राजयोगाभियानसौधाधिरोहणाधिरोहिणी हठविद्या ॥

❖ Commentary

In his commentary on *Haṭhapradīpikā* 1.1 Brahmānanda first states that the author Svātmārāma starts appropriately with a *maṅgala*, a verse of adoration addressing Ādinātha, i.e. Śiva, but in accordance with his non-sectarian approach leaves room for a second interpretation of the word as Viṣṇu. A sentence later this is contradicted by his explanation that Ādinātha, who first taught Yoga, taught it to Pārvatī, which limits the scope to Śiva.

The reading *rājasaudham* in the third verse quarter is well attested by the manuscripts, including α_1 . However, the most common reading in manuscripts on the lower branches of the stemma is *rājayogam*, which was accepted by Brahmānanda in *Jyotsnā* 1.1 (see below). It appears that some scribes have made a concerted effort to replace words like *saudha*, *vidyā* and *mārga* with *yoga* in the opening verses of the text (see also 1.2d and 1.3b), even at the expense of the poetic imagery.

In light of the variants, which have led to our critical edition, Brahmānanda's choices and interpretation of the second half cannot be upheld. This is Brahmānanda's version and the relevant portion of his commentary:

श्रीआदिनाथाय नमोऽस्तु तस्मै
येनोपदिष्टा हठयोगविद्या ।
विभ्राजते प्रोन्नतराजयोगम्
आरोढुमिच्छोरधिरोहिणीव ॥ 1.1 ॥

Our choice of *virājate* in the third verse quarter reflects the relevant manuscripts and rhymes with the following *rāja-*. The difference in meaning is negligible.

The main problem in Brahmānanda's interpretation is his choice of *-rājayogaṃ* over *-rāja-saudhaṃ*, which he explains as follows:

राजयोगश्च सर्ववृत्तिनिरोधलक्षणोऽसंप्रज्ञातयोगः । तमिच्छोर्मुमुक्षोरधिरोहिणीव अधिरुह्यतेऽनयेत्यधि-
रोहिणी निःश्रेणीव विभ्राजते विशेषेण भ्राजते शोभते । यथा प्रोन्नतसौधमारोढुमिच्छोरधिरोहिण्यनायासेन
सौधप्रापिका भवति एवं हठप्रदीपिकापि प्रोन्नतराजयोगमारोढुमिच्छोरनायासेन राजयोगप्रापिका भवतीति
उपमालङ्कारः । इन्द्रवज्राख्यं वृत्तम् ।

Rājayoga is the yoga without cognition (*asamprajñāta*) defined [by Patañjali] as the stopping of all movements of the mind. To a liberation seeker desiring this, [the science of Haṭhayoga] shines like a ladder. Just as a ladder leads someone desiring to ascend to a lofty terrace easily to the terrace, in the same way also the *Haṭhapradīpikā* leads someone desiring the lofty Rājayoga easily to Rājayoga. [In this verse] the trope is a comparison. The metre is Indravajrā.

The interpretation makes good sense: Haṭhayoga leads effortlessly to Rājayoga, just as a ladder leads one to a high terrace. And the comparison as outlined by Brahmānanda has all the elements deemed necessary by Sanskritic poetology:

1. Particle expressing a comparison (*upamāvācaka*): *iva*
2. Standard of comparison (*upamāna*): ladder leading to the terrace (*saudhaprāpikā adhirohiṇī*)
3. Thing that is compared (*upameya*): *Haṭhapradīpikā* that leads to Rājayoga (*rājayoga-prāpikā haṭhapradīpikā*)
4. Common quality (*samānadharma*): Effortlessness (*anāyāsena*)

According to classical poetology a comparison containing all four elements is termed a “full comparison” (*pūrṇopamā*), whereas an elision of one or more elements is called a “deficient comparison” (*lūptopamā*). One element that cannot be omitted without losing the comparison is the *upamāna*. In the verse as given by Brahmānanda this would be “the ladder”. The implication is spelt out by Brahmānanda in his commentary: “Just as a ladder leads someone desiring to ascend to a lofty terrace easily to the terrace, in the same way also the *haṭhapradīpikā* leads someone desiring the lofty Rājayoga easily to Rājayoga.” However, his text version spells out only the side of the *upameya*, that is, “Haṭhayoga leads to Rājayoga”, but leaves the *upamāna* open to interpretation. His mention of the word *saudha* in the commentary suggests that this was one of the other options he found in manuscripts—this reading is very well attested—but was rejected by him. In this way Brahmānanda makes sure that the text states the obvious, but at the same time it loses part of the comparison, and it loses its dynamics, which is brought out in the reading *rājasaudha* preferred with good manuscript evidence in our critical edition. We think that Brahmānanda was eager to state at the outset the primacy of Rājayoga, and to this end sacrificed the more poetically elegant original reading that mentions the royal mansion as

प्रणम्य श्रीगुरुं नाथं स्वात्मारामेण योगिना ।
केवलं राजयोगाय हठविद्योपदिश्यते ॥ २ ॥

After bowing to the glorious guru, the Lord, the yogi Svātmārāma teaches the system of Haṭhayoga solely for [attaining] Rājayoga. (2)

भ्रान्त्या बहुमतध्वान्ते राजमार्गमजानताम् ।
हठप्रदीपिकां धत्ते स्वात्मारामः कृपाकरः ॥ ३ ॥

For those who cannot find the royal highway because they are lost in the darkness of many doctrines, the compassionate Svātmārāma holds the Light on Haṭha. (3)

2 om. ε_1 **2b** *yoginā cett.*] dhimātā $\delta_1\delta_2\zeta_3$ **2d** *haṭhavidyo° cett.*] haṭhayogo η_2 **3** om. ε_1 **3a** *bhrāntyā cett.*] bhrāntā $\alpha_1\zeta_1$, bhrāntvā $\delta_1\delta_2\pi_\omega$ **matadhvānte cett.**] matadhvāntai $\gamma_1\pi_2$, matam dhimāt α_2 , manam dhānti π_1 , matam bhrāntam η_1 **3b** *rājamārgam* $\alpha_1\alpha_3\gamma_1\pi_1$] *rājayogam* $\alpha_2\delta_1\delta_2\varepsilon_1\zeta_1\zeta_3\eta_1\eta_2\pi_2\pi_\omega\chi$, *yogamārgam* (*dittography*) α_3 **ajānatām cett.**] ajānataḥ $\delta_1\delta_2\zeta_3$ **3c** *dhatte cett.*] datte $\pi_1\pi_2$, kurve δ_2 **3d** *svātmārāmaḥ cett.*] svātmārāma $\pi_1\pi_\omega$, svātmārāma γ_1 **kṛpākaraḥ cett.**] kṛtāpara α_2 , kṛpāparaḥ δ_1 , kṣamākaraḥ η_2 , prakāśyate π_ω

a metaphor for the “royal yoga”. In comparing the science of Haṭhayoga to a stairway, Svātmārāma was perhaps consciously emulating his favourite source text, the *Vivekamārtaṇḍa*, which opens with *etad vimuktisopānam*, “this is the stairway to complete liberation”.

[1.3]

Haṭharatnāvalī 1.4

भ्रान्त्या बहुमतध्वान्ते राजयोगमजानताम् ।
केवलं राजयोगाय हठविद्योपदिश्यते ॥

b rājayogam] rājamārgam P,T,t1

❖ Commentary

Most witnesses (including α_2) have *rājayogam ajānatām* (‘for those ignorant of Rājayoga’) in 1.3b. The reading *rājamārgam ajānatām* (α_1 and α_3), “for those unable to find the royal highway”, is more appropriate to the metaphor of being lost in darkness.

As Brahmanānda notes, the compound *kṛpākaraḥ* can be understood as one who is compassionate (*kṛpā* + *kara*) or one who is a mine (i.e. a rich source) of compassion (*kṛpā* + *ākara*). In the Devanāgarī transmission, the *kṣamā* of *kṣamākaraḥ* probably arose as a mistake for *kṛpā*.

हठविद्यां हि मत्स्येन्द्रगोरक्षाद्या विजानते ।

jānīte tat prasādataḥ] śrīnivāsaś tathā svayam HRĀ

❖ Commentary

The word *athavā* ('or') is well attested but difficult to construe here. Brahmānanda understands it as a conjunction (*athavāśabdaḥ samuccaye*), and this is how we have interpreted it. The variant *mahāyogī* in ζ₁ and other manuscripts (ε₂J₄J₁₁K_o) is probably an attempt to remove the difficulty of understanding *athavā*. One could adopt *tathā*, which is attested by α₃, but this would be at odds with the weight of the evidence supporting *'thavā*.

6 *om.* ε_1 **6a** *manthāna cett.*] manthāra δ_2 , manthāno χ **bhairavo cett.**] bhairavā γ_1 **6b** *siddha cett.*] siddhi α_2 , suddha η_1 , śuddha $\eta_2\pi_2\chi$ **buddhaś ca cett.** incl. α_3] buddhiś ca $\alpha_1\alpha_2\pi_2\pi_\omega$ **kanthaḍiḥ** $\delta_1\delta_2\chi$] kanthaḍiḥ γ_1 , kanthaḍi $\alpha_2\zeta_3\pi_1\pi_2\pi_\omega$, kanthali $\alpha_1\eta_1$, kanthaliḥ ζ_1 , kaṇḍali α_3 , kandalī η_2 **6c** *om.* $\delta_1\delta_2$ **goraṇṭakaḥ em.**] goraṇṭaka $\alpha_1\alpha_2$, gorakṣakas α_3 , koraṇṭakaḥ $\gamma_1\zeta_1\pi_2\chi$, koraṇḍakaḥ ζ_3 , karaṇṭaka π_1 , pauranṭakaḥ $\eta_1\eta_2\pi_\omega$ **surānandaḥ cett.**] surānanda $\alpha_2\pi_1\pi_\omega$, sadānaṃda α_3 , kṣurānaṃda α_1 **6d** *om.* $\delta_1\delta_2$ **siddhapādaś ca cett.**] śrīpādaś caiva ζ_3 **carpaṭiḥ** $\gamma_1\zeta_3\eta_2\chi$] carpaṭi $\alpha_1\pi_1\pi_\omega$, carpaṭi $\eta_1\pi_2$, sarpaṭi α_3 , paryaṭi α_2 , karpaṭiḥ ζ_1

273 n. 35).

Two manuscripts of the α and δ groups have the variant reading *virūpākṣaḥ savālikaḥ* ($\alpha_2\delta_1$) for *virūpākṣaḥ śaṣayāḥ*. In another α manuscript, α_1 , the original reading was *savālmikaḥ*, which may reflect an attempt at some stage to change *savālikaḥ* to a name similar to Vālmiki, the celebrated author of the *Rāmāyaṇa*.

goraṇṭakaḥ] koraṇṭakaḥ MA, korandakaḥ HRĀ, gonandaka HRĀ v.l.

carpaṭiḥ] carpaṭi HRĀ MA

❖ Commentary

The α manuscripts have *goraṇṭaka*, and several other manuscript groups have *pauranṭaka*. We are yet to find the name *goraṇṭaka* in other Sanskrit texts but it may be a Sanskrit rendering of *Goraṇṭakuḍu*, which is the name of a disciple of Gorakṣanātha in the *Navanāthacaritramu* (JONES 2017: 194 n. 3). The spelling *koraṇṭaka* is attested in the *Haṭhābhyāsapaddhati*, and it is reasonably well attested by manuscripts of the *Haṭhāpradīpikā*, as well as those of the *Haṭharatnāvalī* (which also has *gonandaka*).

The compound *siddhapāda* could be a respectful affix to Surānanda, but it seems unlikely here because then the name would cross the *pāda* break.

❖ Commentary

The name Allamaprabhudeva (sometimes Allama Prabhu Deva or Allama Prabhudeva in secondary literature) is frequently transmitted as *allamaḥ prabhudevaḥ* (cf. α_2), as though it were two names. However, manuscripts α_1 , α_3 and π_1 do not have the *visarga* and write it as one name (i.e. *allamaprabhudevaś ca*). This is also the case in some manuscripts of the *Haṭharatnāvalī* (P,T,t1 in GHAROTE ET AL. 2009: 35 n. 8).

The names Nāgabodha, Nāgabodhi, and Nāgadeva are all possible in 1.8c. The adopted reading *nāgabodhaś ca* is attested across several primary groups of manuscripts. We consider the readings of α_1 (*namioḍḍiśa*) and α_2 (*nāma tumḍiśa*) to be corrupt.

The α_1 and α_2 reading of *siddhaḥ kāpālikas* is an exception among the manuscripts and seems too vague to be referring to someone within a lineage. Khaṇḍakāpālika is well attested by the remaining manuscripts (including α_3) and this name appears in other texts, e.g. Vajrapāṇi's *Laghutantraṭīkā*, p. 45, where Khaṇḍakāpālika is the first of the 24 Viras (*virāḥ khaṇḍakāpālikādayaś caturviṃśatiḥ*). It is likely to refer to an ascetic who carries a broken skull. *Matsyendraśaṃhitā* 33.2 mentions a practice for which one needs a *khaṇḍakapāla* and in the *Samvaramaṇḍala* of the *Niṣpannayogāvalī*, p. 26, Vajravārāhi is *kapālakhaṇḍakṛtakatāṭibhūṣaṇā*. The compound *khaṇḍakāpālika* is found at *Kathāsaritsāgara* 18.2.6, but there *khaṇḍa* is being used in a derogatory sense (18.2.15 refers to the same character as a *duṣṭakāpālika*).

❖ Commentary

The term *maṭhikā* occurs in narrative literature and yoga texts in the sense of a small hut. For example, in the *Kathāsaritsāgara* (12.9.14, 29–30), *maṭhikā* refers to the small hut built in a cremation ground by a young Brahmin who makes as his bed the ashes of the dead girl he had hoped to marry. In several other stories (*Kathāsaritsāgara* 6.6.132, 10.5.89, 12.25.35), *maṭhikā* is the term used for the hut of an ascetic. In an elaborate description of the huts (*maṭhikā*) used for Haṭhayoga, the author of the *Haṭhābhyāsapaddhati* states that the dimensions of the hut are four “*hastas*” high and wide (there are various definitions of the term: 18 inches according to the Larger Petrograd Dictionary and MONIER-WILLIAMS (1899), 48 inches according to the Smaller Petrograd Dictionary; the NWS lists even more variations, but the stipulation that the hut is the length of a bow found in the *Gorakṣaśataka* (on which see below) suggests that 18 inches was meant). The hut can be made of various materials, such as red earth, ashes, plaster and so on (BIRCH AND SINGLETON 2019: 17–18).

In the *Jyotsnā* and printed editions of the *Haṭhāpradīpikā*, including one by DIGAMBARA AND KOKAJE (1970: 6), this verse has the additional line, *dhanuḥpramāṇaparyantaṃ śilāgnijalavarjite*. This line derives from the *Gorakṣaśataka* (32cd), which has *paryante* instead of *paryantaṃ*. It stipulates that the hut should be built in a place measuring up to a bow length and free from rocks, fire and water. None of the early manuscripts has this line, which suggests that it was added at a later time. Nonetheless, it appears in over a dozen manuscripts that were consulted for this edition. These manuscripts are not close to an early hyparchetype of the text.

❖ Commentary

The syntax of this verse is problematic. One would expect the features of the hut, which are

एवंविधे मटे स्थित्वा सर्वचिन्ताविवर्जितः ।

गुरूपदिष्टमार्गेण योगमेव सदाभ्यसेत् ॥ १४ ॥

Staying in such a hut, free from all worry, [the yogi] should regularly practise yoga in exactly the way taught by his guru. (14)

14b *vivarjitaḥ* *cett.*] *vivarjite* $\zeta_1\pi_1$ **14c** *gurūpadiṣṭa* *cett.*] *gurūpadeṣṭa* ε_1 , *gurūpadeśa* π_2
14d *yogam eva* *cett.*] *yogam evaṃ* $\alpha_2\zeta_1\eta_1\eta_2$, *yogamārgaṃ* π_ω **sadābhyaset** $\alpha_1^{ac}\alpha_3\delta_1\delta_2\zeta_3\pi_1\pi_2\chi$] *samabhyaset* $\alpha_1^{ic}\alpha_2\gamma_1\varepsilon_1\zeta_1\eta_1\eta_2\pi_\omega$

listed in the first three quarters of the verse, to be in the nominative case. Then, the words *idaṃ lakṣaṇaṃ* in the fourth quarter would refer back to them. However, the compounds in the first three verse-quarters appear to qualify *lakṣaṇa* as though they were adjectives, and this seems to have been the way the verse was composed.

The manuscripts preserve many different readings at the end of the compound beginning with *arandhragarta*. We have adopted *piṭaka*, which usually means “a basket” but can also mean “a boil or blister,” because it is well attested and might here refer to bumps on the floors or walls that would make them uneven. Another possibility is *piṭharaṃ*, which can have the sense of potsherd and would here mean that the hut should be free of rubbish on the floor. One would expect a word for a defect in a hut that is similar to, but not the same as, cracks (*randhra*) and holes (*garta*). For this reason, the reading *vivaraṃ* looks like a patch, as its meaning does not add anything to *randhragarta*. The reading *viṭapaṃ* (‘the young branch of a tree or creeper’) attested in some manuscripts of the *Haṭhapradīpikā* is difficult to construe in this context unless it was intended to refer to creepers or branches that might invade or encroach upon the hut.

Manuscripts of several groups, namely ε , η , and π , have *bādhōjjitaṃ*, whereas γ , δ and the *Yogacintāmaṇi* have the more easily understood reading of *jantūjjhitaṃ* (‘free from creatures’). The α group is split on this, with α_3 (*bodhōjjitaṃ*) closer to *bādhōjjitaṃ* and α_1 (*jyaṃtyūpsitaṃ*) and α_2 (*jaṃtūṣṇitaṃ*) closer to *jantūjjhitaṃ*. We have adopted the more unusual reading of *bādhōjjitaṃ* with the support of a similar description of a hut in *Suśrutasaṃhitā* 6.17.67 (*grhe nirābādhe*).

❖ Commentary

Since many scribes do not use an *avagraha*, we cannot be sure whether to understand *niyamagrahaḥ* in *pāda* b as having a negative prefix. Although *yama* and *niyama* are not included in the *Haṭhapradīpikā* as auxiliaries of Haṭhayoga, verse 2.14 implies that some *niyamas* are necessary at least in the early stages of establishing a practice. However, verse 3.78 suggests that a yogi who does not practice *niyama* might obtain success in yoga through the practice of *vajroli*. Thirty of the manuscripts consulted for this critical edition contain additional verses on ten *yama* and ten *niyama*, which are usually inserted after 1.16 and derive from either the *Śāradātīlakatantra* (25.7–8) or the *Vasiṣṭhasaṃhitā* (1.38, 1.53).

निद्रात्यागाजितश्वासात्पीठस्थैर्यादनालसात् ।
गुर्वाचार्यप्रसादाच्च एभिर्योगस्तु सिध्यति ॥

❖ Commentary

α and several other groups of manuscripts have *tattvajñānārthadarśanāt* (as found in *Bhagavadgītā* 13.11), *tattvajñānāc ca darśanāt* or something very similar in the second *pāda* of the verse, but *darśanāt* (α_1) by itself is problematic: a vision of what? The early sources of this verse, in particular the *Śivadharmottara*, indicate that the second verse quarter read as *santoṣāt tattvadarśanāt*, which makes much better sense of the word *darśanāt* so we have adopted that reading.

हठस्य प्रथमाङ्गत्वादासनं पूर्वमुच्यते ।

तत्कुर्यादासनं स्थैर्यमारोग्यं चाङ्गपाटवम् ॥ १७ ॥

Because it is the first auxiliary of Haṭha, *āsana* is taught first. This type of *āsana* brings about steadiness, good health and physical fitness. (17)

17 transposed with the next verse $\delta_1\delta_2\zeta_3$ ante **haṭhasya** add. athāsanāni ζ_1 , «atha» āsanāni ζ_3 **17c** tat kuryād cett.incl. α_3] ta kuryād α_2 , na kuryād α_1 , kuryāt tad $\eta_2\chi$ **āsanam** **sthairyam** $\alpha_2\alpha_3\gamma_1\delta_2\varepsilon_1\eta_1\pi_1\chi$] āsanasthairyam $\alpha_1\delta_1\zeta_1\pi_2\pi_\omega$, āsane sthairyam ζ_3 , āsanam tasmād η_2 **17d** pāṭavam $\alpha_1\alpha_3\varepsilon_1\zeta_1\eta_1\eta_2\pi_1\pi_\omega$] pāṭave α_2 , lāghavam $\gamma_1\delta_1\delta_2\zeta_3\pi_2\chi$

It should also be noted that the word *tattva* could have a more specific meaning in the *Haṭhapradīpikā* (4.32–33) as Svātmārāma states that it is a synonym of *samādhi*. In other yoga texts, it can sometimes refer to the practices of yoga (e.g. *tritattva* in *Amṛtasiddhi* 13.12, 14.2–3) or, more generally, to the highest reality or truth (e.g. *Amanaska* 1.2, 1.20–21, 2.17 etc.).

pūrvam ucyate YCM] darśyate mayā HRĀ
 āsanam HRĀ] āsana YCM
 pāṭavam HRĀ] lāghavam YCM

❖ Commentary

The reading *aṅgapāṭavam* is attested among many of the early manuscripts, including the α group. Although this compound rarely appears in other yoga texts, a similar term, *śarīrapāṭava*, occurs in the *Śivasamhitā* (2.35) as one of the benefits bestowed by digestive fire (*vaiśvānarāgni*), which indicates that the word *pāṭava* was used in relation to the body and the benefits of yoga. The compound *aṅgapāṭava* seems to imply the optimal functioning of the body. The variant reading, *aṅgalāghava* ('lightness of the limbs' or 'dexterity') is more common in yoga texts and similar formulations occur even in works known to Svātmārāma, such as the *Dattātreyayogaśāstra* (*śarīralāghutā*) and the *Amanaska* ([...] *laghutvam ca śarīrasyopajāyate*). It appears that the less common term *aṅgapāṭavam* was changed to the more widely used notion of *aṅgalāghava*, perhaps early in the transmission, as the latter is attested by manuscripts in several early groups (i.e. γ , δ , and π).

❖ Commentary

One might wonder how the soles of the feet could be placed between the knees and thighs. Brahmananda explains that the region of the shank near the knee should be understood by the word ‘knee’ in this verse (*atra jānuśabdena jānusaṃnihito jaṅghāpradeśo grāhyah jānusaṃnihito jaṅghāpradeśah*). This is consistent with the earliest known description of *svastikāsana*, found in the *Pātañjalayogaśāstravivaraṇa* (2.46), which states that the big toe of one foot is tucked in between the shank and thigh of the other so it is not seen (*dakṣiṇaṃ pādāṅguṣṭhaṃ savyenoru-jaṅghena pariṅgrhyādṛśyaṃ kṛtvā tathā savyaṃ pādāṅguṣṭhaṃ dakṣiṇenorujaṅghenādṛśyaṃ pariṅgrhya yathā ca pārṣṇibhyāṃ vṛṣanayor apīḍanaṃ tathā yenāste tat svastikam āsanam*). For a discussion of *svastikāsana* in the Pātañjalayoga tradition, see MAAS 2018: 68–69. The descriptions of *svastikāsana* in early Śaiva Tantras do not mention the inserting of the toes between the knees and thighs (see GOODALL 2004: 348–350, fn. 371).

itiritam HRĀ] *udāhṛtam YCM*

❖ Commentary

Although most witnesses have *tathā* in 1.21a, the word *atha* has been accepted because it is attested by α_3 and η_1 , the sources and the testimonia. It appears to be verse filler here rather than indicating a temporal sequence of actions. Svātmārāma borrowed the verse on *vīrāsana* from the *Vasiṣṭhasaṃhitā*, the redactor of which appears to have adapted its first line from a description of this posture in the *Śāradātilakatantra*. This would explain the rather strange syntax of the *Vasiṣṭhasaṃhitā*'s version, in which *adhaḥ kṛtvā* was changed to *athaikasmin*, and *tathetaram* became *ca samsthitaṃ*. It seems that *samsthitaṃ* must be understood with *ūruṃ* in the third *pāda* in the sense of *samsthāpya* (i.e. 'having placed').

Different versions of *vīrāsana* are found in earlier tantric and yogic works, such as the *Kīraṇatantra*, Hemacandra's *Yogaśāstra* and commentaries on the *Pātañjalayogaśāstra*. For a discussion of some of these, see MAAS 2018: 66–68.

गुदं निष्पीड्य गुल्फाभ्यां व्युत्क्रमेण समाहितः ।

कूर्मासनं भवेदेतदिति योगविदो विदुः ॥ २२ ॥

Knowers of yoga know that the tortoise pose (*kūrmāsana*) arises by carefully pressing the anus with the ankles crossed. (22)

पद्मासनं सुसंस्थाप्य जानूर्वोरन्तरे करौ ।

niṣpīḍya] nipīḍya ABS, nirudhya VS

kūrmāsanaṃ bhaved etad VS] etad kūrmāsanaṃ proktaṃ ABS

iti yogavido viduḥ VS] yogasiddhikaraṃ param ABS

❖ Commentary

In the first quarter of the verse, the witnesses are split between *nirudhya* ('having blocked'), *nibadhya* ('having bound'), *niyamyā* ('having restrained') and *niṣpīḍya* ('having pressed'). The source, the *Vasiṣṭhasaṃhitā*, and two manuscripts of the γ and π groups support *nirudhya* whereas α_2 and the testimonia support *niyamyā* and α_3 has *niṣpīḍya*. While *nirudhya* makes sense here (i.e. 'having blocked or closed the anus...'), we have adopted *niṣpīḍya* because it is better attested among the α , ε and η groups.

The word *vyutkrameṇa* describes the position of the ankles. Its basic meaning is 'against the normal direction.' In *āsana* descriptions it usually means 'crossed' (see e.g. *Vasiṣṭhasaṃhitā* 1.71), which is how we have understood it here. It could also mean 'turned out': if the yogi is in a kneeling-type position, turning the feet out would bring the ankles together, blocking the perineal area. See *Yoga Mīmāṃsā*, vol. 8, no. 2 (1965: 29–30) for a discussion of *vyutkrameṇa* and the position of the ankles in *kūrmāsana*, and vol. 8, no. 2, figures 3–6 for photographs of a practitioner performing this *āsana*.

❖ Commentary

The oldest dated manuscript, η_1 , has *kukkuṭāsanavat kṛtvā*, which is a simpler alternative to the widely attested reading *kukkuṭāsanabandhasthaḥ* (including α_2 and α_3), which we have accepted. Since there is no known source for this verse other than the *Haṭhapradīpikā*, it appears that the reading of η_1 was an isolated attempt to simplify the syntax.

प्रसार्य पादौ भुवि दण्डरूपौ करौ च पृष्ठे धृतपादयुग्मौ ।

कृत्वा धनुस्तुल्यविवर्तिताङ्गं निगद्यते वै धनुरासनं तत् ॥ २५ ॥

❖ Commentary

We have adopted the reading *dhanurākarṣaṇaṃ kṛtvā*, which is in the δ group, as well as the principal testimonia (i.e. the *Yogacintāmaṇi* and *Haṭharatnāvalī*), because it fits the overall syntax of the verse, unlike the readings with *kṛṣṭaṃ* (for *kṛtvā*) that are found in the early manuscripts. It is curious that *kṛṣṭaṃ* is so well attested because it seems redundant with *ākarṣaṇaṃ*. The following reading in Godāvaramiśra's *Yogacintāmaṇi* (f. 40r) appears to be an attempt to make sense of *kṛṣṭaṃ*: *dhanurākarṣavat kṛṣṭaṃ dhanurāsanaṃ ucyate*.

A different version of *dhanurāsana* is described in the *Haṭhayogasaṃhitā*. On the two versions of *dhanurāsana*, see HARGREAVES AND BIRCH 2017.

One of the collated manuscripts of the *Haṭhapradīpikā*, ζ_3 , has a scribal comment stating that *dhanurāsana* should be done continuously (*anavarata*) on the left and right sides (*tatra ekam dhanurākarṣaṇāsanaṃ āsanaṃ savyāpasavyapādahastābhyām [abhy]ased anavaratam*). This would make *dhanurāsana* a dynamic practice as shown in [this video](#).

❖ Commentary

In the second verse quarter, most of the manuscript groups have a compound with *doṣṇā* at the end, as seen also in the *Yogacintāmaṇi*, *Haṭharatnāvalī* and *Yuktabhavadēva*. The instrumental ending (‘with the hand’) works well with the gerund (*pragrhya*) in the third verse quarter and the object (*dakṣapādam*) in the first quarter. This reading indicates that the right foot is held by the hand of the arm that is wrapped around the outside of the left leg, which would be the right hand (*dakṣadoṣṇā*) rather than the left (*vāmodoṣṇā*), as shown in [Figure 1](#).

α_3 and most manuscripts of the *Haṭharatnāvalī* have *dakṣapādo* in the first *pāda*. This reading yields the same meaning as the adopted one if read with *vāmapādam* in the second. However, α_3 and manuscripts of the *Haṭharatnāvalī* read *vāmodoṣṇā*, which is not good because it leaves the gerund without an object.

The version of this verse in *Jyotsnā* (1.26), which is supported by some manuscripts in two important groups, η and π , has two objects of the gerund, namely the left and right feet, without an instrumental or conjunctive particle. In his commentarial remarks, Brahmānanda proposes that the left foot is grasped by the right hand and the right foot by the left foot, as seen in [Figure 2](#).

मत्स्येन्द्रपीठं जठरप्रचण्ड-

❖ Commentary

Here we understand *jaṭhara*, which usually refers to the stomach, to mean “tough” or “persistent” (cf. *Amarakośa* 3.3.189: *jaṭharaḥ kaṭhine'pi syād adhastād api cādharah*).

In 1.27d, the compound *daṇḍasthīratvaṃ* (‘steadiness of the spine’) is attested by all the important manuscript groups and testimonia, so it was likely original. However, the *Jyotsnā* (1.27d) has *candrasthīratvaṃ* (‘steadiness of the moon’), and this reading is well-attested in many manuscripts that are lower on the stemma. Brahmānanda understands steadiness here as ‘the absence of flow’ (*sthīratvaṃ kṣaraṇābhāvaṃ*), a reference to the moon retaining its nectar.

 vased idam HRĀ] 'bhyased idam YCM, nyased idam YBhD

❖ Commentary

The reading *dorbhyām padāgradvitayam* is well attested but is somewhat strange because *dos* usually means ‘the arm’ rather than the hands. The variant *dvābhyām karābhyām dvitayam*, “with both hands”, appears to be an attempt to remove *dorbhyām*, but it introduces the problem of the toes not being mentioned.

❖ Commentary

The use of the word *paścima* to mean the central channel is found at *Yogabija* 95 (*paścima-mārgataḥ*), 108 (*paścime pathi*), 117 (*paścimadvāramārgaṇa*) and 121 (*paścimam*). Cf. the usages of *paścimamārga* in *Dattātreyayogaśāstra* 140 and *Śivasamhitā* 3.110 (from which this verse is likely to be derived). Brahmanānda understands *paścima* as referring to the *Suṣumṇā* (*Jyotsnā* 1.29): *paścimavāhinam paścimena paścimamārgaṇa suṣumṇāmārgaṇa vahatīti paścimavāhī*.

 mayūram HRĀ YCM] māyūram HRĀ v.l.

❖ Commentary

There is no direct source of this verse, but it has the same elements as two verses in the *Vasiṣṭhasaṁhitā* (1.76–77), which are themselves derived from earlier Vaiṣṇava sources (see MALLINSON 2014: 227 n. 9). The compound *uccāsanaḥ* in the third verse quarter seems to approximate in a somewhat vague way the *Vasiṣṭhasaṁhitā*'s reading *samunnataśiraḥpādaḥ*.

In the second verse quarter, the pronoun in *tatkūrpara*^o refers to the two hands. This is stated more explicitly (i.e. *hastayoḥ kūrparau*) in *Vasiṣṭhasaṁhitā* 1.76c and *Yogayājñavalkya* 3.15c.

हरति सकलरोगानाशु गुल्मोदरादी-
 नभिभवति च दोषानासनं श्रीमयूरम् ।
 बहुकदशनभुक्तं भस्म कुर्यादशेषं
 जनयति जठराग्निं जारयेत्कालकूटम् ॥ ३१ ॥

The glorious peacock posture quickly cures all illnesses, beginning with bloating and abdominal diseases, and overcomes humoral imbalances. It reduces to ash food which is bad or has been eaten to excess, kindles the digestive fire and causes strong poison to be digested. (31)

tu HRĀ] *vai* YCM

❖ Commentary

The word *tu* is often used to introduce a new posture, but in this case seems to be a verse filler.

In the first and third verse quarters, Svātmārāma appears to have rewritten *Śivasamhitā* 3.96 to include the information that it was Śiva (*śivena*) who taught the eighty-four *āsanas*, whereas in the source Śiva is himself speaking. Svātmārāma also changes the meaning of the second half of the verse, as the *Śivasamhitā* states that Śiva picked out the four best postures and taught them, whereas in the *Haṭhapradīpikā* it reads as though Svātmārāma himself is responsible for picking out the four best postures and teaching them. There are other instances in the *Haṭhapradīpikā* where Svātmārāma borrows a verse with a first person verb (e.g. 3.43). However, in this instance, he may have intended to indicate that he chose the four postures coming after this verse (i.e. *siddha*, *padma*, *śiṃha* and *bhadra*) because the *Śivasamhitā* follows 3.96 with teachings on the postures called *siddha*, *padma*, *pāścimottāna* and *svastika*. The vocative here (*sakhe*) is also found in *Haṭhapradīpikā* 4.56, which is also likely to be an authorial verse.

सिद्धं पद्मं तथा सिंहं भद्रं चेति चतुष्टयम् ।
श्रेष्ठं तत्रापि च सखे तिष्ठ सिद्धासने सदा ॥ ३४ ॥

The adept, lotus, lion and auspicious pose: these four are the best
and, among those, always sit in the adept's pose, my dear. (34)

❖ Commentary

It is likely that the original version of this verse contained the vocative with the imperative form of the verb (*sakhe tiṣṭha*). There are other instances where Svātmārāma included a verse with the vocative (e.g. 4.7c, 4.56b, 4.72d, 4.74c) as though the text were a dialogue. Other versions of this verse are transmitted by some manuscripts of the *Haṭhapradīpikā*, in which the vocative and imperative verb have been removed. In these cases, *sukhe* and *sukham* are difficult to construe because the context suggests that the intended meaning was that one should always sit in *siddhāsana* (as opposed to the other three *āsanas*), rather than the prescription to always sit in a comfortable *siddhāsana*.

तत्र सिद्धासनम् ।

Now, the adept's pose (*siddhāsana*).

योनिस्थानकमङ्घ्रिमूलघटितं कृत्वा दृढं विन्यसे-
न्मेद्रे पादमथैकमेकहृदयो धृत्वा समं विग्रहम् ।
स्थाणुः संयमितेन्द्रियोऽचलदृशा पश्यन् भ्रुवोरन्तरं
चैतन्मोक्षकपाटभेदजनकं सिद्धासनं प्रोच्यते ॥ ३५ ॥

[The yogi] should put the heel at the perineum, firmly place the [other] foot on the penis, focus the mind, hold the body erect and [re-main] motionless, his senses restrained, gazing between the brows with his eyes unmoving. This, which breaks open the door to liberation, is called the adept's pose. (35)

मतान्तरे तु ।

However, in another school [*siddhāsana* is taught as follows]:

मेद्रादुपरि निक्षिप्य सव्यगुलकं तथोपरि ।
गुल्फान्तरं च निक्षिप्य सिद्धासनमिदं भवेत् ॥ ३६ ॥

Place the left heel on the penis and put the other heel on top: this is the adept's pose (*siddhāsana*). (36)

❖ Commentary

In the second verse quarter, the adopted reading *ekahrdayo* is supported by two manuscripts of the *Haṭhapradīpikā* (J₂M₁) and is close to the α_1 reading *ekahrdaye*. It is also attested by the six-chapter *Vivekamārtaṇḍa* and the *Yogacintāmaṇi*, which attributes this verse to an unknown work called the *Pavanayogasaṅgraha*. In this case, *ekahrdayaḥ* appears to describe the yogi as having his mind focused on one thing. There are many variations of this verse quarter in the *Haṭhapradīpikā* manuscripts, as well as in the manuscripts of the sources and testimonia. Most of the collated witnesses have *athaikam eva hrdaye dhṛtvā*, which is close to the adopted reading. Other readings allude here to the practice of the Jālandhara lock, in which the chin is placed on the chest. This is most clearly seen in the *Jyotsnā*'s version, *hrdaye kṛtvā hanuṃ sūsthiram* ('having put the jaw firmly on the chest'). The other well-attested reading, *athaikaṃ eva niyataṃ*, was an attempt to fix the problem of *hrdaye* by replacing it with *niyatam*, which must be read with *medhṛe pādām athaikaṃ* ('having fixed one foot on the penis'), but *niyatam* is redundant here because of *vinayaset* in the first verse quarter.

siddham eva YSS] *siddhāsanaṃ* YCM

sadā bhajet] *samabhyaset* YCM YSS

❖ **Commentary**

Most witnesses have *suṣuṃṇām* as the object of the verb *abhyaset*, which is odd. Others have tried to make sense of this by changing *suṣuṃṇām* *iva nāḍiṣu* to *nāḍīnām malaśodhanam*, which occurs in the *Jyotsnā* (1.39), *Kumbhakapaddhati* (120), and *Hāṭhayoga* (quoted in the *Yogacintāmaṇi*, f. 79r). This variant reading is probably a patch as no other texts say that *siddhāsana* clears the channels. It could have been borrowed from verse 3.102*1ab, which has the same half-verse and was added to the section on *śakticālana*.

आत्मध्यायी मिताहारी यावद्वादशवत्सरम् ।
 सदा सिद्धासनाभ्यासाद्योगी निष्पत्तिमाप्नुयात् ।
 श्रमदैर्बहुभिः पीठैः किं स्यात्सिद्धासने सति ॥ ४० ॥

By meditating upon the self, restricting the diet and regularly practising *siddhāsana* for twelve years, the yogi attains *niṣṭatti*, [the final stage of yoga]. What's the point of the [other] many tiring postures when there is *siddhāsana*? (40)

❖ Commentary

The syntax of this verse as we have presented it is incomplete: at its end *pavanaṁ śanaiḥ*, ‘the breath gradually’, is left hanging. In the source text, the *Dattātreyayogaśāstra*, the following verse completes the syntax with *pūrayed*, ‘one should inhale’. Either Svātmārāma chose to leave the verse hanging (the following verse in the *Dattātreyayogaśāstra* adds nothing about the form of the posture, which is the topic here) or the verse that completes the syntax fell out, perhaps because of a scribal error that happened early in the transmission. In the *Dattātreyayogaśāstra* verses 36 and 37 both end with *pavanaṁ śanaiḥ*, the repetition of which may have caused an eyeskip.

The manuscript readings with *vakṣa sthāpayet* (η_2 and π_ω) or something similar (η_1) do not offer a solution to the incomplete syntax and do not indicate that Svātmārāma rewrote *Dattātreyayogaśāstra* 36 so that he could omit *Dattātreyayogaśāstra* 37. (The readings *osthāpyot* (α_2 and π_1) and *otthāpya* (ζ_3) are surprising and are perhaps Middle Indic forms in which Sanskrit *ava-* becomes *o-*.) In the absence of evidence that Svātmārāma included *Dattātreyayogaśāstra* 37 or wrote a coherent version of *Haṭhapradīpikā* 1.46, we have made sense of *pavanaṁ śanaiḥ* by adding “[draw in]” in our translation.

Brahmānanda’s comment on the statement, ‘having raised the root of the uvula with the tongue’ (*rājadantamūlaṁ ca jihvayā uttabhya*) in 1.46 is worth noting. In the context of Haṭha-yoga, one would assume this statement to be referring to a type of *khecarimudrā*, in which the tongue lifts the root of the uvula, here called the ‘royal tooth’ (*rājadanta*, on the meaning of which see MALLINSON 2007: 209 n. 258). However, Brahmānanda understands it differently (synonyms omitted for clarity):

राजदन्तानां दंष्ट्राणां सव्यदक्षिणभागे स्थितानां मूले उभे मूलस्थाने जिह्वा उत्तम्य ऊर्ध्वं स्तम्भयित्वा ।
गुरुमुखादवगन्तव्योऽयं जिह्वाबन्धः ।

Pushing against both roots of the front teeth on the left and right with the tongue
[...] — this fixation of the tongue has to be understood from the mouth of the teacher.

Brahmānanda appears to have had in mind a probably older rule for meditation postures, according to which the tongue rests near the front teeth. One example of this is in *Svacchandatantra* (4.365f.), which teaches a meditation pose called *divyaṁ karaṇam*, in which the tongue is to rest at the tip of the teeth (*dantāgre jihvām ādāya*). Other Tantric texts have this or similar rules, in which the tongue is supposed to rest either on the teeth or the palate, early examples being the *Mrgendragama*, *yogapāda* 19 (*dantāgre jihvām ādāya*) and *Mataṅgapārameśvaratantra*, *yogapāda* 2.27 (*tālumadhyagatenaiva jihvāgreṇa*). Placing the tongue where it does not disturb the meditation seems quite appropriate for a ‘normal’ meditative practice (The rule of placing the tongue at the palate is also found in *Īśānaśivagurudevapaddhati* 18.120: *tāluke jihvām saṁyojya kiñcidvivrtavaktro dantair dantān asaṁsprśan rjukāyaḥ*. For similar references in tantric and other works see MALLINSON 2007: 17–24.).

When the context is haṭhayogic physiology, placing the tongue at the uvula, which is the source of ‘nectar’, is more appropriate. Confusingly, yogic terminology includes many names for the uvula, and among these especially the term *rājadanta* may give rise to confusion, since, as we have seen, the tongue might also in some yoga systems be placed at the front teeth.

Furthermore, the haṭhayogic *khecarīmudrā* has been described in manifold ways. Usually the tongue is said to be inserted into the cavity above the palate but in some cases it is placed at the uvula. Thus the tenth-century *Mokṣopāya* (5.55.14c) says that the tongue rests at the ‘source of the palate’ (*tālumūlatalāagnajihvā*) and the commentary, the *Saṃsāratarāṇi*, on the parallel passage in *Laghuyogavāsiṣṭha* V.6.155, which reads *tālumūlāntarāagnajihvā*, explains that this means that the tongue is to be placed in the middle of the two regions of the palate, and that this is the *nabhomudrā*, alias ‘*khecari*’ (*tālumūlāntarāagnajihvamūlaḥ tālumūlayoḥ kākudamūladeśayoḥ āntare lagnam ālagnam jihvāmūlam yasyety anena nabhomudrā darśitā / yā hi khecarīty ucyate*).

A little later in the *Mokṣopāya* (5.78.24ab) it is made clear that one should reach the uvula, ‘at the root of the palate’ (*tālumūlagatām yatnāj jihvayākramya ghaṇṭikām*). In view of this background we must conclude that the author of the *Jyotsnā* was probably not aware of the yogic meaning of *rājadanta* and has tried his best to make sense of the passage, echoing the idea of the two roots of the palate (although his text is not talking about the palate), but then referring to the instruction of the teacher for practical details, probably noticing that his literal interpretation is somewhat opaque. In addition to his commentary on 1.46 (translated above), Brahmānanda’s comments on *rājadantasthajihvāyām* at 3.22 indicate that he thought the *rājadanta* refers to the front teeth (*kutaḥ? yato dantānām rājāno rājadantā rājadanteṣu tiṣṭhatīti rājadantasthāḥ, rājadantasthā cāsau jihvā ca tasyām rājadantasthajihvāyām bandhaḥ, taduparibhāgasya sambandhaḥ śastah*).

इदं पद्मासनं प्रोक्तं सर्वव्याधिविनाशनम् ।

❖ Commentary

In this context, the word *durlabham* is somewhat ambiguous as to whether the posture is hard to perform or hard to acquire (the more usual meaning). In commenting on *durlabham* in *Jyotsnā* 2.74, Brahmananda glosses it as *duṣprāpam*, which means ‘difficult to attain’ and ‘inaccessible.’

The comment added to this verse by Svātmārāma indicates that he prefers the second version of *padmāsana*, which derives from the *Dattātreyayogaśāstra*, rather than the one he has borrowed from the *Vivekamārtaṇḍa*.

कृत्वा संपुटितौ करौ दृढतरं बद्धा तु पद्मासनं
गाढं वक्षसि संनिधाय चिबुकं ध्यानं च तच्चेतसि ।
वारं वारमपानमूर्ध्वमनिलं प्रोच्चालयन्पूरितं
मुञ्चन्प्राणमुपैति बोधमतुलं शक्तिप्रभावाच्चरः ॥ ४८ ॥

A man should put his hands together in a bowl shape, very firmly assume *padmāsana*, place the chin tight on the chest and meditation in the mind. Raising the *apāna* breath over and over again [and] releasing the inhaled *prāṇa*, he attains unequalled knowledge through the power of the goddess [Kuṇḍalinī]. (48)

nanda, have *dhyāyaṃś ca* but none of the early ones has this reading. We are taking *dhyānaṃ* with *saṃnidhāya*, but this renders *tat* problematic because it has no clear referent. In the source text, the *Vivekamārtaṇḍa*, *tat* appears to refer to the *mokṣadvāra* broken by *kuṇḍalinī*, which is mentioned in the previous verse.

The two participles *proccālayan* and *muñcan* imply that the two things are happening at the same time, which is surprising but perhaps possible.

❖ Commentary

It is not unusual to read forms from *pṛ* with the locative as seen in this verse (cf. *pūrayan mukhe* in *Amaraughā* 21d) but it is not clear what is meant here. *Siddhasiddhāntapaddhati* 1.66 identifies the ten *dvāras* at which the ten principle channels terminate, and adds that all other channels terminate at the pores of the skin. Perhaps the primary *nāḍīdvāras* are intended here, and the yogi is to fill himself up with air through each of them. Alternatively, the meaning could be that by filling the *dvāras* with air, the yogi is blocking them, thus enabling the stilling of the breath as described in some secondary readings in the second half of the verse. This appears to be how this verse is understood at *Haṭhatattvakaumudī* 17.30 (cf. *Yogatattvopaniṣad* 141–142).

The *Jyotsnā* (1.49) has *nāḍīdvāreṣa* instead of *nāḍīdvāreṣu*, which Brahmananda understands to mean “by way of the opening of the central channel (*suṣumnāmārgeṇa*)”. This yields the idea of filling up the central channel (as opposed to other channels), which is described in the *Yogabīja* (94–95).

In order to make sense of this verse we have understood *mārutaṃ* to be read with the preceding line, as the object of *pūrayan*. Such enjambement is rare in *haṭha* texts (other than the *Dattātreyayogaśāstra*) and is absent from the verses which we have identified as authorial. We have not identified a source text for this verse but the enjambement and its unusual teaching

अथ सिंहासनम् ।

suggest that there may be one. The unusual enjambement accounts for many of the variants in the second line, with α₂ reading *mārutam mārayed yas tu*, invoking an alchemical metaphor for stilling the breath as found in the *Amṛtasiddhi* (see MALLINSON 2021). The reading *dhārayet* found in some later witnesses may have resulted from confusion over the meaning of *mṛ* in this context.

Now, the lion's pose (*siṃhāsana*).

[The yogi] should put both ankles at the sides of the perineal seam below the scrotum. He should place the left ankle on the right, the right ankle on the left and both hands on the knees, spread his fingers, open his mouth and gaze in deep concentration at the tip of his nose. This is the lion's pose, which is always honoured by yogis. It causes the three locks to arise together and is the best of [all] postures. (50–52)

❖ Commentary

Spreading the fingers and keeping the mouth wide open mimic a lion, and this is depicted in some iconography of Yoganarasimha (for example, Yoga Narasimha, Vishnu's Man-Lion Incarnation, Samuel Eilenberg Collection, Bequest of Samuel Eilenberg, 1998, Accession Number: 2000.284.4. <https://www.metmuseum.org/art/collection/search/39251>).

As far as we are aware, there is no source for the line (1.52cd) mentioning the three locks, so it may have been composed by Svātmārāma or borrowed from a lost work.

अथ भद्रासनम् ।

❖ Commentary

We have understood *pārśvapāda* as a *ekadeśitatpuruṣa* meaning the side of the foot, like *agrapāda*, the toes.

Manuscripts of two early groups, γ and π , as well as the *ṛyotsnā* (1.53), include an additional line specifying that the left ankle is placed on the left side and the right ankle on the right (*savyagulphaṃ tathā savye dakṣagulphaṃ tu dakṣiṇe*). This line appears to have been added to make it clear that the ankles are not crossed in *bhadrāsana*, unlike the previous pose, *siṃhāsana*.

एवमासनबन्धेषु योगीन्द्रो विजितश्रमः ।

अथाम्यसेन्नाडिशुद्धिं मुद्रादिपवनक्रियाम् ॥ ५५ ॥

When the great yogi does not tire from adopting the *āsanas* in this way, he should practise the breath techniques with seals and so forth, from which purification of the channels arises. (55)

❖ Commentary

The second line can be interpreted in different ways. One possibility is to understand *nāḍiśuddhiṃ* as a *bahuvrīhi* qualifying *mudrāḍipavanakriyām* in the sense that the yogi should practise the breathing techniques by way of the relevant *mudrās* and locks (taught in the third chapter), from which purification of the channels arise. Alternatively, one could separate *mudrādi* from *pavanakriyām* and understand three different techniques here, namely, the practice of purifying the channels (perhaps by the alternative nostril method mentioned at the beginning of the second chapter), the *mudrās* and the breathing techniques of *prāṇāyāma*. The absence of a conjunctive particle, such as *ca*, makes the second interpretation less likely. The version of this verse in the *Yogacintāmaṇi* (see the testimonia) was changed to make it clear that *nāḍiśuddhi* and *pavanakriyā* with *mudrās* are two distinct things.

आसनं कुम्भकं चित्रं मुद्राख्यं करणं तथा ।

[1.56]

❖ **Testimonia**

Yogacintāmaṇi f. 111v (attrib. HP)

°nukramo haṭhe] °nukrameṇa ca YCM

❖ **Commentary**

This verse was omitted from η_1 , the oldest dated manuscript. The omission is probably deliberate as that manuscript does not have chapter four, which teaches *nādānusandhāna* and the numbering in η_1 indicates that its exemplar included the verse.

This verse is similar to 1.65, which has *mudrādikaraṇāni ca*, so perhaps it was through confusion with 1.65 that the same reading is found in some witnesses of 1.56. It seems that each of the four auxiliaries (*aṅga*) of Haṭhayoga is being referred to in the singular (hence *āsanam*), whereas in 1.65 the plural is used (i.e. *pīṭhāni*) which is why we have adopted the reading *citraṃ* [...] *karaṇam tathā*.

Haṭharatnāvalī 3.28, *Yogacintāmaṇi* f. 111v (attrib. HP)

yogī HRĀv.l.] tyāgī HRĀ YCM

❖ Commentary

The readings *tyāgī* and *yogī* are both well attested in *Haṭhapradīpikā* 1.57b. The confusion between the two appears to have started early in the transmission of the *Vivekamārtaṇḍa*. The occurrence of *tyāgī* in *Vivekamārtaṇḍa* 37 may be a dittographical type of mistake because the word *tyāgī* is in the previous line of that work. But it is more difficult to determine whether Svātmārāma used a manuscript of the *Vivekamārtaṇḍa* with *tyāgī* or *yogī* in verse 37. Since the best α manuscript has *yogī*, as well as η₁ and many others, we have tentatively adopted it bearing in mind that it was changed early in the transmission of the *Haṭhapradīpikā*, most likely by a scribe who knew the reading of *tyāgī* in a manuscript of the *Vivekamārtaṇḍa*.

❖ Commentary

This verse probably derives from the ‘original’ *Gorakṣaśataka* (12c–13b). It is also found, but reworked to be about the *mitāhārī*, in Nowotny’s *Gorakṣaśataka* (55), which is an extended recension of the *Vivekamārtaṇḍa*.

The expression ‘lacking a fourth part’ (*caturthāṃśavivarjitaḥ*) is somewhat vague but probably refers to the idea of leaving a quarter of one’s stomach empty, which is stated more clearly in the *Dharmaputrikā* 1.51–52:

षट्सोपेतसुस्निग्धस्वादुसान्द्रसुगन्धिना ।

उदरस्यार्धभागन्तु भोजनेन प्रपूरयेत् ॥

पानीयेन चतुर्भागं तच्छेषं शून्यमिष्यते ।

One should fill half of the stomach with food that has the six flavours and is very unctuous, delicious, rich, and fragrant. One quarter should be filled with water, and the remaining quarter should be left empty. This rule of diet is prescribed for producing the [proper] movement of vital air.

And, as noted by Brahmananda in *Jyotsnā* 1.58, this idea also occurs in the *Aṣṭāṅgahr̥daya-saṃhitā* (*Sūtrasthāna* 8.46cd–47ab):

अन्नेन कुक्षेर्द्वाविंशौ पानेनैकं प्रपूरयेत् ।
 आश्रयं पवनादीनां चतुर्थमवशेषेत् ॥

One should fill two parts of the belly with food and one with water. One should leave the fourth part empty as a place for the [bodily] winds and so forth.

❖ Commentary

On the meaning of *uṣṇa* (1.59a) in relation to food, MEULENBELD (1974: 254 fn. 13) writes:

Cakra mentions as a variant: *kaṭvamlalavaṇakṣāra* (pungent, acid, saline and caustic). Cakra remarks that the term ‘hot’ (*uṣṇa*) denotes hot on touch when it occurs the first time, and hot with regard to potency when it occurs for the second time.

The compound *haritaśāka* in 1.59a is spelt *haritaśāka* in other works. The spelling *harita* was probably adopted for metrical reasons. In some Nighaṇṭus, *haritaśāka* is glossed as horseradish (*śigru*).

Rājanighaṇṭu 7.26

शिशुहरीतशाकश्च शाकपत्रः सुपक्वकः ।

Sauśrutanighaṇṭu 75ab

शिशुको हरितशाकश्च मतो वै मूलपत्रकः ।

Brahmānanda’s understanding of *haritaśāka* as *pattraśāka* is probably wrong if *pattraśāka* was intended as ‘leafy vegetables.’ But he may have used the term *pattraśāka* in the sense of horseradish (*śigru*) as the dictionary notes that *pattraśāka* is probably equivalent to *śākapattra*, which is mentioned in *Rājanighaṇṭu* 7.26 (above).

The term *sauvīra* (1.59b) probably means sour gruel. Brahmānanda glosses *sauvīra* as *kāñjika*, which is ‘fermented rice water.’ On *sauvīra*, MEULENBELD (1974: 516–517) says ‘*sauvīra* is sour gruel made from barley and wheat.’ The process of making it is described in the *Suśrutasaṃhitā* (1.44.35–40ab) as follows:

Roots of trivṛt etc., the first group (vidārigandhādī), mahat pañcamūla, mūrvā and śārṅgaṣṭā, and also of snuhī, haimavatī, triphalā, ativiṣā and vacā – these are taken and divided into two parts out of which one is decocted and the other is powdered; now, crushed barley grains are impregnated with the above decoction several times, dried and then slightly fried. Taking three parts of this and one part of the above powder are put in a jar and mixed with their (of trivṛt etc.) cold decoction and fermented properly. This is known as *sauvīraka*. (trans. SHARMA 2018 (vol. 1): 406)

However, according to some Nighaṇṭus, *sauvīra* can also mean stibnite (an ingredient in some *añjanas* and medicines). For example, in the *Rājanighaṇṭu* (13.86):

अञ्जनं यामुनं कृष्णं नादेयं मेचकं तथा
 स्रोतोर्जं दृक्पदं नीलं सौवीरं च सुवीरजम् ॥

Note also that the *Yogaprakāśikā* (1.53) takes *sauvīra* with *taila*, perhaps to solve the problem of *taila* on its own (see below for more on this). The compound *sauvīrataila* is explained as ‘oil produced in the place Suvīra’ (*suvīradeśodbhavatailam*). According to ALI (1966: 144), Suvīra is known as a country that was also called Suvira (V.79), Sauvira (XVI.21) and Sauvīraka (IV.23). He identifies it with the Rohri/Khairpur region of Sind.

The word *taila* could refer to *tilaitaila*. This is supported by the following rule (*paribhāṣā*) in the *Śārṅgadharasamhitā* (48): *anuktāvasthāyāṃ paribhāṣāvidhiḥ [...] taila 'nukte tilodbhavam*. We thank Dominik Wujastyk for this reference.

Our translation of *madya* takes into account the following remarks of McHUGH (2021: 8):

The most general Sanskrit term to denote drinks that create a drunken state is *madya* “intoxicating [drink].” Translating this word is hard. “Inebriating drink” is clumsy to my ear. “Intoxicating” contains the unfortunate “toxic” element that is not present in the Sanskrit word, though at least in English this is a common word, applicable to various substances and states and lacking any “toxic” associations in everyday usage.

In the compound *ājādimāṃsa* (1.59c), the adjective *āja* is required for the metre, so variants beginning with *aja* can be dismissed. Another well-attested reading is *ājāvimāṃsa*. Although this was probably read as ‘goat and sheep flesh,’ *āvi* is not attested as an adjective of sheep, so this reading was probably not original. Moreover, only *ājādimāṃsa* makes good sense. Diwakar Acharya believes that the prohibition of goat flesh and fish in this verse suggests it derives from the North East of India.

The term *kulattha* means a kind of pulse, translated by WUJASTYK (1998: 77) as ‘poor man’s pulse.’

The word *kola* is a name for *Zizyphus Jujuba* MILL. (NADKARNI 1926: 919–920). It is also known as *badara*. This is how Brahmananda understands it in *Jyotsnā* 1.59 (*kolaṃ kolyāḥ phalaṃ badaram*). According to Nadkarni, the fruit of the wild variety is very acid and astringent. It is believed to purify the blood and assist digestion. The bark is astringent and a simple remedy for diarrhoea. The root is useful as a decoction in fever and delirium. There are references to *kola* being pungent, though this does not seem to indicate sufficiently why *kola* is mentioned separately in the *Haṭhapradīpikā* as an unwholesome food. Diwakar Acharya has informed us that *kola* can refer to a type of banana in some parts of India.

According to SHARMA (1982: 69), *piṇyāka* is ‘the remnant paste of oily seeds after pressing out the oil content.’ This can then be made into a cake with a strong flavour, which may account for its inclusion in this list of unwholesome foods (we thank Diwakar Acharya for this information).

The term *hiṅgu* means Asafoetida (NADKARNI 1926: 360–361). As to why it might be considered unwholesome, the following comments by Nadkarni give some indication:

If long continued, even in moderate doses, it gives rise to alliaceous eructations, acrid irritation in the throat, flatulence, diarrhoea and burning in the urine.

भोजनमहितं विद्यात्पुनरप्युष्णीकृतं रूक्षम् ।
 अतिलवणमम्लपृक्तं कदशनशाकोत्कटं दुष्टम् ॥ ६० ॥

One should know food to be unfit if it has been reheated, is dry, too salty or sour, contains an excess of leafy vegetables that are hard to chew, [or] is spoiled. (60)

❖ Commentary

Brahmānanda glosses his reading *tilapiṇḍa* with *piṇyāka* (on the meaning of which see the notes for the previous verse).

The meaning of the compound *kadaśanaśākotkaṭaṃ* is not clear. Brahmānanda understands it as a list (*dvandva*) consisting of *kadaśana*, *śāka* and *utkaṭa*, which he defines as bad food, prohibited vegetables and pepper, respectively.

There are various possible meanings of *utkaṭa*. According to some Nighaṇṭus, the word *utkaṭa* can mean pepper (e.g. *Rājanighaṇṭu* 5.16: *pārvatī śailajā tāmṛā lambabijā tathotkaṭā*) and, according to MONIER-WILLIAMS (1899), *utkaṭa* can refer to Saccharum Sara and *utkaṭa* also to Laurus Cassia (cinnamon).

However, *utkaṭa* can be an adjective that means ‘abounding in’ at the end of a compound. Since this verse consists of many adjectives describing food that is unwholesome, it is likely that *kadaśanaśākotkaṭaṃ* was intended as an adjectival *tatpuruṣa*, in which case it means ‘[food] full of vegetables’ *śākotkaṭa* that are ‘bad food’ or, perhaps, ‘bad eating’ (*kadaśana*) in the sense of hard to chew.

तथा हि गोरक्षवचनम् ।

वर्जयेद्दुर्जनप्रान्तं वह्निस्त्रीपथसेवनम् ।

❖ Commentary

In 1.62b, *maṇḍa*, which is supported by α_1 , α_2 , and manuscripts of other important groups, is more likely than *khaṇḍa* (‘candied sugar’), which is also well-attested (α_3 , etc.), because the other elements of this compound are dairy products. The term *navanīta* is discussed in *Suśrutasaṃhitā*, *sūtrasthāna*, 45.92. The word *sitā* is one of many words for ground sugar. MEULENBELD (1974: 507) comments that *sitā* is ‘very white and looks like gravel.’

The term *paṭola* can refer to at least two different gourds. MEULENBELD (1974: 569) compiled a list of six possibilities, including *Trichosanthes dioica* ROXB. ('pointed gourd') and *Trichosanthes cucumerina* LINN. ('snake gourd').

SINGH AND CHUNEKAR (1999: 232) identify *paṭola* as *Trichosanthes dioica* ROXB., more commonly known as the pointed gourd, and they give its Hindi names as *paravala* and *parorāparorā*. It is very common in North India and is a popular vegetable in ascetic communities. Brahmānanda, however, glosses *paṭola* as *kośātakī*, which MEULENBELD (1974: 586) identifies as *Luffa acutangula* ROXB, suggesting that Brahmānanda thought *paṭola* was some sort of luffa.

Groups of five vegetables (*pañcaśāka* or *śākapañcaka*) have been defined in various yoga texts, but such grouping of vegetables does not seem to occur outside of literature on yoga. The earliest reference to a group of five vegetables known to us is in the sixteenth-century *Yuktabhavadēva* 4.22, which attributes the verse to the *Śivayoga*. The same verse is also quoted in *Jyotsnā* 1.65 with attribution to a medical source (*vaidyake*):

सर्वशाकमचाक्षुष्यं चाक्षुष्यं शाकपञ्चकम् ।
जीवन्ती वास्तुमत्स्याक्षी मेघनादः पुनर्नवाः ॥ इति ॥

Another verse on a similar fivefold group of vegetables is also cited in the *Haṭhatattvakaumudī* (4.26)

पञ्चशाकस्तु-
क्षीरपर्णी च जीवन्ती मत्स्याक्षी च पुनर्नवा ।
मेघनादश्चेति बुधैः पञ्चशाकः प्रकीर्तितः ॥ इति ॥

And a group with more significant differences is mentioned in the *Gheraṇḍasaṃhitā* (5.20; cf. the additional verses in some witnesses as reported in the apparatus).

बालशाकं कालशाकं तथा पटोलपत्रकम् ।
पञ्चशाकं प्रशंसीयाद्वास्तूकं हिलमोचिकां ॥

It is not entirely clear how one should understand *divyam* (1.62d). Brahmānanda glosses it with *nirdoṣam* ('defectless') and takes it with *udakam*. Ayurvedic sources indicate more clearly that *divyodaka* was understood as rainwater. In a section on types of water (*jalavarga*) in the *Sūtrasthāna* of the *Carakasamhitā* (1.27.196–224), rainwater is referred to as '*divyam udakam*' (1.27.198) in a discussion of the properties of water that has fallen from the sky. The compound *divyodaka* is used in other ayurvedic works to refer to the use of rainwater in recipes and treatments (e.g. *Aṣṭāṅgahr̥daya* 8.42–43). Also, the *Rājanighaṇṭu* (14.4) glosses *divyodaka* as rainwater:

दिव्योदकं स्वर्वारि स्यादाकाशसलिलं तथा ।
व्योमोदकं चान्तरिक्षजलं चेष्टभिधाह्वयम् ॥

मृष्टं सुमधुरं स्निग्धं गव्यं धातुप्रपोषणम् ।
मनोऽभिलषितं योग्यं योगी भोजनमाचरेत् ॥ ६३ ॥

The yogi should eat food that is sweet, delicious, unctuous, contains cow products, nourishes the bodily constituents, is desired by the mind and is appropriate. (63)

युवा वृद्धोऽतिवृद्धो वा व्याधितो दुर्बलोऽपि वा ।
अभ्यासात्सिद्धिमाप्नोति सर्वयोगेष्वतन्द्रितः ॥ ६४ ॥

Whether young, old, very old, sick or even weak, the diligent [yogi] succeeds in all yogas through practice. (64)

yogī bhojanam ācāret YCM YBhD] *caturthāṃśavivarjitam* | *śivārpitaṃ ca naivedyaṃ yogī bhojanam ācāret* HRĀ

❖ Commentary

The variants of 1.63a are all plausible: *mṛṣṭam*, *miṣṭam* and *iṣṭam*, although the last is made tautologous by *mano'bhilaṣitaṃ* in 16.3c. Both *mṛṣṭam* and *miṣṭam* are well attested by manuscripts of important groups and there is hardly any difference in their meaning in this context. We have adopted *mṛṣṭam* as it is supported by α_1 and α_3 .

पीठानि कुम्भकाश्चित्रा दिव्यानि करणानि च ।
सर्वोऽपि च हठाभ्यासो राजयोगफलावधि ॥ ६५ ॥

The postures, various breath retentions, and heavenly techniques:
the whole practice of Haṭha [is to be done] until Rājayoga results.
