Note: For the conventions specific to this edition, please refer to the introduction § 5.3.4. The grey-scaled verses are usually only found in manuscript groups ε , ζ , η , π , and χ . Notes about the omission or inclusion of these verses are only provided when there is a deviation from this pattern.

❖ Commentary

The greyscale verses at the beginning of chapter four are found in all collated manuscripts except those of the α group. These verses appear to have been added at an early stage in the transmission of the *Haṭhāpradīpikā* in order to create a new opening for this chapter. The revised beginning opens with a *maṅgala* verse of the kind typically found at the start of a text. The second verse, which is from the *Goraḥśaśataka*, introduces the topic of *samādhi*. In this expanded version, two verses listing the synonyms of *rājayoga* then follow. In the α group, however, these verses are placed at 4.32–33, and some manuscripts, such as π_2 , place them at both locations. Although the remaining additional verses relate to various themes within chapter four, when they are read together they constitute a loosely organised collection on *samādhi*, *rājayoga*, the importance of the guru, the dissolution of the breath, *Suṣumṇā*, and related topics.

In contrast to this revised opening, the α group begins with a cohesive discussion on absorption (4.1–3) that transitions to the gaze (4.4) and a brief discussion of *sāmbhavi* and *khecārī mudrās* (4.5–4.8). The main topic of the chapter, which is meditating on the internal sound (*nādānusandhāna*), begins at 4.12 in the α group (whereas in other groups it begins after fifty or so verses). The emphasis on *nādānusandhāna* in the fourth chapter of the α group is consistent

अथेदानीं प्रवक्ष्यामि समाधिक्रममुत्तमम् ।
मृत्युघ्नं तु सुखोपायं ब्रह्मानन्दकरं परम् ॥ २ ॥

(2) So now I will teach the best way to *samādhi*. It destroys death, has an easy method and brings about the bliss of Brahman.

2 also included in γδ **2a** *athedānīm cett.*] athekṣanīm γ₁, athodānī π_ω **2b** °m *uttamam* εζη₂πχ] lakṣaṇam γδ **2c** *tu* γδ₂επ] su δ₁, ca ζη₂χ **2d** *param cett.*] sadā ε₂

with the statement in verse 1.56 that *nādānusandhāna* is the fourth component of Haṭhayoga.

Its likely that the term *nirañjanapada* was understood here as *samādhi* because *nirañjana* is included in a list of synonyms of *samādhi* later in this chapter (4.32 = X4.3).

The triad *nāda*, *bindu* and *kalā* occurs in earlier works, in particular Śaiva Tantras, where it appears in contexts of enunciating mantras (*mantroccāra*, e.g. *Kubjikāmatatantra* 7.65, *Jñānārṇavatatantra* 2.4, *Īśānaśivagurudevapaddhati* 18–110, etc.) and sometimes qualifies deities (e.g. *Parākhyatantra* 5.156ab) and gurus (e.g. *Gurugītā* 64). The context can change the meaning of these terms, so we have chosen not to translate them. For a discussion of their various meanings, see *Tāntrikābhidhānaśāstra* vol. 2: 68–73; vol. 3, 277–279.

❖ Commentary

The third quarter of this verse has been subject to much revision in the *Haṭhpradīpikā* and the source text, the *Amanaska*. Unlike the manuscripts of the *Amanaska*, those of the *Haṭhpradīpikā* transmit *sthirā*, *sthitih* or *stHITE* after *muktiḥ* or *mukti*. We have adopted *muktiḥ sthirā*, the reading of ε , an important group for the grey-scaled verses.

❖ Commentary

The vocative form of *amaraugha* is well attested and closely related to two other variants, *amarogha* and *amaraughi*. The term *amaraugha* appears in a list of synonyms for *samādhi* in *Haṭhapradīpikā* 4.32. We have adopted this reading as it is not unprecedented for an author to pay homage to *samādhi* (e.g. *Haṭhapradīpikā* X4.70) and to other yoga techniques (e.g. *Yogatārāvalī* 4a: *nādānusandhāna namo 'stu tubhyaṃ*). It is possible that this verse was inserted here together with the next one, which also contains the term *amaraugha*.

❖ Commentary

The second line of this verse is problematic in both the source text (the *Amaraughā*) and the manuscripts of the *Haṭhāpradīpikā*. For the last *pāda*, we have adopted the closest reading to that of the source text but cannot make sense of it, so have cruxed it. In addition to the tentative translation we have made, one could understand *amaraughavajrolī* and *āśājivite* as dual forms: “... then *amaraughā* and *vajrolī* arise, and there is hope and life too”. The line was rewritten in η₂ and other manuscripts, as well as the *Jyotsnā* (4.14cd), to include the two variations of *vajrolī*, namely *amarolī* and *sahajolī*.

(17) How can knowledge exist, when the mind is alive, O goddess?
 So long as the breath lives, the mind does not die. Breath and mind:
 [when] this pair goes to dissolution, a man attains liberation; in no
 way [does any] other [man].

Disregarding the technical meaning of the terms, the verse plays with apparent contradictions (*virodhābhāsa*) in saying literally that, when mercury and the breath are unconscious, they cure disease; when dead, they restore life and, when bound, they enable one to fly up.

❖ Commentary

The manuscripts attest two versions of the second line. It appears that the reading of ε, ζ and π groups, which we have adopted, was changed to remove the first person pronoun. The modified reading is prevalent in the γ and δ manuscripts (*manaḥprāṇalayānando nāpi kaś cit vibhidyate*).

❖ Commentary

This and the next verse (X4.41–42) are from the South Indian recension of the *Amanaska*, a later rewriting of that work which incorporates these verses in an additional passage on Tārakayoga, which is presented in this recension as the preliminary yoga (*pūrvayoga*). It appears to have been added here to elaborate on the meditation of fixing the gaze that is taught in 4.4–7 = X4.36–39.

This verse is not in the α manuscripts and was probably added because it elaborates on the

(44) [The yogi] should not worship the *liṅga* by day, nor should he worship it by night. He should worship the *liṅga* constantly, by suppressing day and night.

gaze. In the *Candrāvalokana* (the source text) and the *Anubhavanivedana*, it follows X4.39, which may explain its position in the γ and δ groups. The attentive reader will notice that we have decided against manuscripts that agree with the source text. The reason is based on our stemmatic considerations. Cumulative evidence supports the origin of the additional verses at the beginning of the fourth chapter in the hyparchetype of the ε manuscripts. We suspect these verses contaminated the π group's copies very early. To complicate matters, the scribe was familiar with the source text and corrected the readings accordingly.

❖ Commentary

The manuscripts transmit readings for the last verse quarter that either contradict or repeat the statements in the first line. This problem likely occurred through some kind of dittographical error. We have therefore adopted the reading of *Jyotsnā* 4.42d (*nirodhataḥ*), which is the same as the source text.

❖ Commentary

This verse may not be referring to the cavity in which the tongue is placed but perhaps to a more esoteric sense based on the meaning of *pañcasrotas* as the five streams of tantric Śaiva teachings, which in this case generate knowledge. On *pañcasrotas*, see *Tāntrikābhidhānakośa* 2013, vol. 3: 361.

[X4.46]

(47) The mind moves (*carati*) in space (*khe*) because the tongue moves (*carati*) in space (*khe*). That is why this seal is called *Khecarī* [and] is worshipped by the Siddhas.

(48) At the juncture of *Idā* and *Pīṅgalā*, the void devours the breath. *Khecarīmudrā* abides there. This is undoubtedly true.

❖ Commentary

The reading *tale* is suspect, as is *nirālabhāntare*, the conjecture of Brahmānanda.

The *vyomacakra* ('the *cakra* of the void') is also mentioned in a verse added to some later recensions of the *Haṭhapradīpikā* (see 3.34*1), which states that *vyomacakra* is another name for *khecariṃudrā*. This verse derives from a passage in the *Jñānasāra* (2.1–5) that discusses *khecari*, as well as contracting the throat (cf. the *jālandhara* lock), in relation to three *cakras*; *vyomacakra*, *madhyacakra*, and *mūlacakra*. For further discussion, see the commentary on 3.69.

In *Jyotsnā* 4.45, Brahmananda states that the *vyomacakra* is associated with all the voids in the middle of the brow (*bhrūmadhye sarvakhānām samanvayāt*) and, in the *Haṭhasaṅketacandrikā* (f. 129v), Sundaradeva says that it is called the Brahmarandhra, which is between *Idā* and *Pīṅgalā* (*idāpīṅgalāntargataṃ brahmarandhrākhyam vyomacakraṃ tat khecarimudrām śaktim kuryād ...*).

sā mayodbheditā vāmā sāksāc ca] *sā mayā viditā yā māyā sāksāc YSS*

❖ Commentary

The referent of *mayā* is unspecified, and no source text has been identified. We assume it refers to the speaker, who might be Śiva. The ϵ manuscripts have *māyodbheditā* for *mayodbheditā*, but it is hard to make sense of this. If correct, *udbheditā* would more likely mean “produced” or “made manifest”. Alternatively, the first line of this verse could be referring to *khecarīmudrā*, in which case its being produced by *māyā* would make more sense. In the second line, Brahmananda’s reading *suṣumnām* is tempting. The line would then mean, “[The yogi] should fill *Suṣumnā* with divine breath through the rear opening”.

❖ Commentary

It is hard to make sense of *sūryāṅge* here ('on the side of the sun?'). The terms *sūryāṅge* and *candrāṅge* occur in the third chapter (3.15) in the sense of the right and left sides of the body, respectively. However, this meaning does not seem relevant here. The variant readings with *pavane/pavano* are not clear either, so we have cruxed the fourth verse quarter.

(67) As a result of abandoning the things that are to be known, the mind attains dissolution. When the mind has attained dissolution, liberation (*kaivalyam*) remains.

लयो लय इति प्राहुः कीदृशं लयलक्षणम् ।

(68) “Dissolution, dissolution”, they say. What kind of characteristics does dissolution have? Because subliminal impressions do not arise again, dissolution is the forgetting of the objects of the senses.

❖ Commentary

This verse may have been inspired by the *Mokṣopāya* (e.g. 1.2.2).

एवं नानाविधोपायाः सम्यक्स्वानुभवान्विताः ।
समाधिमार्गाः कथिताः पूर्वाचार्यैर्महात्मभिः ॥ ६९ ॥

(69) Various methods like these, which are understood properly through personal experience, have been taught as paths to *samādhī* by magnanimous teachers of former times.

अथ विश्रान्तिः ।

Now, Cessation [of the Mind]:

सुषुम्णायै कुण्डलिन्यै सुधायै चन्द्रमण्डले ।
मनोन्मन्यै नमस्तुभ्यं महाशक्तिचिदात्मने ॥ ७० ॥

(70) Homage to Suṣumṇā, to Kuṇḍalinī, to the nectar in the orb of the moon, to the mind beyond mind state, to you whose nature is consciousness, the great Śakti.

अशक्यतत्त्वबोधानां मूढानामपि संमतम् ।
प्रोक्तं गोरक्षनाथेन नादोपासनमुच्यते ॥ ७१ ॥

(71) The cultivation of the inner sound taught by Gorakṣanātha [and] approved even for foolish people unable to understand the highest reality is [now] taught.

❖ Commentary

The term *nirañjana* can refer to the highest deity or the highest state of mind (see HP 4.32/X4.3 where it is said to be a synonym of *samādhi*). Here it is likely to mean the deity because of *deva nirañjanaḥ* ('perfect deity') in X4.114.

The compound *manamārutau* with the *aīśa* form *mana* is attested in both the ε and η groups. Cf. X4.59b *manamadhyagām* (in a verse taken from the *Candrāvalokana*).

❖ Commentary

The collated manuscripts have *avadhyaḥ* in both the first and second verse quarters. Although *avadhyaḥ* can make sense in both quarters, the repetition appears to be a dittographical error that changed *avedyaḥ*, which is close to the reading of the source text, into *avadhyaḥ*. We have therefore emended accordingly.

The first line of this verse is significantly different from the version in the source text, the *Gorakṣaśataka*. The second quarter is corrupt in many of the *Haṭhapradīpikā* manuscripts but *smṛti* and *nānyathā* are well attested.
