

Chapter 2

अथासने दृढे योगी वशी हितमिताशनः ।

गुरुपदिष्टमार्गेण प्राणायामं समभ्यसेत् ॥ १ ॥

(1) Now, when [his] posture is steady, the disciplined yogi whose diet is good and measured should practise breath control in the way taught by [his] teacher.

1a *athāsane cett.*] *athāsāna* γ_1 , *haṭhāsane* η_1 **dr̥dhe** $\alpha_1\alpha_2\gamma_2\varepsilon_1\zeta_3\eta_2\pi_2\chi$] *dr̥dha* γ_1 , *dr̥dham* δ_1 , *vaśī* δ_2 , *dahe* ζ_1 , *dr̥dho* $\varepsilon_2\eta_1\pi_1\pi_\omega$ **1b** *vaśī cett.*] *dr̥dham* δ_2 , *vajrī* ζ_1 **hitamitāśanaḥ cett.**] *hitasikāśanaḥ* γ_1 , *mitahitāśanaḥ* $\delta_2\varepsilon_2$, *bhūtamitāśanaḥ* ζ_1 **1c** *gurūpadiṣṭa cett.*] *gurūpadeśa* $\delta\pi_2$ **1d** *prāṇāyāmaṃ* $\alpha_1\alpha_3\delta\eta_1$] *prāṇāyāmān* $\alpha_2\gamma_2\varepsilon\zeta\pi_1\pi_2\chi$, *prāṇāyāmī* γ_1 , *yogamārgaṃ* η_2 , *prāṇāyāmo* π_ω **samabhyaset cett.**] *sadābhyaset* δ_1 , *samācāret* ζ_3

1 After this verse α_3 has an additional verse:

आसने सम्यगासीनो वामेनापूर्वं चोदरं । कुम्भकेन त्रिरावृत्य दक्षिणेन विरेचयेत् ॥

[2.1]

Haṭharatnāvalī 3.78, *Haṭhatattvakaumudī* 36.1 (attrib. *Yogacandrikā*)

prāṇāyāmaṃ] *prāṇāyāmān* HRĀ HTK

❖ Commentary

Many manuscripts of the ε , γ , ζ and π groups, as well as the *ḥyotsnā* (2.1), have the plural *prāṇāyāmān* in 2.1d. The plural is possible here as it could refer to multiple repetitions of the basic alternate nostril breath control technique taught at 2.7–11, or to the different techniques of retention (*kumbhaka*) taught later in the chapter. The variation between singular and plural recurs through this chapter, and we have followed the α_1 readings, which make good sense. In this case, since the verse is introducing the topic of breath control, the more general sense of the singular is appropriate.

चले वाते चलं सर्वं निश्चले दृढबन्धनम् ।
योगी स्थाणुत्वमाप्नोति ततो वायुनिबन्धनात् ॥ २ ॥

(2) When the wind is moving, everything moves [and] when it is still, [everything] is firmly fixed, so the yogi attains motionlessness through restraining the breath.

niṣcale dr̥ḍhabandhanam] niṣcale niṣcalaṃ tathā HRĀ, niṣcalaṃ niṣcale tathā YCM

❖ Commentary

In the second verse quarter we have adopted the reading *dr̥ḍhabandhanam* found in most of the α , γ and π manuscripts over that found in the source text, *niṣcalaṃ tathā*, which is also found in some δ , η and π manuscripts and testimonia. We thus understand it to be the result of a deliberate change by Svātmārāma.

As noted by Brahmānanda, in addition to its primary meaning of immobility, *sthāṇutvam* can also mean the state of being Śiva, for whom Sthāṇu is another name.

यावद्वायुः स्थितो देहे तावज्जीवितमुच्यते ।
मरणं तस्य निष्क्रान्तिस्ततो वायुं निबन्धयेत् ॥ ३ ॥

(3) As long as breath is found in the body, there is said to be life. Its leaving is death, so one should restrain the breath.

मलाकुलासु नाडीषु मारुतो नैव मध्यगः ।
कथं स्यादुन्मनीभावः कायसिद्धिः कथं भवेत् ॥ ४ ॥

(4) When the channels are full of impurities, the breath does not go into the middle. How would the state beyond mind occur? How would perfection of the body arise?

❖ Commentary

The meaning of *avirodhataḥ* ('without harm/discomfort') makes better sense in this context than *anirodhataḥ* ('without cessation'). One might try to construe *anirodhataḥ* as 'without stopping the breath,' but verse 2.7 clearly states that the breath should be held as long as possible (*yathāśakti*). According to the apparatus of the critical edition of the *Haṭharatnāvalī*, *avirodhataḥ* is well-attested for the parallel line. In addition, *avirodhataḥ* is found (and also *virodhahīnam*) in a passage of the *Haṭhatattvakaumudī* (36.6–9) that appears to have been loosely based on *Haṭhapradīpikā* 2.7–9.

प्राणं चेदिडया पिबेन्नियमितं भूयोऽन्यया रेचयेत्
पीत्वा पिङ्गलया समीरणमलं बद्ध्वा त्यजेद्दामया ।
सूर्याचन्द्रमसोरनेन विधिना बिम्बद्वयं ध्यायतां
शुद्धा नाडिगणा भवन्ति यमिनां मासत्रयादूर्ध्वतः ॥ १० ॥

(10) If [the yogi] breathes in through Iḍā, he should then exhale the restrained [breath] through the other [channel, i.e. Piṅgalā]. He should inhale through Piṅgalā, hold the breath sufficiently long and release it through the left [channel]. The channels of ascetics meditating on the two orbs of the sun and moon using this method are purified after three months.

❖ Testimonia

Haṭharatnāvalī 3.87, *Yogacintāmaṇi* f. 90v (attrib. *Hathayoga*)
madhyamdine YCM] madhyadine HRĀ

❖ Commentary

This verse is summarizing the following passage in the *Dattātreyayogaśāstra* (63cd–65ab):

एवं प्रातः समासीनः कुर्याद्विंशति कुम्भकान् ॥ ६३ ॥
एवं मध्याह्नसमये कुर्याद्विंशति कुम्भकान् ।
एवं सायं प्रकुर्वीत पुनर्विंशति कुम्भकान् ॥ ६४ ॥
एवमेवार्धरात्रेऽपि कुर्याद्विंशति कुम्भकान् ।

Without reference to the *Dattātreyayogaśāstra*, the meaning of the second half of the verse is ambiguous because it could be understood as saying that the yogi should practise up to eighty retentions four times a day. In his *Jyotsnā* (2.11), Brahmananda understands it this way, and takes *śanaiḥ* to mean ‘gradually’ building up to the eighty retentions. In the parallel verses in the *Dattātreyayogaśāstra*, however, it is clear that twenty retentions are to be practised four times a day.

कनीयसि भवेत्स्वेदः कम्पो भवति मध्यमे ।
उत्तिष्ठत्युत्तमे प्राणरोधे पद्मासने मुहुः ॥ १२ ॥

(12) In the lesser cessation of the breath sweating arises, in the middle [cessation], shaking, and in the highest [the yogi] repeatedly rises up in the lotus pose.

Haṭharatnāvalī 3.88, *Yogacintāmaṇi* f. 90v (attrib. *Haṭhayoga*)

padmāsane muhuḥ HRĀ] padmāsanasthitaḥ YCM

❖ Commentary

The manuscript readings diverge greatly in the second line. In the third verse quarter, all of the manuscripts have *prāṇa* in some form (instead of *deha* as found in the source text, the *Vivekamārtaṇḍa*). The α manuscript, along with some of the ε , ζ , η and π manuscripts, seems to state that it is *padmāsana* that rises up again and again in the highest stage of holding the breath (*uttiṣṭhaty uttame prāṇarodhe padmāsanaḥ muhuḥ*). We have adopted a similar reading but with *padmāsane* (δ_1 and π_2) because it makes better sense that the yogi rises up while seated in lotus pose. Another version is seen in η_2 , which appears to say that the breaths rise up again and again when one is seated in the lotus pose (*uttiṣṭhanty uttame prāṇā baddhe padmāsane muhuḥ*). However, the verse is about the external signs that might arise in *prāṇāyāma* rather than internal processes. Such confusion has arisen because the verse was taken from the *Vivekamārtaṇḍa* without its context, which is a classification of different levels of *prāṇāyāma*, so Svātmārāma needed to include *prāṇarodhe* meaning *prāṇāyāma* in order for the different adjectives to have something with which to agree, and he did so despite the infelicity of *prāṇarodhe* crossing the *pāda* break.

जलेन श्रमजातेन गात्रमर्दनमाचरेत् ।

kāntis tathā jāyeta] kāntir jāyate tasya HRĀ, kāntis tadā jāyeta YCM

❖ Commentary

The idea that alternate nostril breathing is done to purify the channels can be found in early Śaiva tantras; see e.g. the *Nayasūtra* of the *Niśvāsātattvasaṃhitā* (4.110) and the *Svacchanda-tantra* (7.294cd–7.295ab). The latter verse is as follows:

अपसव्येन पूर्येत सव्येनैव विरेचयेत् ।
नाडीसंशोधनं चैतन्मोक्षमार्गपथस्य च ॥

यथेष्टं धारणं वायोरनलस्य प्रदीपनम् ।

नादाभिव्यक्तिरारोग्यं जायते नाडिशोधनात् ॥ २० ॥

(20) The ability to hold the breath as long as one desires, stimulation of the [digestive] fire, manifestation of the inner sound [and] freedom from disease occur as a result of purifying the channels.

20 *om.* ζ₁ζ₂ **20a** *yatheṣṭam* α₂δ₃η₁π₂χ₁ *yatheṣṭa* α₁γ₂π_ω, *tatheṣṭa* α₃ε₁ **dhāraṇam** *cett.*] *dhāraṇo* γ₁ **vāyor** *cett.*] *vāyur* π_ω **20b** *anālasya* *cett.*] *anīlasya* α₂, *aṇasya* δ₁, *aṇālasya* η₂π_ω **20d** *nāḍi* *cett.*] *nāḍi* *unm.* *unm.* η₂π_ω **śodhanāt** *cett.*] *śoṣanāt* γ₁, *śodhane* η

❖ Commentary

The reading *ukhālam* which we have adopted in the fourth *pāda* is a vernacular term for vomiting which is found in the α recension but has been changed in some witnesses to more Sanskritic forms, such as *udgāram* and *prakṣālyam*.

Many manuscripts, including several of those collated (i.e. η_2 , π_2 and π_ω), and the *ṣyotsnā* (2.24), add two verse quarters stating that the length of the cloth is fifteen cubits (*hastapañcadaśena tu*) and that the practice should be performed according to the guru's teachings (*gurūpadiṣṭamārgeṇa*). These additions are absent from the α , γ and ζ groups. Moreover, the compound *hastapañcadaśena* does not fit the syntax of the sentence, while the *pāda* referring to the guru's teaching is a cliché that was probably inserted as a verse filler when with the *pāda* on the length of the cloth was added.

❖ Commentary

The reading *pakhālaṃ* that we have adopted in the fourth *pāda* is found in α_2 and π_ω and is close to the reading of α_1 . It reflects vernacular usage as found in the old Hindi *Aṣṭāṅgayoga* of Caranādāsa (6.71ab). Some other witnesses have the Sanskritised form *prakṣālaṃ*, which is very rare in Sanskrit sources, while others have the more common *kṣālaṃ*.

गुल्मप्लीहोदरं चापि वातपित्तकफोद्भवाः ।
बस्तिकर्मप्रभावेन वार्यन्ते सकलामयाः ॥ २७ ॥

(27) By the power of the *basti* technique, swelling, splenitis, stomach disorders and all diseases arising from wind, bile and phlegm are removed.

कुष्ठानां नाशनं चापि बस्तिसिद्धे प्रजायते ॥

❖ **Commentary**

We have assumed that the compound *gulmaplihodara* is referring generally to swelling (*gulma*), spleen disorders (*plihan*) and stomach diseases (*udara*), but the terms *gulma* and *plihodara* can refer to more specific diseases. In *Suśrutasamhitā*, *uttaratantra* 42.4, *gulma* is defined as a movable or immovable round lump (*granthi*) that might arise between the heart and lower abdomen (*basti*) and can grow or shrink:

हृद्वस्त्योरन्तरे ग्रन्थिः संचारी यदि वाऽचलः ।
चयापचयवान्मृतः स गुल्म इति कीर्तितः ॥

The compound *plihodara* is the name of a specific disease, which is defined in the *Suśrutasamhitā* (*nidānasthāna* 7.14–15) as enlargement of the spleen (*plihābhivṛddhi*) so *gulmaplihodara* might be referring more specifically to abdominal lumps and splenomegaly.

colloquial Bengali, *niti* can mean the string used to spin a top and is likely to be connected with *netā/netā* which means a small piece of cloth. In modern Hindi and Gujarati *netī* means the cord of a churning stick and is cognate with Sanskrit *netra* (TURNER 1966: 427, entry 7588). In Old Hindi *netā* can have the same meaning or be a kind of silk cloth (Callewaert s.v.). In Oriya *netā* means “a kind of silk cloth worn by girls” (Praharaj s.v.). We thank Lubomír Ondračka for alerting us to several of these references.

The Hindi form of the name for this practice, *netī*, is very well established nowadays, but Svātmārāma’s original readings in this and the following verse were clearly *niti* and *niti* (vowel length was perhaps not important in the vernacular from which the name was taken). This is confirmed not just by α ’s readings at 2.30d but also by 2.31d where only the short first vowel of *niti* works metrically (some witnesses have rewritten the *pāda* in order to use the spelling *netī*). We might thus surmise that, like *lauḷī*, the practice, or at least its name, was taught to Svātmārāma by Gauḍas, because it is only from Bengal that we have evidence of the use of the form *niti*.

[2.31]

❖ Commentary

We have adopted the reading *caiva* in the first verse quarter, which is attested by manuscripts of the γ , δ and π groups and is easy to construe. α_1 and α_2 have *vaṭyā* and *kaṁṭhā* respectively, which may derive from *kaṁṭhyā* (α_3 , ε_1 , ζ_1), but none of these readings makes sense here. η_1 and η_2 have *kāryā*, which is unnecessary because of the main verb in the final verse quarter.

अथ त्राटकम् ।

निरीक्षेत्रिश्चलदृशा सूक्ष्मलक्ष्यं समाहितः ।

अश्रुसंपातपर्यन्तमाचार्यैस्त्राटकं मतम् ॥ ३२ ॥

Now *trāṭaka*:

(32) Concentrating, [the yogi] should look at a small focal point with his gaze fixed until tears fall. Teachers consider this to be [called] *trāṭaka*.

prescript: *atha cett.*] a ζ_1 , *om.* δ_1 **trāṭakam** *cett.*] $\text{troṭakam } \alpha_3$, $\text{traṭakam } \gamma_2$, *om.* δ_1 , $\text{trāṭam } \eta_1$

Most witnesses, including the *ḥyotsnā*, read *jatrūrdhva* in the third verse quarter, which is generally understood as ‘above the collar bones’ or, as Brahmānanda says, the area above the shoulder joints (*jatruṇoḥ skandhasandhyor ūrdhvaṃ uparibhāge*). On problems concerning the interpretation of *jatru*, see MEULENBELD 1974: 465. We have adopted *jatrūrdhva* against the reading of α_1 and α_2 , *hanūrdhva*, ‘above the jaw’, and α_3 , *kaṇṭhordhva*, ‘above the throat’.

अथ त्राटकम्
वङ्गलाविकरणस्थेऽस्मिन्नन्तर्ज्योतिः प्रकाश्यते ।
नेत्ररोगास्तथा तन्द्रा नश्यन्तीत्याह धूर्जतिः ॥

❖ Commentary

The witnesses have many different readings for the first word of this verse. The α manuscripts are split between *modaka* (α_1), *mocaka* (α_2) and *movana* (α_3). Of these, *modaka* is the most likely, if it is understood as a medicinal pill. However this meaning is rare, even in medical literature, as *modaka* is generally used to refer to a small sweet. We have adopted *moṭakam*, which is attested by δ_2 , ε_1 and η_1 , as well as the *Yuktabhavadēva*, and which we understand to mean “destroyer” (*muṭa pramardane*, *Dhātupāṭha* 1.346). BOHTLINGK AND ROTH (s.v.) and MONIER-WILLIAMS (s.v.) give medicinal pill as a possible meaning of *moṭaka* (cf. *modaka*) but it appears that this is mainly an inference drawn only from this verse, where the pill is merely a comparison. Several witnesses have *sphoṭanam* (‘destroying’), which is also possible.

The reading *kapāṭakam* in the second verse quarter is found in most of the witnesses and testimonia and we have adopted it accordingly. The context indicates that it means “shutter” (in the sense of shutting out something), but we have not found any parallel usages of it in this sense.

अथ लौली ।

चालयेच्छुभुना प्रोक्तं तत्र लक्ष्म्यधिदेवता ।

बाह्वनौलिरियं प्रोक्ता जठरानलदीपिनी ॥

❖ Commentary

We have adopted α₁'s readings of *laulī* and *laulika* as the name of this practice in verses 2.34–35 and 2.22 respectively. The vast majority of manuscripts, including α₂, and the most important testimonia support *naulī* or *nauliḥ* but the names *laulika* and *laulikī* do occur in some more recent works, such as the *Hathayogasamhitā* (p. 4), *Gheraṇḍasamhitā* (1.12), *Yogasārasaṅgraha* (pp. 54–55) and *Yogakarṇikā* (p. 56). The root *lul*, “roll”, provides an etymology for *laulī* and the change to *naulī* can be explained by the similarity in Bengali scripts of *la* and *na* (we thank Lubomír Ondračka for this observation).

A video of Mahant Bālyogī Rām Bālak Dās performing *laulī* at Dīrghēśvar Mahādev, U.P. is available in the digital edition.

 $\text{YBhD, sau jayatiḥa nauliḥ HTK}$

❖ **Commentary**

Manuscripts α_1 and α_2 , ε_1 , ζ_1 and π_2 have *tundāgni* (or a very similar reading) in the first verse quarter. This reading is also supported by all of the manuscripts collated for the published edition of the *Haṭharatnāvalī*. The compound *tundāgni* is rare in Sanskrit literature but it was likely used here because the term *tunda* appears in the previous verse, which explains how *laulī* is done. The compound *tundāgni* is synonymous with *udarāgni*, *jaṭharāgni*, *śarīrāgni* etc., which are commonly used in yoga texts to refer to the body's digestive fire. The alternative reading *mandāgni* ('sluggish fire') is reasonably common in contexts of stimulating poor digestion, and may have been introduced early in the transmission to replace the more unusual *tundāgni*.

अथ कपालभातिः ।

भस्त्रावल्लोहकारस्य रेचपूरौ सुसंभ्रमौ ।

कपालभातिर्विख्याता कफदोषविशोषिणी ॥ ३६ ॥

Most witnesses and the testimonia have *maulir iyaṃ* in the fourth verse quarter, which expresses the idea that *lauḷī* was thought to be the best of the *ṣaṭkarma*, and the assonance of *lauḷī* and *maulī* may have been intended. The alternative reading of *mūlam iyaṃ* in ζ_1 and η_1 would suggest that *lauḷī* is necessary for the other practices, which does not seem to be the case because, according to *Haṭhapradīpikā* 2.21, the *ṣaṭkarmas* are more like therapeutic interventions.

अथ भस्त्रा

लोहकारस्य भस्त्रेव रेचपूरौ तु वेगतः ॥

पुनः पुनः प्रकुर्वीत स्थिरमूर्ध्ना प्रयत्नतः ।

स्थिरभस्त्रेति च ख्यात योगिनां सिद्धिदायका ॥

❖ Commentary

The word *bhāti* is derived from *bhastrī* (TURNER 1966: 537, entry 9424).

षट्कर्मभिर्गतस्थौल्यकफमेदोमलादिकः ।

प्राणायामं ततः कुर्यादनायासेन सिध्यति ॥ ३७ ॥

(37) The person whose excess weight, phlegm, fat, impurities and the like have been removed by the six techniques should then perform breath-control. It is perfected without effort.

37a *ṣaṭkarmabhir gata* $\alpha_1 \gamma_1 \varepsilon \zeta_1 \eta_2 \pi_2 \pi_\omega$] *ṣaṭkoṇabhigataṃ* α_2 , *ṣaṭkarmanirgatā* α_3 , *ṣaṭkarmabhir gataṃ* γ_2 , *ṣaṭkarmanirgata* $\delta_1 \zeta_3 \eta_1 \chi$, *ṣaṭkarmanirata* δ_2 , *ṣaṭkarmābhigata* π_1 **sthaulya** $\alpha_1 \gamma_1 \delta \varepsilon_2 \zeta \pi_2 \pi_\omega \chi$] *sthaulyaṃ* $\alpha_2 \varepsilon_1 \eta_1 \pi_1$, *sālyā* α_3 , *sthaulyaḥ* γ_2 **37b** *kapha cett.*] *kaphā* γ_1 , *kathaṃ* ε_1 **medo cett.**] *doṣa* $\alpha_2 \chi$, *meda* ε_2 , *bhedo* η_1 **malādikaḥ** $\alpha_1 \delta_2 \varepsilon_2 \zeta \pi_2 \pi_\omega \chi$] *malādikaṃ* $\alpha_2 \varepsilon_1 \pi_1$, *malādhikaḥ* $\alpha_3 \delta_1$, *malojhitaḥ* γ_1 , *malojitaḥ* γ_2 , *malādhike* η_1 , *balādhikaḥ* η_2 **37d** *sidhyati cett.*] *śudhyati* $\alpha_1 \delta_1 \pi_\omega$, *śuśyati* ε_2 , *śusidhyateḥ* α_2

η_2 and other manuscripts have *kuryāt savyāpasavyataḥ* ('left and right') instead of *reCAPūrau sasambhramau*. Although one might infer that *savyāpasavyataḥ* is referring to performing the skull bellows breathing alternately through the left and right nostrils, it appears to be a secondary reading because there is no indication of what is moving to the left and right. Such a method of alternate nostril breathing is explained as a variation of *kapālabhāti* in the *Haṭhayogasamhitā* (p. 14):

इडया पूरयेद्वायुं रेचयेत्पिङ्गलाख्यया ।
पिङ्गलया पूरयित्वा पुनश्चन्द्रेण रेचयेत् ।
पूरकं रेचकं कृत्वा वेगेन न तु चालयेत् ॥

In the second verse quarter, we have adopted the reading of the α manuscripts, *susambhramau* ('great speed'). The compound *susambhrama* is not attested elsewhere as an adjective, whereas the alternative reading *sasambhrama* ('fast') is commonly used. We have retained *susambhramau* because it seems grammatically possible and is also well attested by other manuscript groups.

[2.37]

cittam YBhD] vṛttau YCM

vikṣā] drṣṭir YCM YBhD

❖ Commentary

We have adopted the reading *vikṣā* in the third verse quarter, which is an emendation of α₁ and α₂'s *vikṣed*. The verb *vikṣed* is likely an error as the other *yāvat* clauses have been written as nominal phrases. The reading *vikṣā* occurs in the same verse of the six-chapter version of the *Vivekamārtaṇḍa*, which sometimes preserves old readings of that text.

❖ Commentary

The term *uḍḍiyāna* is spelt various ways among manuscripts of the *Haṭhapradīpikā* and other texts. Generally speaking, the α group have *uḍḍiyāna*, π *uḍḍiyāna*, γ and δ *uḍḍiyāna* and the *Jyotsnā uḍḍiyāna*. Other spellings, such as *uḍyāna* and *uḍiyāna*, also occur. We have adopted the spelling of α except in cases where the metre of a verse requires otherwise, as in 2.45d (*uḍḍiyānakah*). As noted by SANDERSON (2007: 265), diverse spellings of the place by the same name occur, including *Uḍḍiyāna*, *Oḍḍiyāna*, *U/Oḍiyāna*, *U/Oḍyāna*, or *U/Oḍḍayana*.

❖ Commentary

As is clear in the source text, the *Gorakṣaśataka*, the three techniques alluded to here are *mūla-bandha*, *jālandharabandha* and *uḍḍiyānabandha* respectively (on which see chapter three).

The stem form *brahma* is found in various compounds in the text. We understand it to refer to Brahman, the absolute, in all instances other than *brahmagranthi*, where we take it to mean the deity Brahṁā. See MALLINSON 2007: 205 n. 240.

अपानमूर्ध्वमुत्थाप्य प्राणं कण्ठादधो नयेत् ।
योगी जराविमुक्तः सन् षोडशो वयसा भवेत् ॥ ४७ ॥

(47) The yogi should raise up *apānavāyu* and lead *prāṇa* down from the throat. Freed from ageing, he becomes sixteen years old.

तत्र सूर्यभेदनम् ।

आसने सुखदे योगी बद्धा वज्रासनं ततः ।
दक्षनाड्या समाकृष्य बहिःस्थं पवनं शनैः ॥ ४८ ॥
आ केशाग्रान्नाखाग्रान्च निरोधावधि कुम्भयेत् ।
ततः शनैः सव्यनाड्या रेचयेत्पवनं सुधीः ॥ ४९ ॥

Of these [breath retentions], piercing the sun [is now taught]:

(48–49) The yogi should sit in *vajrāsana* on a comfortable mat, then slowly draw in external air through the right nostril, and hold the breath as far as the tips of the hair and nails until cessation [of the breath]. The wise man should then exhale the breath slowly through the left nostril.

 सव्यनाड्या ततो मन्दं रेचयेत्पवनं सुधीः ॥

❖ Commentary

An antecedent to the idea of *prāṇāyāma* affecting the whole body (i.e. as far as the tips of the hair and nails) occurs in the *Baudhāyanadharmasūtra* (4.1.23):

आवर्तयेत्सदा युक्तः प्राणायामान्पुनः पुनः ।
 आ केशान्तान्नाखाग्रान् तपस्तप्यत उत्तमम् ॥

[The yogi] who is constantly engaged [in practice] should repeat breath retentions again and again. Extreme heat burns as far as the tips of the hair and nails.

The meaning of *nirodhāvadhi* is not entirely clear, but all sources and the *Jyotsnā* (2.49) agree on this reading. The original reading may well have been *virodhāvadhi*, “until it is uncomfortable”, which makes better sense but we have decided not to emend accordingly. The problem with *nirodhāvadhi* is that to practise *kumbhaka* “up to cessation (*nirodha*)” seems to suggest that cessation is not that of the physical breath, which by definition ceases in *kumbhaka*, but of the vital wind (*prāṇa*) within the body. By citing a verse from an unnamed text, Brahmānanda seems to understand this verse as saying that the breath should very carefully (*atiprayatnena*) be held as far as the extremities of the body so that it does not damage the body by exiting through the hair follicles:

हठाच्चिरुद्धः प्राणोऽयं रोमकूपेषु निःसरेत् ।
 देहं विदारयत्येष कुष्ठादि जनयत्यपि ॥

When the breath has been stopped forcefully, it flows out through the hair follicles. This destroys the body and also causes skin diseases and the like.

कपालशोधनं वातदोषघ्नं कृमिदोषहम् ।

❖ Commentary

Both *doṣaham* and *doṣahr̥t* are well attested and possible. We have favoured the former because the α reading (*doṣajam*) appears to be a corruption of it, and *ha* is from the same root as the verb in the source text (i.e. *niḥanti*).

❖ Commentary

The use of *lagati* without a locative or direct object (as found in the source text, the *Gorakṣa-śataka*) is supported by the paraphrase of the verse in the *Haṭhatattvakaumudī* (10.7). Most witnesses (including α) have the phrase *kaṇṭhāt tu hṛdayāvadhi*, which we have understood to have the sense of a locative as it specifies the place within the body where the contact occurs.

गच्छता तिष्ठता कार्यमुज्जाय्याख्यस्तु कुम्भकः ॥

❖ Commentary

Nearly all the manuscripts have *nāḍījalodarādhātu*, which is difficult to understand because of *jala* ('water') in this context and *ā+dhātu* within the compound. This reading is also present in the transmission of the source text for the verse, the *Gorakṣaśataka*, and most of the testimonia. Given the strength of the evidence, we have adopted the reading and understood it as a list of things in which diseases (*doṣa*) may occur. This is consistent with Brahmananda's explanation (*Jyotsnā* 2.53). He explains *ā+dhātu* as *samantāt ... dhātavaḥ* ('the bodily constituents altogether').

Two later sources attempt to solve these problems. Some of the manuscripts of the *Haṭharatnāvalī* read *nāḍījālo* ('in the network of channels'), which makes better sense than *nāḍījalo*, as *jala* usually means water rather than bodily fluid. Brahmananda understands *jala* as water that has been drunk (*pītam udakam*), which seems far-fetched as the site of a disease. Two old manuscripts have *dare dhātu*, which avoids the need to read *darādhātu*. If one were to conjec-

अथ सीत्का ।

ture *nāḍījālodare*, the line would mean, ‘it cures diseases of the bodily constituents inside the network of channels.’

For the idea of *doṣas* being in *dhātus* see *Tantrāloka* 28.283cd, where Abhinavagupta says that worldly concepts arise as a result (*dhātudoṣāc ca saṃsārasaṃskārās te ...*). In the *Īśvara-pratyabhijñānavimarśinī* Abhinavagupta notes that they are also the source of physical disorders (2.15 *dhātudoṣakṛtaṃ mūrccā*).

The name *ujjāyī* may be a Prakrit form of *uddhmāyī* from the verb *ud-dhmā*, ‘to blow out’. We thank Diwakar Acharya for this suggestion.

❖ Commentary

There is division between *śītkām* and *sītkām* in all the manuscript groups of the *Haṭhapradīpikā* (note that the likely reading in the source texts was *hikkām*). The result of becoming a second god of love may be connected with the sound *sīt*, which is said to be made during sex in the *Kāmasūtra* (2.7.4–19).

This verse's source texts are from Kaula tantric milieus and this is reflected in the result of becoming one with the circle of yoginīs mentioned in the next verse.

❖ Commentary

The aiśa compound *bhuvimaṇḍale*, which is attested at *Mañjuśrīmūlakalpa* 45.221, is likely the original reading here. The alternative *bhūmi* is well-attested and so the change may have happened early in the transmission.

एवमेव उक्तं च ।

रसनातालुमूलेन यः प्राणं सततं पिबेत् ।

अब्दार्धेन भवेत्तस्य सर्वरोगपरिक्षयः ॥ ५७ ॥

And the very same has been taught [as follows]:

(57) He who continuously takes in the breath through the tongue and the root of the palate has all his diseases cured in half a year.

prescript: **evam eva uktaṃ ca** $\alpha_1 \varepsilon_1 \eta_1$] *om.* $\alpha_2 \gamma \delta \pi_2 \chi$, **evam evoktaṃ gorakṣakaḥ** (**evam evoktaṃ ca dittography**) α_3 , **evam evoktaṃ ca** ε_2 , **evam eva uktaṃ** ζ_1 , **gorakṣeṇaivam evoktaṃ** ζ_3 , **uktaṃ ca** η_2 , **evam eva tad uktaṃ** π_1 , **uktaṃ** π_ω **57 om.** χ **57a mūlena cett.]** **mūlaṃ ca** α_2 , **yogena** $\gamma \pi_2$ **57b prāṇam cett.]** **prāṇāḥ** γ_1 , **prāṇa** $\eta_2 \pi_\omega$ **57c abdārdhena cett.]** **abdordhena** α_3 , **abardārdhe** π_1 **57d sarvarogaparikṣayaḥ cett.]** **parikṣayaḥ** η_1 , **sarvāṃgasusthirakriyaṃ** η_2

❖ Commentary

The compound *rasanātālumūlena* is difficult to understand. In his *Haṭhasaṅketacandrikā* (f. 79r–79v), Sundaradeva says that the external air strikes the root of the tongue and palate and the upper part of the uvula (*atra muhū (mūhū codex) rasanātālumūlāhataṃ ghaṇṭikordhva-bhāgāhataṃ bahiṣṭhāvāyuyam vidhāya pibet ity arthaḥ*). More helpful are the remarks of the commentator of the *Yogataraṅgiṇī* (2.39). He says that a hole or cavity (*vivara*) is made by the root of the palate with the help of the tongue. The yogi breathes through it (*evam rasanātālumūlena rasanā jihvā tatsahāyabhūtātālumūlena kṛtaṃ yad vivaraṃ, tena kṛtvā yaḥ yogī prāṇam anilaṃ prāṇavāyuyam pibet pūrayet, tasya yogino 'bdārdhena ṣaṇmāsena sar-varogāṇām nāśaḥ kṣayo bhavet/*).

अथ शीतली ।

जिह्वया वायुमाकृष्य पूर्ववत्कुम्भनादनु ।

शनैस्तु घ्राणरन्ध्राभ्यां रेचयेदनिलं सुधीः ॥ ५८ ॥

Now *śitalī*:

(58) The wise man should draw in air through the tongue and after retaining the breath as before gradually exhale through the nostrils.

prescript: *atha śitalī cett.*] *atha śitalā* α₂, *śitalī* γ, *om.* δ₁, *atha śitalipadmam* ε₂, *tathā śitalī* η₂ **58a** *jihvayā cett.*] *jihvāyā* α₂, *jihvāyām* α₃, *jihvā* η₁ **58b** *pūrvavat cett.*] *pūrve* ce α₂, *pūrayan* ε₂, *pūrvam* ca η₂ **kumbhanād anu** α₁επ₁] *kumbhanād agu* α₂, *kumbhayet tataḥ* α₃, *kumbhakādane* γ₁, *kumbhakād anu* γ₂δζπ₂, *kumbhasāadhanam* ηπ_ωχ **58c** *śanais tu cett.*] *śanaiḥ* su ζ₃, *śanakair* χ **ghrāṇa cett.**] *prāṇa* η₂ **58d** *anilaṃ cett.*] *pavanam* χ **sudhiḥ** γ₂δεπ₂χ] *sudhī* α₁α₂γ₁π₁π_ω, *śanaiḥ* α₃ζ₁η, *tataḥ* ζ₃

The idea of breathing through a hole between the root of the palate and tongue might have been intended by the parallel reading of the *Yogacintāmaṇi*: *rasanātālyogena* ('by joining the tongue and palate'). We have thus translated *rasanātālyumūlena* as 'through the tongue and root of the palate'. It could also imply that the tongue is turned up and back to touch the root of the palate to make a hole that one breathes through (when the breath is taken in through the mouth). The *Kumbhakaṇṭhapaddhati* (137ab) states this more clearly:

रसनामुन्मुखीकृत्य सीत्कारं कुर्वता मरुत् ।

[The yogi] turns the tongue upwards and takes in the breath while making a *sīt* sound.

A similar practice is also described in *Śivasamhitā* 3.80:

रसनां तालुमूले यः स्थापयित्वा विपश्चितः ।

पिबेत्प्राणानिलं तस्य रोगाणां संक्षयो भवेत् ॥

When the wise [yogi] places the tongue at the root of the palate and takes in the Prāṇa breath, his diseases are cured.

❖ Commentary

An antecedent to a cooling practice involving the tongue can be found in the *Kaulajñānanirṇaya* (6.23–24), which mentions a point between the two front teeth that is cool to touch with the tongue:

द्वौ राजदन्तमध्यस्थं बिन्दुरूपं व्यवस्थितम् ।
अमृतं तं विजानीयाद्वलीपलितनाशनम् ॥
शीतलस्पर्शसंस्थाने रसनां कृत्वा तु बुद्धिमान् ।
वलीपलितनिर्मुक्तः सर्वव्याधिविवर्जितः ॥

There is a point located between the two 'royal teeth' (*rājadanta*). One should know

अथ भस्त्रिका ।

ऊर्वोरुपरि चेद्धत्ते उभे पादतले तथा ।

पद्मासनं भवेत्सम्यक् सर्वपापप्रणाशनम् ॥ ६० ॥

Now *bhastrikā*:

(60) If [the yogi] places the soles of both feet on the thighs, the lotus pose, which destroys all bad deeds, duly arises.

prescript: *atha bhastrikā cett.*] *bhastikā* γ_1 , *bhasrikā* γ_2 , *om.* δ_1 , *atha bhastikā* δ_2 , *atha bhrastrikā* ε_1 **60a** *ūrvoor cett.*] *jānvor* ε **ced dhatte** $\alpha_1\alpha_2\varepsilon_1\zeta_1$] *saṃdhatte* $\alpha_3\eta_1$, *saṃsthāpya* $\gamma\delta\zeta_3\pi_2\chi$, *yo dhatte* ε_2 , *vai dhatte* $\eta_2\pi_\omega$, *veddhamte* π_1 **60b** *ubhe cett.*] *yathā* α_3 , *śubhe* χ **tathā** *cett.*] *yadā* $\alpha_1\alpha_2$, *ubhe* $\alpha_3\chi$, *sadā* π_ω **60c** *samyak cett.*] *satya* α_3 , *etat* $\varepsilon\pi_2\chi$

this to be [the place of] nectar that destroys wrinkles and grey hair. Putting the tongue in the place cool to the touch, the wise man becomes free of wrinkles and grey hair and devoid of all diseases.

We wish to thank Shaman Hatley for the reference and translation.

❖ Commentary

Apart from α₁, the reading *śvasanam* is not well attested. We have adopted it because it provides a plausible subject for the verb *lagati* (i.e. ‘breath comes into contact with’). Most manuscripts, as well as the *Īyotsnā*, have *sasvanam* (‘with sound’), which requires that one infer that the breath is the subject.

❖ Commentary

Only three of the collated witnesses (γ_2 , ζ_3 and δ_2) have *madhyātarjanibhyāṃ* (‘with the middle and index fingers’) and this reading is not well attested by the manuscripts of the source text and testimonia. To hold the nose without the middle and index fingers is consistent with the way alternate nostril breathing is done in modern yoga (e.g. Iyengar 1991: 443–444) as well as in some ritual manuals, as for instance in Sāhib Kaula’s *Śyāmāpaddhati: dakṣānāmākaniṣṭhābhyāṃ vāmaṃ puṭaṃ ca niruddhya* (see Hanneder: forthcoming). However, the reading of many manuscripts suggests that the nose was held by all the fingers of both hands, except the index fingers (*nāsikāmadhye tarjanibhyāṃ vinā*), which seems highly impracticable, or that the nose was held by only the index fingers of both hands (*nāsikāmadhye tarjanibhyāṃ tathā*). It is likely that scribes changed *madhyātarjanibhyāṃ* to *madhye tarjanibhyāṃ* or *madhyaṃ tarjanibhyāṃ* because of the *pāda* break.

❖ Commentary

In the first verse quarter, we have adopted *vakra* (ε_1), which is close to the reading of the α group (i.e. *cakram*). In compound with *bhāvaghnam* (α_1 , α_3 etc.) and following the awakening of Kuṇḍalinī, *vakra* makes good sense. According to the manuscripts available to us, the reading of the *Goraḥśaśataka* (*vajram*) is not in the transmission of the *Haṭhapradīpikā*.

❖ Commentary

In the first verse quarter, nearly all of the manuscripts, including the α group, have *gātrasamudbhūta* or *gātrasamudbhūtaṃ* (‘arisen in the limbs/body’). Both are rather meaningless here. In the first case, the three knots are in the central channel rather than the body. In the second case, it is redundant to say that the breath retention has arisen in the body. It is possible that *samyaggātra* is a corruption of *guṇatraya*, which is attested by the manuscripts of the source text, the *Gorakṣaśataka*, two of the available manuscripts of the *Haṭhapradīpikā* (N21, Bo1) and the *Haṭhasaṅketacandrikā*. In the *Gorakṣaśataka*, it is stated clearly that each of the knots arises from one of the three *guṇas*: *brahmagranthi* from *rajas* (78cd), *viṣṇugranthi* from *sattva* (79cd) and *rudragranthi* from *tamas* (80cd). With the verses on *bhastrā* from the *Gorakṣaśataka* having been extracted without the context of the knots and *guṇas*, the meaning of *guṇatrayasamudbhūtagranthitraya* (‘the three knots that have arisen from the three *guṇas*’) appears to have been forgotten early in the transmission of the *Haṭhapradīpikā* and the compound altered as a result. Alternatively it could be that Svātmārāma deliberately changed the compound in order to remove the reference to the *granthi*s being produced from the *guṇas*.

❖ Commentary

In the first two *pādas* we are understanding the usually masculine *pūraka* and *recaka* to be neuter nominatives. When explaining this verse, Brahmananda (*Jyotsnā* 2.68) supplies the gerund *kṛtvā* with *pūrakaṃ* and *kuryāt* with *recakaṃ*, but it is unlikely that the author of the verse intended this.

The compound *vegodghoṣaṃ* is rather unusual. We have understood it according to the commentator Bālakṛṣṇa's gloss: 'an inhalation in which sound is produced by force' (*vegena sañjāta udghoṣo yasmin pūrake*).

Witnesses of the γ and δ branches of the stemma, and Brahmananda, have *ānandalilā* instead of *ānandamūrchā*, perhaps in order to avoid the repetition of *mūrchā*, which is also found in the following verse.

यथेष्टं पूरयेद्वायुं बद्धे जालन्धरे दृढे ।

हृदि धृत्वा जले सुखा प्लावनीकुम्भको भवेत् ॥

❖ Commentary

Although the important manuscript groups, including α, have this verse on *plāvanī* (sometimes spelt *plāvinī*), there is substantial evidence to suggest that *plāvanī* was incorporated into the *Haṭhpradīpikā* and its group of eight breath retentions (*kumbhaka*) sometime after the text was initially composed. Firstly, in most manuscript groups, the name *plāvanī* is absent from the list of *kumbhaka*s in 2.44. The better-attested reading, supported by α, includes *kevala* as the eighth *kumbhaka* and omits *plāvanī*. Furthermore, most of the principal testimonia, namely the *Haṭharatnāvalī*, *Yogalakṣaṇāvalī* and *Yuktabhavadeva*, likewise include *kevalakumbhaka* and omit *plāvanī* in the list of eight *kumbhaka*s. Secondly, the heading *atha plāvanī* is absent from the α group and many other manuscripts. Instead, the α manuscripts have *iti plāvanīkumbhakaṃ* after the verse on *plāvanī*, which is not consistent with the other *kumbhaka* descriptions. Thus, *plāvanī* was probably not part of the text composed by Svātmārāma and was introduced at an early stage in the transmission of the *Haṭhpradīpikā*.

We have understood *udgāramāruta* to refer to the breath of eructation, i.e. the *nāga* breath as described in e.g. *Vivekamārtaṇḍa* 36.

अथ केवलकुम्भकम् ।

❖ Commentary

In the first *pāda*, we have adopted a reading similar to that of the *Vasiṣṭhasaṃhitā*, which is very close to that of δ₁ (*ārecyāpūrya yat kuryāt*) and δ₃ (*ārecyāpūrya yaḥ kuryāt*) and similar to α₂'s hypometrical reading (*recapūrya y[a]t kāryaḥ*). It appears that the relative pronoun dropped out of the first verse quarter early in the transmission of the *Haṭhāpradīpikā* and scribes have tried in various ways to restore some sense, with several emending to *recakaḥ pūrakam kāryaḥ*. Cf. MARCINOWSKA-ROSÓL & SELLMER 2021, p. 102f.

न सिध्यति ततो युग्ममा निष्पत्तेः समभ्यसेत् ॥ ७७ ॥

(77) Rājayoga does not succeed without Haṭha nor Haṭha without Rājayoga so one should practise them both together until [the] *niṣpatti* [stage].

Cf. *Haṭharatnāvalī* 1.19

हठं विना राजयोगो राजयोगं विना हठः ।
व्याप्तिः स्यादविनाभूता श्रीराजहठयोगयोः ॥

Cf. *Śivasamhitā* 5.222

हठं विना राजयोगो राजयोगं विना हठः ।
न सिध्यति ततो युग्ममा निष्पत्तेः समभ्यसेत् ।
तस्मात्प्रवर्तते योगी हठे सद्गुरुमार्गतः ॥

[middle line not in mss. I, III, IV, VII, IX, X, XII, XIV–XVI]

❖ **Commentary**

On the *niṣpatti* stage see 4.26–28.

कुम्भितप्राणरेचान्ते कुर्याच्चित्तं निराश्रयम् ।

एवमभ्यासयोगेन राजयोगपदं व्रजेत् ॥ ७८ ॥

(78) At the end of exhaling the retained breath, [the yogi] should make the mind supportless. By practising in this way he reaches the state of Rājayoga.

कुम्भकात्कुण्डलीबोधः कुण्डलीबोधतो भवेत् ।

अनर्गला सुषुम्णा च हठसिद्धिश्च जायते ॥ ७९ ॥

(79) As a result of retaining the breath, Kuṇḍalinī awakens; as a result of the awakening of Kuṇḍalinī, Suṣuṃṇā becomes free of blockages and success in Haṭha arises.

78a *kumbhita* ζ₁π₁] *kumbhitaḥ* α₁γ₁ζ₃, *kumbhaka* α₂δ₁η₂χ, *kumbhataḥ* γ₂, *kumbhaṃ* δ₂, *kumbhakaḥ* ε₁η₁, *tad* *etat* π₂, *kumbhata* π_ω **recānte** *cett.*] *recakānte* δ₂, ..*cānte* η₂, *rodhānte* χ

kumbhita] *kumbhitaḥ* YBhD HTK

nirāśrayam HTK] *nirāmayam* YBhD

rājayogapadaṃ vrajat YBhD] *rājayogaṃ labhet punaḥ* HTK

❖ Commentary

The reading *kumbhitaḥ*, which is attested by α₁ and the testimonia, does not make sense here because the subject must be the yogi (*prānaḥ* would be unmetrical). In other texts, the word *kumbhita* is used to qualify the breath and means ‘retained’ (e.g. *Yogabīja* 94, *Kumbhakapaddhati* 127, *Yuktabhavadēva* 8.32 etc.).
