below in the section on *vajrolimudrā* (*Haṭha-pradīpikā* 3.82). The author of the *Yogaprakāśikā* (5.66) states that *yonimudrā* is well known in treatises on mantra (*yonimudrayeti mantrasāstraprasiddhayety arthaḥ/ prasidhyayety ed.*). This is consistent with the *Śivasamhitā*’s discussion of *yonimudrā* (4.2, 5.12), where it is described as activating the perineum (*yoni*) by contracting it in order to bring about success in mantra repetition. Later compendiums on yoga reiterate the role of *yonimudrā* in mantra practice (e.g., the *Yogacintāmaṇi* f. 65r, citing the *Pārameśvaratantra*, and *Haṭhatattvakaumudī* 33.12). The *Haṭhayogasamhitā* (43–48) teaches a different version of *yonimudrā* in its repertoire of twenty-five *mudrās*. In this work, *yonimudrā* is supposed to awaken Kuṇḍalinī and involves sitting in *siddhāsana*, blocking the ears, eyes, nose and mouth with the thumbs, index, middle and ring fingers respectively, uniting *prāṇa* and *apāna*, meditating on the six *cakras*, and repeating the mantra *hum haṃsa*.

[3.39*1]

❖ Commentary

Manuscripts of the main groups, including α , γ and ϵ , contain an additional line after 3.39 that is largely incoherent, aside from indicating that the tongue is in the cavity of the skull and that there is a *mudrā* for uniting the *kalās* (*kapālahukhare jihvā kalāsandhānamudrayā*). This line likely derives from a marginal note, the first half of which was probably explaining *ūrdhvajihvaḥ* in the next verse. The compound *kalāsaṃdhānamudrayā* may have been added as some form of dittography or as a gloss on *yonimudrā*, which is not described elsewhere in the text. In a slightly modified form, this line appears in a verse in the six-chapter version of the *Haṭhapradīpikā* (f. 112r–112v):

In the context of poison, *takṣaka* refers to one of the three kings of the snakes (*nāga*), the other two being Śeṣa and Vāsuki (MANI 1975: 782–783).

❖ Commentary

The meaning of *prāṇāt* ('from the breath') in the first verse quarter is not easy to understand without the context of this verse in the source text, the *Vivekamārtaṇḍa*. In the verse preceding this one in the *Vivekamārtaṇḍa* (117), the breath, on reaching the "great lotus", is said to turn into nectar (*amṛta*). In *Jyotsnā* 3.51, Brahmananda notes that there is a variant *prāṇaiḥ* ('by means of the breaths'), which is easier to understand than *prāṇāt*. He nonetheless accepts *prāṇāt* and understands it as being the means by which the nectar is obtained (*prāṇāt sādhanabhūtād avāptam*). He also understands the sixteen-petalled lotus to be the lotus in the throat, into which the nectar drips.

If the tongue, while oozing nectar and constantly kissing the tip of the uvula, is salty, pungent, like milk or the same as honey and ghee, diseases are eliminated for [the yogi], he stops ageing, can recite treatises and scriptures, attains immortality together with the eight-fold powers, and attracts Siddha women. ❖ Commentary

The instruction to ‘contract the wind’ (*vāyum ākuñcayet*) is odd (especially with *samīraṇaḥ* in the fourth *pāda*) and not found in other texts. Mallinson has adopted *yonim* for *vāyum* (cf. *Haṭhāpradīpikā* 3.49b) in his edition of this verse in its source text, the *Dattātreyayogaśāstra*, which is not found in the manuscripts of that text but is in the *Haṭhāpradīpikā*’s δ manuscripts. Another possibility is that *vāyum* is a corruption of *pāyum*, ‘anus’.

In the context of the root lock, *vāyum ākuñcayet* can be understood as an instruction to contract *apānavāyu*, which is mentioned in the previous verse (3.50a). Instructions to contract *apānavāyu* are found in other yoga texts, such as *Yogatārāvalī* 7b (*ākuñcanaiḥ śaśvad apānavāyoh*), *Śivasamhitā* 4.84cd (*apānavāyum ākuñcya balād...*), *Śivayogapradīpikā* 2.53ab (*athordhvamadyasthirabandhanābhyām ākuñcanād ūrdhvam apānavāyoh*) and *Yuktabhavadēva* 7.297 (*ādharakamale suptām cālayet kuṇḍalīm drḍhām/ apānavāyum ākrṣya balād ākuñcya buddhimān*). In *Jyotsnā* 3.63, Brahmananda understands *vāyu* in this verse as *apāna* when he says that ‘one should contract the wind, *apāna*’ (*vāyum apānam ākuñcayed*), which he explains as, ‘one should pull it by contractions of the anus’ (*gudasyākuñcanenākarṣayet*). In the same vein, Bhavadēvamīśra glosses ‘pulling *apāna*’ (*apānākarṣaṇam*) as ‘contracting the anus’ (*gudākuñcanam*), when commenting on ‘having pulled *apānavāyu* and forcefully contracted it ...’ (*apānavāyum ākrṣya balād ākuñcya...*) in *Yuktabhavadēva* 297 and 301.

❖ Commentary

Since the term *nāda* usually means ‘internal sound’ in Haṭha and Rājayoga texts, it is possible that *bindu* here was understood by some to have the tantric connotations of sonic and visual foci (MALLINSON 2007: 219 n. 325) or two levels of sonic emanation in *mantroccāra*, where *nāda* is an unvoiced sound and *bindu* is the slightly coarser sound of inner murmuring (see *Tāntrikā-bhidhānaśāstra* vol. 3: 278–279). However, there is a passage in the *Amaraughā* (10–12) where *nāda* and *bindu* are paired and it is clear that *bindu* means generative fluid.

❖ Commentary

The second verse quarter has been rewritten in α₁ and α₂ as *prāṇamūlasvarūpakam*, which is similar to η₁ (*prāṇamūlasvarūpakau*) and the *Haṭharatnāvalī* (*mūlarūpasvarūpakau*). It is likely that *mūla* arose as a misreading of *uṣṇa*. References to *prāṇa* being hot by nature (and *apāna* being cold) occur in other works, such as the *Mokṣopāya* (6.85.111–112) and *Haṭhatattvakaumudī* (4.14, 41.2). The commentators Bālakṛṣṇa (*Yogaparakāśikā* 5.85) and Brahmānanda (*Jyotsnā* 3.67) accept the idea that *prāṇa* is hot by nature.

❖ Commentary

In the *Vivekamārtaṇḍa* this verse is preceded by a passage on *mūlabandha*, so the likely meaning of the fourth verse quarter is that (*mūla*)*bandha* is to be performed in this practice. The ḍ group of the *Haṭhapradīpikā* witnesses has ‘the root [lock] is applied’ (*mūlaṃ vidhīyate*), which appears to be an attempt to clarify the meaning of the original verse.

The word *uḍyāṇaṃ* in the first *pāda* is attested in manuscripts of the *Vivekamārtaṇḍa*, the source of this verse, and two manuscripts of the α group. This spelling is attested in several vernacular works (e.g., *Aṣṭāṅgayoga* of Caranadāsa 144, 275, 307–8, *Jogapradīpyaka* 588, 635, 686 etc.), as well as other Sanskrit yoga texts (e.g., *Yogatārāvalī* 6, *Dhyānabindūpaniṣat* 75 etc.). Other witnesses, including the *Jyotsnā*, have *uḍḍīnaṃ*, the usual form for the verbal noun from *uḍ-ḍī*.

❖ Commentary

We have understood the first line to mean that even though the basics of the practice of *uddīyāṇa* are easy, it still needs to be taught by the guru. Witnesses of the γ and δ groups read *yathā* for *sadā*, perhaps as a deliberate substitution of the more difficult *sadā*, making the verse mean that *uddīyāṇa* is easy in the way that is taught by the guru.

❖ Commentary

In the *Haṭhapradīpikā* this verse seems to instruct the yogi to press the bulb (*kanda*) with the feet while holding them with the hands. The adopted reading of the source text, the *Gorakṣaśataka*, which is only found in witness T (and there in the singular *jānu*, which has been emended to the dual *jānū* in Mallinson's edition) says that it is the knees that are to be held, which would still allow for the feet to press the bulb. In the *Yuktabhavadēva* (7.224), Bhavadēvamiśra says that the bulb is near the navel and the legs are held near the ankles, suggesting that the bulb is pressed by using the hands to pull the feet into the lower abdomen.

Yuktabhavadēva 7.224 (commenting on *uḍḍiyāṇabandha*)

दृढमासनं बद्धा गुल्फदेशसमीपे कराभ्यां पादौ दत्वा नाभिसमीपस्थं कन्दं पीडयन्नुदरे पश्चिमताणं तथा कुर्याद्यथा वायुः कुक्षिसन्धिं न गच्छत्येवमुड्डियानबन्धो जरामृत्युविनाशनः सम्पद्यते ॥

Holding the ankles with the hands and pressing the *kanda* with the feet is also the view of Brahmanānda (*Jyotsnā* 3.114), who follows the *Yogayājñavalkya* (4.14, 4.16) in thinking that the place of the *kanda* is nine fingerbreadths above the middle of the body, which is two fingerbreadths above the anus (*Jyotsnā* 3.113).

In the *Haṭhasaṅketacandrikā* (f. 36r), Sundaradeva explains that the yogi presses the *kanda* in the navel by performing *uḍḍiyāṇabandha*, along with the root and chin locks, at the end of *kumbhaka* and the beginning of exhalation. It is thus the backward stretch in the abdomen (*udare paścimatāna*) that presses the *kanda* in the navel.

❖ Commentary

In 3.64b, the reading *gale* (‘in the throat’) is very well attested by manuscripts of the source text, the *Gorakṣaśataka*, and the *Hathapradīpikā* (including all three α witnesses). Its meaning is not entirely clear to us as the ‘backward stretch’ (*paścimaṃ tāṇam*) usually occurs above and below the navel when the *uḍḍiyāṇa* lock is applied, as stated above in verse 3.60. We have not seen the neck mentioned in this regard in any other premodern work, and the absence of *ca* suggests that *gale* may be a corruption. The alternative reading *cibukaṃ hr̥di* in manuscripts of the *Hathapradīpikā* on lower branches of the stemma and in the testimonia is a reference to

सर्वेषामेव बन्धानाउत्तमो ह्युद्धियाणकः ।

Uḍḍiyāṇa is the best of all the locks. When the *uḍḍiyāṇa* lock is firm, liberation becomes easy. (65)

jālandharabandha and appears to be a patch. It is possible that the practice of *uḍḍiyāṇa* might affect the throat, as reported by GORE (2005: 144). Drawing on x-ray experiments on *uḍḍiyāṇa-bandha* conducted at the Kaivalyadhama Yoga Institute, the article mentions a sub-atmospheric (negative) pressure in visceral cavities, such as the oesophagus and stomach, as a physiological effect of applying *uḍḍiyāṇa*.

❖ Commentary

The reading *sthāpayed ḍṛḍham icchayā* in the second verse quarter is attested by the manuscripts of the α , δ , η and π groups. It is also well-attested in the transmission of the source text, the *Dattātreya yogaśāstra*, but in his edition Mallinson has adopted *sthāpayed cibukaṃ ḍṛḍham* on semantic grounds. This reading is found in two of his favoured manuscripts but this is one of the very few instances where he reads against his stemmatic hypothesis. He puts this down to contamination in the transmission. Our sources, in particular the manuscripts of the α group, indicate that Svātmārāma read *sthāpayed ḍṛḍham icchayā* (which is also the reading which Mallinson's stemmatic hypothesis indicates is primary in the *Dattātreya yogaśāstra*) and we have adopted it accordingly. It is certainly the *lectio difficilior*. Taking *kaṇṭham* as the object of *sthāpayet* is awkward, as it is hard to see how one could place the throat on the chest, and the meaning of *icchayā*, which we have translated as “deliberately”, is uncertain.

❖ Commentary

The import of the second line of this verse is not entirely clear without the context of the source text. It derives from a passage in the *Jñānasāra* (2.1–5), which identifies *khecarīmudrā* as the ‘*cakra* of the void’ (*vyomacakra*) and *khecarīmudrā* combined with the contraction of the throat as the ‘middle *cakra*’ (*madhyacakra*). The middle *cakra* seems to be so designated because it is situated between the *vyomacakra* and a root *cakra* (*mūlacakra*), which is located between two *śaktis* in the navel.

Svātmārāma appears to have incorporated the *Jñānasāra*’s verse on *khecarī* and the *madhyacakra* into his discussion of the *jālandhara* lock because its reference to contracting the throat (*kaṇṭhasaṃkocana*) reinforces the idea that this contraction blocks important channels, a point stated more generally in the two preceding verses that he borrowed from the *Viveka-mārtaṇḍa*. The *Jñānasāra*’s verse on *vyomacakra* was incorporated into later versions of the *Haṭhpradīpikā* (see the commentary on X4.49).

In *Jyotsnā* 3.73, Brahmānanda, who appears to have been unaware of the *Jñānasāra*, says that the middle *cakra* (*madhyacakra*) is *viśuddha cakra*. He appears to say this because the *viśuddha cakra* is located in the throat and the *jālandhara* lock is a contraction of the throat. However, he also connects the *viśuddha cakra* to the sixteen supports (*ṣoḍaśādhāra*) at the end of

बन्धत्रयमिदं श्रेष्ठं महासिद्धैर्निषेवितम् ।

By immediately contracting the lower [part of the body] (i.e. by the root lock) when the neck has been contracted (i.e. by the *jālandhara* lock) and by stretching the abdomen backwards in the middle [of the body] (i.e. by the *uḍḍiyāṇa* lock), the breath enters the channel of Brahman. (70*1)

See p. 139). $\delta_1 \delta_2$ omit it at both places.

this verse, perhaps because this *cakra* has sixteen petals (as mentioned in 3.46). On the meaning of *ādhāra* in yogic contexts, see entry no. 3 in the *Tāntrikābhidhānakośa* vol. 1: 191.

❖ Commentary

As far as we know, the compound *pavanālaya* does not occur in other yoga texts. Here, it appears to refer to *Suṣumnā*. The similar compound *prāṇālaya* is mentioned in other yoga texts, such as the *Yogayājñavalkya* (4.52–53), but it refers to the locations in the body where *prāṇa* resides, as opposed to the other bodily winds.

❖ Commentary

We have adopted the reading *ṣaṇmāsordhvaṃ* in the second verse quarter. It is attested by manuscripts of the *Dattātreyayogaśāstra* (the source text) and the *Ĵyotsnā* (3.82). It makes good sense and explains the rather odd readings in α and other manuscripts, *ṣaṇmāsārdhān*, *ṣaṇmāsārdhaṃ* and *ṣaṇmāsārdhe*. The γ and δ groups have a different verb as well, *ṣaṇmāsārdhena naśyati*.

❖ Commentary

On the possible referents of *kṣīra*, see MALLINSON 2024 on *Dattātreyayogaśāstra* 154. According to Brahmānanda (*Jyotsnā* 3.84), the compound *vaśavartinī*, which we have translated as ‘an obedient woman,’ could be a wife (*vaśavartinī svādhīnā nārī vanitā*). In 3.82, the reading *bhāryābhage* in η_1 , η_2 and π_ω supports Brahmānanda’s view that the woman is the yogi’s wife.

❖ Commentary

In the *Haṭhatattvakaumudī*, Sundaradeva states that this upward contraction of the urethra, which is the method by which fluids are drawn up it, is done in the region of *apānavāyu* and the anus. Brahmānanda states that this practice is done immediately after sex.

❖ Commentary

The omission of 3.84ab in the η group and δ_3 is likely to be the result of haplography (*bindu-dhāraṇāt* is repeated).

The readings *mṛtyubhayam* (α_3 , δ , ϵ , η , π) and *kālabhayam* (α_2 , γ) are well attested by the main manuscript groups, but *mṛtyubhayam* is in the important witnesses of the source text, the *Vivekamārtaṇḍa*.

❖ Commentary

These two *pādas* appear to stand apart and function as a heading introducing the practices of *sahajolī* and *amarolī*, which are described in the verses that follow. Some manuscript groups other than α and π insert separate headings for *sahajolī* and *amarolī*. However, since 3.87 introduces these practices, these additional headings are redundant and unlikely to be original.

❖ Commentary

Some manuscripts, including α_2 and α_3 (missing in α_1), omit 3.88ab. We have included it because in the *Dattātreyayogaśāstra*, the source of this verse, 3.88ab specifies the substance mentioned in 3.88cd that the man and woman are supposed to rub into their bodies after sexual intercourse.

In the *Dattātreyayogaśāstra*'s teaching on *sahajolī* (163 and 181–183) a rag is used to wipe up the residue of a mixture of semen and sweat that has been rubbed into the body, and then soaked in a paste of water and ash before being rubbed over the body.

The awkward plural *jaleṣu* in 3.88a was probably the result of Svātmārāma removing the pronoun from the compound *tajjale* in the *Dattātreyayogaśāstra*'s verse because it has no referent in the *Haṭhapradīpikā*'s compilation.

❖ Commentary

In the first verse quarter, the gerund *samākṛ̐ṣya* (γ) has been adopted, instead of the better-attested *samākuñcyā*, as it yields a more appropriate sense and is used similarly to *ākṛ̐ṣya* in 3.82.

Verses 3.91*1–3 have been greyscaled because they are absent in α_3 (and missing in α_1). They appear to have been borrowed from the *Dattātreyayogaśāstra*'s section on *vajrolī*, perhaps with the intention of supplementing 3.92–93 by providing additional details on how a woman practises *vajrolī*. The verses are present in α_2 after verse 3.86ab where the verse quarter *vajrolyā saha yoginī* occurs twice (also at 3.92b), which suggests that the version of *vajrolī* in α_2 has been subject to further revision. The fact that 3.91*1–3 are in all groups except α indicates that they were added early in the transmission of the *Haṭhāpradīpikā*.

❖ Commentary

The α_3 manuscript has a significantly shorter and more coherent version of *śakticālanam*. It omits six introductory verses, of which three are from the *Vivekamārtaṇḍa* or one of its longer recensions and three have no known source, including one that contains a list of synonyms for *kuṇḍalinī*. This section is missing in α_1 (3.83–3.96) and α_2 adds these verses (except 3.93*6) after 3.96, which suggests that they have been inserted from elsewhere. Generally speaking, it appears that some redactors have taken the section on *śakticālanam* in the *Haṭhapradīpikā* as an opportunity to add material on *kuṇḍalinī*, in particular her location, shape, and soteriological importance.

❖ Commentary

The referent of *bālaraṇḍā tapasvinī* here is unclear. In some manuscripts this verse is followed by one (3.94*1) in which *bālaraṇḍā* is identified as *sarasvatī*, which in the context of *śakticālana* could refer to the tongue. She could also be Kuṇḍalinī, who in 3.93*5 is located at the navel, which is said to be the location of Viṣṇu (e.g. *Dhyānabindūpaniṣat* 28–30). In his commentary on this verse in the *Bodhasāra* (1906: 137), Divākara says that the seizing of Kuṇḍalinī itself is the highest state of Viṣṇu (... *bālaraṇḍām* ... *grhṇīyād vaśikuryāt tat tasyā vaśikaraṇam eva viṣṇor vyāpanalakṣaṇasya paramātmanah paramaṃ kevalaṃ ... padaṃ svarūpaṃ jñeyam*).

❖ Commentary

Verses 3.95*1–2 are absent in α_2 and α_3 . They introduce the idea of awakening *kuṇḍalinī* by moving the tongue with a cloth, which is a practice called *sarasvatīcālana* in the *Goraḥśaśataka* (16–25). These verses do not have a known source and are somewhat obscure unless one is aware of the more coherent explanation of this practice in the *Goraḥśaśataka*. In his *Haṭhasaṅketa-candrikā* (see testimonia), Sundaradeva makes sense of this verse by equating the tongue with Kuṇḍalinī. This enables him to understand the reference to the cloth (*paridhāna*) as the technique of wrapping the tongue in a cloth and milking it (i.e. *sarasvatīcālana* in the *Goraḥśaśataka*). This interpretation also makes sense of the next verse (3.95*2), which describes the cloth.

[3.95*2]

❖ Commentary

This verse was likely added to explain ‘by the method of the cloth’ (*paridhānayuktyā*) in the previous verse. For information on sources and testimonia, see 3.32*5.

❖ Commentary

Bhastrī or *bhastrikā kumbhaka* is taught at 2.60–68. The reference to *vajrāsana* may be pointing to the practice of *uḍḍiyāṇa*, which was described earlier in the chapter and is supposed to awaken Kuṇḍalinī. The contraction of the sun mentioned in the next verse supports this.

भानोराकुञ्चनं कुर्यात्कुण्डलीं चालयेत्ततः ।
मृत्युवक्रगतस्यापि तस्य मृत्युभयं कुतः ॥ ९७ ॥

[The yogi] should contract the sun and then move Kuṇḍalinī. Even if he were in the jaws of death, why would he fear death? (97)

❖ **Commentary**

In *Jyotsnā* 3.116, Brahmananda understands *bhānor ākuñcanam* as a contraction of the navel. In contrast, Sundaradeva, in his *Haṭhasaṅketacandrikā* (see testimonia), interprets it as drawing *prāṇa* through the sun channel (*sūryanāḍyākaraṣaṇa*), thereby intensifying the bodily fire.

When *prāṇa* has been greatly extended as a result of breath flowing through the path of the right nostril, [the yogi], with his body already immortal, filled with the nectar of the moon from the uvula in that way, sprinkling [with nectar] the network of channels at the aperture at [the centre of] the brow that have been subjugated by the mighty fire of time, makes his body completely new again like the trunk of a withered tree [when it regenerates]. ❖ Commentary

Verse 3.97*1 is absent in the α group. It is very close to a verse in the *Amaraughasāsana*, which is likely to be its source, although the date of the *Amaraughasāsana* is yet to be firmly established. This verse's import of rejuvenating the body by flooding it with nectar is not directly connected with those proceeding it. Its meaning is not clear in the published edition of the *Amaraughasāsana* and we are not confident of the readings adopted in our edition nor the meaning of the verse.

❖ Commentary

Verses 3.97*2–3 are absent in the α group and have no known source. They elaborate further on the instruction to practise *bhastrī kumbhaka* in 3.96. The practice of other *kumbhaka*s for moving Kuṇḍalinī is mentioned in 3.97*3.

The reading *abhyāsato* in 3.97*2c, which is attested by manuscripts of the γ group and the testimonia, is possible but seems to be a corruption of the participle, *abhyasato*.

❖ Commentary

As noted in the introduction (p. 28), Svātmārāma appears not to have understood the practice of *śakticālana* in the same way as his primary source text for its description, the *Gorakṣaśataka*, in which a cloth is wrapped around the tongue so that it can be repeatedly pulled, thereby lifting up the base of the central channel. He does not include the *Gorakṣaśataka* verses which mention the tongue or the cloth (but some later recensions of the *Haṭhapradīpikā* do introduce them). Verses 98 and 99 suggest that he understood the practice to involve repeated contraction of the region of the sun at the lower end of the central channel. The result is the same, namely that Kuṇḍalinī is awakened and uncoils herself, thereby allowing Prāṇa to enter the central channel.

❖ Commentary

In the *Gorakṣaśataka* (26cd–27ab), the source text, this verse occurs in a passage on *sarasvatī-cālana*, which is the practice of moving the tongue (i.e. *sarasvatī*) by wrapping a cloth around it and tugging it in order to raise the lower end of the *Suṣumṇā*. In the *Gorakṣaśataka*, *Sarasvatī* is said to be another name for *Arundhatī* and, since the tongue is instrumental for speech and *sarasvatī* is the name of a Goddess identified with speech (*vāc*), the *Gorakṣaśataka*'s reading of *śabdagarbhām sarasvatīm* makes good sense. However, it seems that Svātmārāma has changed 3.100b to read *śabdagarbhām arundhatīm* and has understood *arundhatī* as Kuṇḍalinī. This is affirmed in longer versions of the *Haṭhapradīpikā* (3.93*2) that contain a verse on synonyms of Kuṇḍalinī, which include *Arundhatī*. We are yet to find *Arundhatī* equated with Kuṇḍalinī in a text composed before the *Haṭhapradīpikā* but this identification is found in subsequent compendiums and commentaries (e.g. *Yogacintāmaṇi* f. 78v, *Yuktabhavadēva* 7.300, *Jyotsnā* 104, 119, *Yogaprakāśikā* 5.166).

The meaning of *maṇḍalād* in 3.101*1c is not clear. Brahmānanda understands it as a period of time (i.e. forty days) but we are yet to find this attested elsewhere.

❖ Commentary

In the witnesses of the earliest reconstructable recensions of the *Haṭhapradīpikā*, including the α manuscripts, this verse occurs in the section on *śakticālana*. This is also the case in the *Yogalakṣaṇāvalī*, *Haṭhasaṅketacandrikā* and the longer recensions of the *Haṭhapradīpikā* with six and ten chapters. However, in the context of *śakticālana*, the referent of *cāndrī* is unclear. It appears

to be understood as some sort of lunar fluid. In his *Haṭhasaṅketacandrikā* (see the testimonia), Sundaradeva defines it as a flow of perspiration (*gharmadhārā*) that arises from exertion in the practice and is emitted from the moon in forehead (*lalāṭacandra*). In the *Yogaparakāśikā*, Bālakṛṣṇa glosses it simply as nectar (*sudhā*) (5.182). In the *Haṭhayogasaṁhitā* (p. 41) and *Jyotsnā* (3.98), this verse is in the section on *amarolī*, which provides a clear referent of *cāndrī* as the cool middle flow of urine (see 3.96 [3.90 in our edition]).

❖ Commentary

This verse is omitted by the α group. Its claim is not entirely consistent with the role of the *ṣaṭkarma*, which are cleansing techniques that do not require Kuṇḍalinī. It was likely added to the original text as a further laudatory statement on the practice of Kuṇḍalinī.

❖ Commentary

The *Yogaprakāśikā* (5.186) interprets the similes in this verse as we have translated them, ‘Just as without a king [and] moon, the earth and night do not shine...’ (*yathā mahīpālaṃ candramasam vinā prthvīniśe na rājete...*). However, in *Jyotsnā* 3.126, Brahmananda interprets the earth (*prthvī*) as *āsana* because both are connected by the quality of steadiness (*sthairyaguna-yogāt*), and the night (*niśā*) as breath retention (*kumbhaka*) because both are characterised by the absence of movement of people and wind (*prāṇasañcārābhāvalakṣaṇaḥ*). Brahmananda’s interpretation seems somewhat far-fetched. The last line could also be understood in a non-

मारुतस्य विधिं सर्वं मनोयुक्तं समभ्यसेत् ।

[The yogi] should carry out all breath practice with his mind engaged. The wise man must not let his attention wander. (105)

❖ Commentary

The reading of *khilāpi* in the first verse quarter is unusual but well attested by the witnesses including the α group of manuscripts. In the *Abhidhānacintāmaṇi* (940), *khila* is defined as something uncultivated such as field (*kṣetrādyaprahataṃ khilam*) or, as the *Amarapadavivṛti* (2.1.5) puts it, ‘not marked by a plough’ (*lāṅgalena na likhitam iti khilam*). In the context of *Haṭhpradīpikā* 3.106, qualifying *suṣumnā* with *khila* implies that the central channel has yet to be cultivated (i.e. traversed).
