अथ समाधिः ।

Now *samādhi*:

(1) Mind is the master of the senses; breath is the master of the mind [and] dissolution [of the mind] is the master of the breath. [The yogi] should take refuge in that master, dissolution [of the mind].

❖ Commentary

This line may be authorial because it is explaining the fact that 4.6 and 4.7 teach similar techniques called *śāmbhavī mudrā* and *khecarī mudrā* respectively. One would expect a verse on *khecarī mudrā* to be explaining the insertion of the tongue in the nasopharyngeal cavity (cf. 3.33–48), but the practice of meditating by fixing the gaze is called *khecarī mudrā* in 4.7 (as attested by α, η and π manuscripts) and manuscripts of the *Candrāvalokana*, the text from which Svātmārāma borrowed this verse. It is, therefore, likely that he added 4.8 to explain that *śāmbhavī* and *khecarī mudrās* are the same with respect to the gaze and meditative state of mind. A similar conflation occurs in the *Śivayogapradīpikā* (5.3).

On the position of these verses (4.9–11) in the various recensions of the text, see the introduction p. 77.

The first half of the verse has many variants among the witnesses, and none of the vari-

belonging to lower branches of the stemma (e.g., η_2 , π_{ω} , etc.). This version was likely inserted
into chapter three of α_2 , which seems to best represent it:

With the help of other manuscripts (in particular K_1 of the γ group), the above can be emended
and understood as follows:

On *caupaṭī* in the first *pāda*, McGREGOR (1994: s.v.) and CALLEWAERT (2009: s.v.) in their dictio-

naries of modern and old Hindi both give the meaning “open all around” for *caupaṭ*. McGregor derives it from Sanskrit *catuspaṭṭa*. Molesworth (1857: s.v.) in his Marathi dictionary gives “A quadrangular expanse or space, esp. as open and extended: also a broad and level tract” for *caupaṭṭā*.

We suspect that the α reading of *paṭī* at the end of the first *pāda* is the result of dittography.

❖ Commentary

The third verse quarter varies considerably among the witnesses and testimonia. We have accepted the reading of α_1 (*nādam evānusaṃdhānān*), which is also attested by the π group and manuscripts of the *Haṭharatnāvalī*, on the assumption that the -m- at the end of *nādam* is a hiatus break, the intended reading being *nāda evānusaṃdhānāt*. A similar hiatus break is found at 3.89.

❖ Commentary

In *Jyotsnā* 4.70, Brahmānanda understands the voids associated with each stage to be places in the body. However, in the *Amṛtasiddhi* and *Amaraugha*, the source text of this verse, the series of voids (along with their respective blisses and sounds) derives from a tetrad of meditative voids in Vajrayāna traditions (MALLINSON AND SZÁNTÓ 2021: 18; BIRCH 2019: 968).

❖ Commentary

The name of the second stage, *ghaṭa* (and the related form *ghaṭikṛtya* found in the first *pāda* of this verse) can be understood in at least three ways, as union, activation or pot (the latter with an alchemical connotation, on which see 3.12 and MALLINSON AND SZANTO 2021: 20–23). In the *Dattātreyayogaśāstra* (verse 90) its primary meaning is union and the united pairs are *prāṇa* and *apāna*, *jīvātman* and *paramātman*, and *nāda* and *bindu*.

❖ Commentary

Here the object of piercing is unspecified, but it is likely to refer to the knot of Viṣṇu mentioned in the previous verse.

We have understood *vihāyo* ('space') as referring to the state of total emptiness (*atīśūnya*) that was mentioned in the previous verse.

The reading of the first verse quarter, *cittānāndaṃ tato jitvā*, is likely a patch for the obscure *paramānandarocitvāt* in the *Amaraugha* (40a), which is the source text.

❖ Commentary

The reading we have adopted for the fourth verse quarter, *kvaṇadvīṇākvaṇo*, Birch's conjecture in his edition of the *Amaraughā*, is supported by several testimonia and *Amṛtasiddhi* 31.2, where it is said that the sound of a *vīṇā* arises in the fourth stage.

The reading *śarva*, i.e. Śiva, found in some testimonia and the *Jyotsnā* makes good sense, but in its description of this stage, the *Amṛtasiddhi*, which is the ultimate source of this passage has *sarva* (30.1).

❖ **Commentary**

The meaning of *tattva* here is unclear. It is a synonym for *samādhi* and *unmanī* in the next verses. However, this meaning seems unlikely here as *tattva* is one of three factors that is supposed to lead to *unmanī*. In *Jyotsnā* 4.104, Brahmānanda says that *tattva* means *citta*, which makes sense in so far as the mind grows to the beyond-mind state. However, this interpretation seems somewhat contrived. We have understood *tattva* in the sense of the ‘highest reality’ (*paramatattva*) on the assumption that, as the seed, it is the latent cause of the state beyond mind.

❖ Commentary

The reading *tūlena* (‘with cotton’), which is attested by α_3 , makes good sense and is close to the reading of *mūlena* in α_1 and α_2 . Manuscripts of several other groups instead have *hastābhyāṃ* (‘with the hands’) or *hastena* (‘with the hand’). This reading was inspired by the technique of blocking the ears and other orifices with the fingers in order to listen to the inner sounds. This practice is attested as early as the *Svacchandatantra* in which it is called *ṣaṇmukhikaraṇa* (VASUDEVA 2004: 272 n. 66). In this *karana*, the other openings of the head are also blocked with the fingers. *Śivasamhitā* 5.36–46 teaches a similar practice. In the *Haṭhayogasaṃhitā* (p. 68), the practice of blocking the ears with the hands is stipulated for *bhrāmarī kumbhaka*.

❖ Commentary

The metaphor is that of snake charming: beguiled by the inner sound, the snake that is the mind becomes transfixed. Witnesses of the γ and δ groups have *turaṅgamaḥ* instead of *bhujaṅgamaḥ*, perhaps because forms from *dhāv* are unusual with the latter, but it is found at e.g. *Garuḍapurāṇa* (1.113.33ab).

In the third *pāda* we have read against α_1 and α_2 (as well as ε_1 and π_2), which have *saṁsmṛtya sarvam* instead of *viśmr̥tya sarvam*. The former could be understood to mean “with complete concentration” but we have adopted *viśmr̥tya* on semantic grounds.

Yogacintāmaṇi f. 23r (attrib. HP), *Nāḍabindūpaniṣat* 44cd–45ab

❖ **Commentary**

The unusual form *niyāmana* is also found in *Rasaśāstra* works where it occurs in the context of restraining mercury and is a topic of discussion (e.g. *Rasaprakāśasudhākara* 1.23, *Ānandakanda* 1.4.58–59).

(50) Cultivation of the inner sound is a bolt for [the stable door of] the swift horse of the mind, so the yogi should regularly focus on it.

50 $\gamma \delta$ have a different verse order: 4.50cd (except δ_2) $\rightarrow$ 4.51 $\rightarrow$ 4.52 $\rightarrow$ 4.50. $\gamma \delta_1$ have 4.50cd = X4.105cd twice. The first time (a), their reading of the last *pāda* is closer to the α reading *avadhāryāpi yoginaḥ*, while the second time (b) it is *avagamyā hi yogibhiḥ*, which is closer to the reading of the expanded version.

❖ Commentary

The source of these lines may be the *Uttaragītā* as they occur in its published edition. However, in one of its manuscripts (NGMPP E 2098-11) these three lines are omitted from Kṛṣṇa's words, which start with *omkāra*. The author of the *Upāsanāsārasaṅgraha* (f. 111) has quoted these lines and attributed them to the *Gītāsāra*.

We are unsure of the meaning of *kūṭa* here. As suggested to us by Sven Sellmer, it may mean the tip of the tongue which in, for example *Khecarīvidyā* 1.65–67 and 3.16–17, is to be placed at *trikūṭa* as part of the practice of *khecarīmudrā*.

❖ Commentary

The emendation of *drutaṃ* in the last verse quarter has been made to restore the faulty readings of the α manuscripts (i.e. *druttaṃ*, *dhṛtaṃ*, *drtaṃ*), which are similar to an incorrect reading in an important witness of the source text, the *Gorakṣaśataka* (T, *dhṛtaṃ*). The emendation to *drutaṃ* is based on the parallel verse in the *Mokṣopāya* and its related recensions, which have *kṣipraṃ* instead.

As it is found in its source text, the *Ĵñānasāra*, this verse says that the yogi flies around the world with the speed of the wind (*vāyuvegena*). We have understood Svātmārāma to have edited the verse to reflect the subject of the previous two verses in which the breath is to be stopped.
