Chapter 4 of the Expanded Version

नमः शिवाय गुरवे नादबिन्दुकलात्मने ।

निरञ्जनपदं याति नित्यं यत्रपरायणः ॥ १ ॥

Homage to the guru, Śiva, who consists of *nāda*, *bindu* and *kalā*.
[The yogi] who is constantly devoted to him attains the pure state.

❖ Commentary

The greyscale verses at the beginning of chapter four are found in all collated manuscripts except those of the α group. These verses appear to have been added at an early stage in the transmission of the *Haṭhāpradīpikā* in order to create a new opening for this chapter. The revised beginning opens with a *maṅgala* verse of the kind typically found at the start of a text. The second verse, which is from the *Goraḥśaśataka*, introduces the topic of *samādhi*. In this expanded version, two verses listing the synonyms of *rājayoga* then follow. In the α group, however, these verses are placed at 4.32–33, and some manuscripts, such as π_2 , place them at both locations. Although the remaining additional verses relate to various themes within chapter four, when they are read together they constitute a loosely organised collection on *samādhi*, *rājayoga*, the importance of the guru, the dissolution of the breath, *Suṣumṇā*, and related topics.

In contrast to this revised opening, the α group begins with a cohesive discussion on absorption (4.1–3) that transitions to the gaze (4.4) and a brief discussion of *śāmbhavi* and *khecari mudrās* (4.5–4.8). The main topic of the chapter, which is meditating on the internal sound (*nādānusandhāna*), begins at 4.12 in the α group (whereas in other groups it begins after fifty or

So now I will teach the best way to *samādhi*. It destroys death, has an easy method and brings about the bliss of Brahman. (2)

2 also included in $\gamma_1\gamma_2\delta_1\delta_2$ **2a** *athedānīm cett.*] *athekṣanīm* γ_1 , *athodānī* π_ω **2b** °m *uttamam* $\varepsilon_1\varepsilon_2\zeta_2\zeta_3\eta_2\pi_1\pi_2\pi_\omega\chi$] *lakṣaṇam* $\gamma_1\gamma_2\delta_1\delta_2$ **2c** *tu* $\gamma_1\gamma_2\delta_2\varepsilon_1\varepsilon_2\pi_1\pi_2\pi_\omega$] *su* δ_1 , *ca* $\zeta_2\zeta_3\eta_2\chi$ **2d** *param cett.*] *sadā* ε_2

so verses). The emphasis on *nādānusandhāna* in the fourth chapter of the α group is consistent with the statement in verse 1.56 that *nādānusandhāna* is the fourth component of Haṭhayoga.

Its likely that the term *nirañjanapada* was understood here as *samādhi* because *nirañjana* is included in a list of synonyms of *samādhi* later in this chapter (4.32 = X4.3).

The triad *nāda*, *bindu* and *kalā* occurs in earlier works, in particular Śaiva Tantras, where it appears in contexts of enunciating mantras (*mantroccāra*, e.g. *Kubjikāmatatantra* 7.65, *Jñānārṇavatatantra* 2.4, *Īśānaśivagurudevapaddhati* 18–110, etc.) and sometimes qualifies deities (e.g. *Parākhyatantra* 5.156ab) and gurus (e.g. *Gurugītā* 64). The context can change the meaning of these terms, so we have chosen not to translate them. For a discussion of their various meanings, see *Tāntrikābhidhānakośa* vol. 2: 68–73; vol. 3, 277–279.

❖ Commentary

The third quarter of this verse has been subject to much revision in the *Haṭhpradīpikā* and the source text, the *Amanaska*. Unlike the manuscripts of the *Amanaska*, those of the *Haṭhpradīpikā* transmit *sthirā*, *sthiṭiḥ* or *sthiṭe* after *mukṭiḥ* or *mukṭi*. We have adopted *mukṭiḥ sthirā*, the reading of ε , an important group for the grey-scaled verses.

❖ Commentary

The vocative form of *amaraugha* is well attested and closely related to two other variants, *amarogha* and *amaraughi*. The term *amaraugha* appears in a list of synonyms for *samādhi* in *Haṭhapradīpikā* 4.32. We have adopted this reading as it is not unprecedented for an author to pay homage to *samādhi* (e.g. *Haṭhapradīpikā* X4.70) and to other yoga techniques (e.g. *Yogatārāvalī* 4a: *nādānusandhāna namo 'stu tubhyaṃ*). It is possible that this verse was inserted here together with the next one, which also contains the term *amaraugha*.

❖ Commentary

The second line of this verse is problematic in both the source text (the *Amaraughā*) and the manuscripts of the *Haṭhapradīpikā*. For the last *pāda*, we have adopted the closest reading to that of the source text but cannot make sense of it, so have cruxed it. In addition to the tentative translation we have made, one could understand *amaraughavajroḡi* and *āśājīvite* as dual forms: “... then *amaraughā* and *vajroḡi* arise, and there is hope and life too”. The line was rewritten in η_2 and other manuscripts, as well as the *Jyotsnā* (4.14cd), to include the two variations of *vajroḡi*, namely *amaroḡi* and *sahaḡoli*.

Disregarding the technical meaning of the terms, the verse plays with apparent contradictions (*virodhābhāsa*) in saying literally that, when mercury and the breath are unconscious, they cure disease; when dead, they restore life and, when bound, they enable one to fly up.

❖ Commentary

The manuscripts attest two versions of the second line. It appears that the reading of ε, ζ and π groups, which we have adopted, was changed to remove the first person pronoun. The modified reading is prevalent in the γ and δ manuscripts (*manahprāṇalayānando nāpi kaś cit vibhidyate*).

❖ Commentary

This and the next verse (X4.41–42) are from the South Indian recension of the *Amanaska*, a later rewriting of that work which incorporates these verses in an additional passage on Tārakayoga, which is presented in this recension as the preliminary yoga (*pūrvayoga*). It appears to have been added here to elaborate on the meditation of fixing the gaze that is taught in 4.4–7 = X4.36–39.

❖ Commentary

This verse is not in the α manuscripts and was probably added because it elaborates on the

gaze. In the *Candrāvalokana* (the source text) and the *Anubhavanivedana*, it follows X4.39, which may explain its position in the γ and δ groups. The attentive reader will notice that we have decided against manuscripts that agree with the source text. The reason is based on our stemmatic considerations. Cumulative evidence supports the origin of the additional verses at the beginning of the fourth chapter in the hyparchetype of the ε manuscripts. We suspect these verses contaminated the π group's copies very early. To complicate matters, the scribe was familiar with the source text and corrected the readings accordingly.

❖ Commentary

The manuscripts transmit readings for the last verse quarter that either contradict or repeat the statements in the first line. This problem likely occurred through some kind of dittographical error. We have therefore adopted the reading of *Jyotsnā* 4.42d (*nirodhataḥ*), which is the same as the source text.

This verse may not be referring to the cavity in which the tongue is placed but perhaps to a more esoteric sense based on the meaning of *pañcasrotas* as the five streams of tantric Śaiva teachings, which in this case generate knowledge. ❖ Commentary

The reading *tale* is suspect, as is *nirālabāntare*, the conjecture of Brahmānanda.

The *vyomacakra* ('the *cakra* of the void') is also mentioned in a verse added to some later recensions of the *Haṭhpradīpikā* (see 3.34*1), which states that *vyomacakra* is another name for *khecarīmudrā*. This verse derives from a passage in the *Jñānasāra* (2.1–5) that discusses *khecarī*, as well as contracting the throat (cf. the *jālandhara* lock), in relation to three *cakras*; *vyomacakra*, *madhyacakra*, and *mūlacakra*. For further discussion, see the commentary on 3.69.

In *Jyotsnā* 4.45, Brahmānanda states that the *vyomacakra* is associated with all the voids in the middle of the brow (*bhrūmadhye sarvakhānām samanvayāt*) and, in the *Haṭhasaṅketacandrikā* (f. 129v), Sundaradeva says that it is called the Brahmarandhra, which is between *Idā* and *Piṅgalā* (*idāpiṅgalāntargatam brahmarandhrākhyam vyomacakraṃ tat khecarīmudrām śaktim kuryād ...*).

❖ Commentary

The referent of *mayā* is unspecified, and no source text has been identified. We assume it refers to the speaker, who might be Śiva. The ε manuscripts have *māyodbheditā* for *mayodbheditā*, but it is hard to make sense of this. If correct, *udbheditā* would more likely mean “produced” or “made manifest”. Alternatively, the first line of this verse could be referring to *khecarīmudrā*, in which case its being produced by *māyā* would make more sense. In the second line, Brahmananda’s reading *suṣumnāṃ* is tempting. The line would then mean, “[The yogi] should fill Suṣumnā with divine breath through the rear opening”.

Haṭhapradīpikā (10 chapter) 7.52

khasya] svasya HP10

sūryāṅge manasā tathā] sūryo 'gnau pavane tathā HP10

❖ Commentary

It is hard to make sense of *sūryāṅge* here ('on the side of the sun?'). The terms *sūryāṅge* and *candrāṅge* occur in the third chapter (3.15) in the sense of the right and left sides of the body, respectively. However, this meaning does not seem relevant here. The variant readings with *pavane/pavano* are not clear either, so we have cruxed the fourth verse quarter.

एवमभ्यस्यमानस्य वायुमार्गे दिवानिशम् ।
अभ्यासाज्जीर्यते वायुर्मनस्तत्र विलीयते ॥ ५७ ॥

For [the yogi] practising in this way day and night on the path of the breath, as a result of the practice the breath is consumed, [and] the mind dissolves into [the breath]. (57)

अमृतं प्लावयेद्देहमा पादतलमस्तकम् ।
सिध्यत्येव सदा कायो महाबलपराक्रमः ॥ ५८ ॥

[The yogi] should flood the body with nectar from the soles of the feet to the head. [His] body is perfected forever, and he has great strength and valour. (58)

Now, concentration on the internal sounds:

राजयोगपदप्राप्तौ सुखोपायोऽल्पचेतसाम् ।

सद्यःप्रत्ययसंधायी जायते नादजो लयः ॥ ८३ ॥

The dissolution which arises from the inner sound instantly gives proof of [its efficacy] [and] is an easy method for attaining the state of Rājayoga [even] for foolish people. (83)

❖ Commentary

The term *nirañjana* can refer to the highest deity or the highest state of mind (see HP 4.32/X4.3 where it is said to be a synonym of *samādhi*). Here it is likely to mean the deity because of *devo*

❖ Commentary

The collated manuscripts have *avadhyaḥ* in both the first and second verse quarters. Although *avadhyaḥ* can make sense in both quarters, the repetition appears to be a dittographical error that changed *avedyaḥ*, which is close to the reading of the source text, into *avadhyaḥ*. We have therefore emended accordingly.

The first line of this verse is significantly different from the version in the source text, the *Goraḥśaśataka*. The second quarter is corrupt in many of the *Haṭhapradīpikā* manuscripts but *smṛti* and *nānyathā* are well attested.
